Acknowledgments

These tables were prepared by the Center for Behavioral Health Statistics and Quality (CBHSQ), Substance Abuse and Mental Health Services Administration (SAMHSA), U.S. Department of Health and Human Services (HHS), and by RTI International, a registered trademark and a trade name of Research Triangle Institute, Research Triangle Park, North Carolina. Work by RTI was performed under Contract No. HHSS283201300001C. Contributors and reviewers at RTI listed alphabetically include Kevin Adams, Tricia Adams, Jeremy Aldworth, Katherine J. Asman, Stephanie N. Barnett, Ellen Bishop, Michael R. Bradshaw, Kristen Brown, Lisa A. Carpenter, Pinliang (Patrick) Chen, Chuchun Chien, Elizabeth Copello, Devon S. Cribb, Lanting Dai, Teresa R. Davis, Susan L. Edwards, Glynis S. Ewing, Barbara J. Felts, Misty S. Foster, Peter A. Frechtel, Julia M. Gable, Gina S. Geercken, Harper Gordek, Paxton Gorsage, Rebecca A. Granger, Wafa Handley, Rachel Harter, Erica L. Hirsch, David Hunter (Project Director), Phillip S. Kott, Larry A. Kroutil, Jeffrey S. Laufenberg, Philip K. Lee, Dan Liao, Nicole Mack, Peilan Chen Martin, Dexter McNutt, Andrew S. Moore, Kayla Nowak, Lisa E. Packer, Michael R. Pemberton, Brenda K. Porter, Jeremy D. Porter, Rosanna S. Quiroz, Jessica Roycroft, Ana Saravia, Neeraja S. Sathe, Jennifer H. Schoden, Kathryn Spagnola, Jiantong (Jean) Wang, Lauren K. Warren, Matthew J. Westlake, Carol L. Woodell, and Amy Zemanick. Contributors at SAMHSA listed alphabetically include Rebecca Ahrnsbrak, Jonaki Bose, Barbara Forsyth, Sarra L. Hedden, Arthur Hughes, Joel Kennet, Rachel Lipari, Grace E. Medley, Dicy Painter, Eunice Park-Lee, Kathryn Piscopo, Peter Tice (Project Officer), and Matthew Williams. At RTI, Farrah Bullock Mann and Brenda K. Porter formatted the tables; Amber M. Rohloff and Richard S. Straw provided editorial assistance; and Teresa F. Bass, Debbie F. Bond, Kimberly H. Cone, Daniel Occoquan, Pamela Couch Prevatt, and Pamela Tuck provided web conversion and/or document production support.

Introduction

Results from the 2015 National Survey on Drug Use and Health: Detailed Tables is a collection of tables presenting national estimates from the National Survey on Drug Use and Health (NSDUH). Starting with the 2015 NSDUH, the detailed tables are now a combination of the prior detailed tables and the mental health detailed tables. The detailed tables now consist of 12 subject matter sections, with Sections 1 to 7 mapping to the sections from the previous years' detailed tables and Sections 8 to 11 mapping to the prior year's mental health detailed tables. Section 12 contains sample size and population total tables combined from both sets of tables. The 2015 detailed tables include various types of tables, including 2-year trend and multiyear trend tables. Due to a partial redesign in 2015, many measures are no longer comparable with previous years, but the 2-year trend table format was retained in the detailed tables in order to help illustrate this lack of comparability. Further details about the 2015 redesign and its impact on estimates can be found in the 2015 NSDUH redesign changes and impact section below. More detailed information about these table changes can be found in the table presentation section below.

The 2015 detailed tables present information for youths aged 12 to 17 and adults 18 or older on drug, alcohol, and tobacco use as well as substance use disorder (SUD) (also referred to as dependence or abuse), treatment, health topics, and alcohol consumption. For youths, topics include youth experiences and measures on mental health service utilization, major depressive episode (MDE), and treatment for depression (among youths with MDE). For adults, topics include measures on any mental illness (AMI), serious mental illness (SMI), moderate mental illness, low (mild) mental illness, mental health service utilization (i.e., treatment or counseling for mental health issues), suicidal thoughts and behaviors, MDE, treatment for depression (among adults with MDE), and serious psychological distress (SPD). Measures such as risk and availability of substance use, the co-occurrence of mental disorders with substance use or with SUDs also are presented for both adults and youths. Measures of these behaviors and characteristics are presented by a variety of demographic, geographic, and other variables. The estimates in the tables include rates of the behaviors, numbers of persons engaging in these behaviors, and other measures.

A summary report, *2015 National Survey on Drug Use and Health: Methodological Summary and Definitions*, accompanies these detailed tables and contains information on key definitions (i.e., the glossary in Section D) for many of the measures and terms used in these detailed tables and in other 2015 NSDUH documents, along with further analytic details on these measures (see Section B) and the survey.¹ Where relevant, the glossary provides cross-references between terms and specific question wording for clarity.

In addition to these detailed tables, two first findings reports (FFRs) that are focused on key substance use and mental health indicators and prescription drug use and misuse data from the 2015 NSDUH are scheduled to be made available online in September 2016 at <http://www.samhsa.gov/data/>. Other FFRs on topics such as suicide thoughts and behavior

¹ Center for Behavioral Health Statistics and Quality. (2016). *2015 National Survey on Drug Use and Health: Methodological summary and definitions*. Retrieved from <http://www.samhsa.gov/data/>

among adults, receipt of services for substance use and mental health issues among adults, sexual orientation and adult substance use and mental health, risk and protective factors and initiation of substance use, and a substance use and mental health profile of spouses and children of U.S. military personnel will be available online by the end of 2016.

SURVEY DESIGN

A coordinated sample design was developed for the 2014 through 2017 NSDUHs. It is a state-based design with an independent, multistage area probability sample within each state and the District of Columbia. As a result, states are viewed as the first level of stratification. Each state is further stratified into approximately equally populated state sampling regions (SSRs). Creation of each year's multistage area probability sample then involves selecting census tracts within each SSR, census block groups within census tracts, and area segments (i.e., a collection of census blocks) within census block groups. Finally, dwelling units (DUs) are selected within segments, and within each selected DU, up to two residents who are at least 12 years old are selected for the interview.

The coordinated design for 2014 through 2017 includes a 50 percent overlap in third-stage units (area segments) within each successive 2-year period from 2014 through 2017. The designed overlap slightly increases the precision of estimates of year-to-year trends because of the expected small but positive correlation resulting from the overlapping area segments between successive survey years. The design also allocates more interviews to the largest 12 states (compared with the 1999 to 2013 design). Making the sample sizes more proportional to the state population sizes improves the precision of NSDUH estimates.

Starting in 2014, the allocation of the sample by age group changed. In the 2005 through 2013 NSDUHs, the sample was allocated equally between three age groups: 12 to 17, 18 to 25, and 26 or older. Starting in 2014, the allocation of the NSDUH sample became 25 percent for adolescents aged 12 to 17, 25 percent for adults aged 18 to 25, and 50 percent for adults aged 26 or older. The sample of adults aged 26 or older was further divided into three subgroups: aged 26 to 34 (15 percent), aged 35 to 49 (20 percent), and aged 50 or older (15 percent). These age allocation changes were designed to reflect more closely the actual population distributions by state and age group, so that the precision of estimates overall and for older age groups could be improved.

BREAKS IN TRENDS DUE TO QUESTIONNAIRE AND OTHER CHANGES

NSDUH has undergone changes over the years in order to improve the quality of its data and to address the changing needs of policymakers and researchers with regard to substance use and mental health issues. These changes affect the level of comparability across years and many times cause breaks in trends. Information pertaining to some of the more major changes over the years are summarized below. For more detailed information on these revisions, see Sections B and C of the *2015 National Survey on Drug Use and Health: Methodological Summary and Definitions*.²

² See the reference in footnote 1.

2015 NSDUH Redesign Changes and Impact

The NSDUH questionnaire underwent a partial redesign in 2015. The prescription drug questions for pain relievers, tranquilizers, stimulants, and sedatives were redesigned to shift the focus from lifetime misuse to past year misuse. Additionally, questions were added about any past year prescription drug use, rather than just misuse. A separate section with methamphetamine questions was added, replacing the methamphetamine questions that were previously asked within the context of prescription stimulants. Substantial changes were also made to questions about smokeless tobacco, binge alcohol use, inhalants, and hallucinogens.

These changes led to potential breaks in the comparability of 2015 estimates with estimates from prior years. Consequently, these changes potentially affected overall summary measures, such as any illicit drug use, and other measures, such as initiation, SUDs, and substance use treatment. Additionally, certain demographic items were changed as part of the partial redesign. Employment questions were moved from the computer-assisted personal interviewing (CAPI) section to the audio computer-assisted self-interviewing (ACASI) section of the questionnaire. Education questions were updated, and new questions were added on disability, English-language proficiency, sexual orientation of adults, and military families.

Due to the potential breaks in comparability, many estimates from prior years have been noted in the detailed tables as not comparable due to methodological changes. These include measures of overall illicit drug use, use of illicit drugs other than marijuana, use of hallucinogens, inhalants, and methamphetamine, misuse of psychotherapeutics, binge and heavy alcohol use overall and among females, smokeless tobacco, and substance use treatment. Additionally, estimates by education and current employment have been noted as not comparable. Other topics, such as the mental health topics, did not undergo major changes and therefore are considered comparable.

There are new tables for 2015 pertaining to any past year prescription drug use. Within these tables, corresponding estimates from prior years are noted as unavailable. The newly defined any use of prescription drugs includes both use as directed by a doctor as well as misuse. Misuse includes use in any way not directed by a doctor, including use without a prescription of one's own, use in greater amounts, more often or longer than told to take a drug, or use in any way not directed by a doctor. The detailed tables no longer use the term "nonmedical use" and instead use the term "misuse." For more specific information about each of the 2015 NSDUH changes, see Section C of the *2015 National Survey on Drug Use and Health: Methodological Summary and Definitions*.³

Because of the change in focus of the 2015 NSDUH questions for specific psychotherapeutic drugs from the lifetime to the past year period among respondents who last misused any prescription psychotherapeutic drug in any of the four categories (pain relievers, tranquilizers, stimulants, or sedatives) more than 12 months ago, there appeared to be an underreporting of lifetime prescription drug misuse compared with prior years. This might be because respondents are no longer presented with examples of drugs that formerly were available by prescription in the United States but are no longer available and because there are many fewer

³ See the reference in footnote 1.

questions asking about lifetime use. These respondents who did not report misuse that occurred more than 12 months ago would be misclassified as still being "at risk" for initiation of misuse of prescription drugs in that psychotherapeutic category (i.e., individuals who initiated misuse more than 12 months ago are no longer at risk for initiation). For this reason, the tables do not show percentages for initiation of misuse of psychotherapeutic drugs among individuals who were at risk for initiation. The tables also do not show estimates for lifetime psychotherapeutic drug use. For more specific information about each of the 2015 changes, see Sections B.4.1 and B.4.2 in Section B of the *2015 National Survey on Drug Use and Health: Methodological Summary and Definitions*.⁴

In order to evaluate the changes from the redesign, a 12-month redesign impact assessment was completed. Analyses were conducted on a subset of variables associated with the detailed tables to check for potential trend breaks, including the risk and availability measures. After significant differences between 2015 and previous years were found for 16 of 17 raw risk and availability variables during an initial analysis, logistic regression models were run on dichotomous recodes. All of the perceived great risk of harm associated with substance use measures yielded a significant increase in 2015 compared with previous years. Extreme weights and missingness rates were investigated to ensure these were not the cause of the difference. As more data become available, trends over time will be further analyzed to determine comparability. Currently, estimates for these measures in the detailed tables for years prior to 2015 have been noted as not reported due to measurement issues.

Previous Mental Health Changes and Impact

Because of additional survey improvements and questionnaire changes to the mental health sections between 2002 and 2012, it is not possible to assess long-term trends for all of the mental health issues. A summary of the changes is described below, but for more detailed information on revisions, see Sections B.4.7 in Section B of the *2015 National Survey on Drug Use and Health: Methodological Summary and Definitions*.⁵

In 2012 revisions were made to the 2008 to 2011 past year AMI and SMI estimates. Past year mental illness estimates for 2008 through 2011 found in mental health detailed tables and reports published prior to 2012 were based on a prediction model for mental illness developed using the 2008 clinical data from the Mental Health Surveillance Study (MHSS). An improved model was used for estimates starting in 2012. For the 2012, 2013, and 2014 mental health detailed tables and the 2015 detailed tables, the 2012 to 2015 estimates and the previous 2008 to 2011 estimates are based on the 2012 model.

It is recommended that the mental illness variables derived from the 2012 model not be used when analyzing variables for past year suicidal thoughts, past year MDE, the Kessler-6 (K6) mental disorder scale, or the World Health Organization Disability Assessment Schedule (WHODAS) scale, and it is also recommended that the mental illness variables derived from the 2012 model not be used when analyzing other closely linked variables (including past year suicide attempts, past year suicide plans, medical treatment for suicide attempts, lifetime MDE,

⁴ See the reference in footnote 1.

⁵ See the reference in footnote 1.

SPD, or components used in the K6 or WHODAS scales). For detailed information on model revisions to the mental illness items, see Section B.4.7 in Section B of *2015 National Survey on Drug Use and Health: Methodological Summary and Definitions*.⁶ As with the mental illness estimates based on the 2008 model, the mental illness estimates based on the 2012 model are not comparable with SMI estimates produced from NSDUH data prior to 2004, and SMI estimates were not produced from 2004 to 2007; thus, long-term trend estimates are not available for SMI.

Because of the 2008 questionnaire revisions to the mental health module, several estimates in 2008 (MDE and past 12-month SPD) were affected by context effects. However, an adjustment for the questionnaire changes was applied to estimates of MDE for 2005 to 2008. For more detailed information, see Section B.4.8 in Section B of the *2015 National Survey on Drug Use and Health: Methodological Summary and Definitions*.⁷ Therefore, long-term trend estimates for these two measures are available from 2005 through 2015. No additional questionnaire changes from 2009 to 2015 have led to changes in these adult measures. Moreover, no questionnaire changes have been implemented that affected the adult mental health service utilization questions; therefore, estimates of mental health service utilization presented in these detailed tables reflect trends from 2002 to 2015. The only exceptions are estimates that combine mental health data with other topics that are considered not comparable.

No questionnaire revisions affected MDE for youths aged 12 to 17; thus, long-term trend estimates are available from 2004 through 2015. However, revisions to the youth mental health service utilization module of the 2009 NSDUH questionnaire resulted in new estimates and a discontinuation of trends for several items on the source of mental health services. New questions regarding the receipt of mental health services from juvenile justice sources were added in 2009, and questions regarding services from educational sources were revised and are not comparable with estimates prior to 2009.

Changes to Previously Published Estimates

During regular data collection and processing checks for the 2011 NSDUH, data errors were identified. These errors affected the data for Pennsylvania (2006 to 2010) and Maryland (2008 and 2009). Cases with erroneous data were removed from the data files, and the remaining cases were reweighted to provide representative estimates. The errors had minimal impact on the national estimates and no effect on direct estimates for the other 48 states and the District of Columbia. In reports where model-based small area estimation (SAE) techniques are used, estimates for all states may be affected, even though the errors were concentrated in only two states. In reports that do not use model-based estimates, the only estimates appreciably affected are estimates for Pennsylvania, Maryland, the mid-Atlantic division, and the Northeast region.

The 2015 detailed tables and 2015 FFRs do not include state-level or model-based estimates. However, the 2015 detailed tables do include estimates for the mid-Atlantic division and the Northeast region. Estimates based on 2006 to 2010 data may differ from previously published estimates. Tables and estimates based only on data since 2011 are unaffected by these

⁶ See the reference in footnote 1.

⁷ See the reference in footnote 1.

data errors. All affected tables (i.e., tables with estimates based on 2006 to 2010 data) contain a note to indicate this to the user.

Caution is advised when comparing data from older reports with data from more recent reports that are based on corrected data files. As discussed above, comparisons of estimates for Pennsylvania, Maryland, the mid-Atlantic division, and the Northeast region are of most concern, while comparisons of national data or data for other states and regions are essentially still valid. The Center for Behavioral Health Statistics and Quality (CBHSQ) within the Substance Abuse and Mental Health Services Administration (SAMHSA) does not recommend making comparisons between unrevised 2006 to 2010 estimates and estimates based on data for 2011 and subsequent years for the areas of greatest concern.

New 2002 Baseline

Methodological differences implemented in the 2002 NSDUH affected the comparability of the 2002 estimates with prior surveys. Some of the changes included the addition of a \$30 incentive, a change in the survey name from the National Household Survey on Drug Abuse (NHSDA) to the current name, and updated population data from the 2000 decennial census being incorporated into the sample weights. Because of these improvements in the 2002 NSDUH, the 2002 data constitute a new baseline for tracking trends in substance use and other measures. Therefore, estimates from the 2002 through 2015 surveys should not be compared with estimates from the 2001 or earlier surveys to examine changes over time. In addition to the 2002 baseline change, the aforementioned changes for the 2015 NSDUH also mean that 2015 is a new baseline for many measures.

Methodology changes throughout NSDUH's history make it difficult to assess long-term trends from tables presenting data from 1971 to 2015. However, it is instructive to compare NSDUH estimates from 1971 to 2015 by "piecing together" the data from time periods for which data are comparable. Specifically, valid trend comparisons can be made for 1971 to 1998, 1999 to 2001, and 2002 to 2015. With this approach, comparisons between 1998 and 1999, and between 2001 and 2002, should be made with caution because they are potentially biased due to changes in methods. Nevertheless, when these data are combined in a single presentation, it often becomes clear that the effects of the changes in methods are small compared with the major shifts in substance use prevalence that have occurred over the past five decades.

TABLE PRESENTATION

Although the majority of the detailed tables present estimates from the 2014 and 2015 NSDUHs, some tables include only estimates from the 2015 NSDUH. Additionally, due to the 2015 redesign, a number of tables are formatted to present 2 years of data, but all of the 2014 estimates are noted as not comparable or not reported. The ability to present 2 years of estimates will be available in subsequent years when more data are available. In these cases, any corresponding multiyear trend tables (i.e., using more than 2 years of data) have been dropped. As more comparable years of data are available, multiyear trend tables for these measures will be added. Also included are a number of tables that present data from earlier surveys in the series, including a section of tables presenting data mainly from 2002 to 2015 or 2008 to 2015, with a few tables with data with various years starting from 2004 to 2009, and a couple of tables

presenting data from 1971 to 2015. Below is information on how the tables are organized, the types of tables that are available, information about specific indicators used for the 2015 detailed tables, information on missingness, information on the impact of rounding on estimates presented in the tables, and how totals are to be interpreted within the tables.

Table Numbering

The detailed tables are numbered using a three-part numbering scheme (e.g., 1.15A). The first part of the table number (1.15A) is the subject matter section to which a particular table belongs. The second part (1.15A) is the number of the table within a particular section. The third part (1.15A) is a table type indicator, an alphabetic letter appended to the table number. Each table number, as explained below, has multiple table types. Tables are numbered sequentially within each subject matter section. Identical tables across years may not be assigned the same table number each year. Due to the large number of changes for the 2015 NSDUH, particularly the combination of the detailed tables and mental health detailed tables, more tables than usual may have different table numbers from the prior year.

As noted above, in 2014 there were two sets of detailed tables—the detailed tables and the mental health detailed tables. The 2014 detailed tables included eight sections, and the 2014 mental health detailed tables contained three sections. A crosswalk has been included below that shows the detailed tables by section in the 2014 detailed tables and the new sections within the 2015 detailed tables.

2014 Table Section	2015 Table Section
Detailed Tables	
Sections 1 to 7	Sections 1 to 7
Section 8 (Sample Size and Population Tables)	Section 12
Mental Health Detailed Tables	
Section 1 (Adult Mental Health 2-Year Tables)	Section 8
Section 1 (Adult Mental Health Multiyear Trend Tables)	Section 10
Section 2 (Youth Mental Health 2-Year Tables)	Section 9
Section 2 (Youth Mental Health Multiyear Trend Tables)	Section 11
Section 3 (Sample Size and Population Tables)	Section 12

The 12 subject matter sections and the number of tables per section are as follows:

Section 1: Illicit Drug Use Tables – 1.1 to 1.158

Section 2: Tobacco Product and Alcohol Use Tables – 2.1 to 2.88

Section 3: Risk and Protective Factor Tables – 3.1 to 3.38

Section 4: Incidence Tables – 4.1 to 4.20

Section 5: Substance Use Disorder and Treatment Tables – 5.1 to 5.62

Section 6: Miscellaneous Tables – 6.1 to 6.107

Section 7: Trend Tables – 7.1 to 7.51

Section 8: Adult Mental Health Tables – 8.1 to 8.87

Section 9: Youth Mental Health Tables – 9.1 to 9.17

Section 10: Adult Mental Health Trend Tables – 10.1 to 10.41

Section 11: Youth Mental Health Trend Tables – 11.1 to 11.6

Section 12: Sample Size and Population Tables – 12.1 to 12.11

Table Types and Purpose

The table type indicators are primarily defined as follows; however, some exceptions do exist and are noted in subsequent text.

Table Type	Purpose of the Table
A	Presents estimates of the numbers of persons exhibiting the specified behavior or characteristic (e.g., substance use) in the populations described by the column and row headings.
B	Presents estimates of the percentages of persons exhibiting the specified behavior or characteristic (e.g., substance use) in the populations described by the column and row headings.
C	Presents the standard error associated with each of the estimates in the "A" tables.
D	Presents the standard error associated with each of the estimates in the "B" tables.
N	Presents the number of cases in the specified NSDUH sample with the characteristics defined by the column and row headings.
P	Presents the <i>p</i> values from tests of the statistical significance of differences between columns in the "B" tables.

The majority of tables within the detailed tables contain five table types (A, B, C, D, and P) as defined above. Note that table type N is used exclusively within Section 12 to display the sample size counts. Also, table type P is excluded for sets of tables where no significance testing is performed between 2015 and previous years. This includes tables that show only a single year of data and tables where all of the pre-2015 NSDUH estimates are deemed not comparable (i.e., estimates replaced with "nc" as defined below) or are not reported (i.e., estimates replaced with "nr" as defined below) within a table. Exceptions to this organization are noted as follows:

- Section 3 (Risk and Protective Factor Tables) includes tables for which only table types A, B, C, and D are produced (Tables 3.22 to 3.38). These tables present estimates for the 2015 NSDUH only; thus, these are not trend tables, so significance tests between years are not relevant and table type P is not applicable.
- Section 4 (Incidence Tables) contains both tables for which only table types A and C are produced and tables for which only table types B, D, and P are produced. Specifically, one subset of tables (Tables 4.13 to 4.16) includes table types A and C. This subset of tables presents the number of past year initiates in table type A and the associated standard errors in table type C. The remaining Section 4 tables include only table types B, D, and P. Tables 4.1 to 4.12 present numbers and percentages of past year initiates in

table type B, associated standard errors for each of these estimates in table type D, and p values from tests of statistical differences between years in table type P. Tables 4.17 to 4.20 present the mean age for past year initiates in table type B, associated standard errors in table type D, and p values from tests of statistical differences between years in table type P.

- Section 5 (Substance Use Disorder and Treatment Tables) includes tables for which only table types A, B, C, and D are produced (Tables 5.61 and 5.62). These tables present estimates for the 2015 NSDUH only; thus, these are not trend tables, so significance tests between years are not relevant and table type P is not applicable.
- Section 7 (Trend Tables) contains one subset of tables for which only table types B and D are produced and one subset of tables for which only table types B, D, and P are produced. Specifically, one subset of tables (Tables 7.50 and 7.51) are multiyear tables that present estimated percentages for 1971 to 2015 in table type B and associated standard errors in table type D. The estimated total number of users and associated standard errors are not presented, nor are between-year significance tests implemented; thus, table types A, C, and P are not used. The other subset of tables (Table 7.39) includes multiyear tables that involve only table types B, D, and P. Table 7.39 presents the mean age at first substance use for past year initiates in table type B, associated standard errors for each of these estimates in table type D, and p values from tests of statistical differences between years in table type P.
- Section 12 (Sample Size and Population Tables) contains only table types A, C, and N. Population counts, standard errors, and sample sizes are displayed in table types A, C, and N, respectively. Percentages of the population and associated standard error tables are not provided in this section.

Table Indicators

Each 2015 detailed table, including those for all of the above table types, contains the following definitional footnote, regardless of whether any or all of the indicators were used in the table:

* = low precision; -- = not available; da = does not apply; nc = not comparable due to methodological changes; nr = not reported due to measurement issues.

The "* = low precision" portion of the footnote indicates an estimate is being suppressed (i.e., not shown) due to low precision.

The "-- = not available" portion of the footnote indicates that for the given year, the questions used to produce the estimates were not available. For example, prior to 2015, respondents were not asked about methamphetamine use disorder. Thus, for 2014 and earlier years, those estimates are shown with the "--" notation.

The "da = does not apply" portion of the footnote indicates that the question or estimate does not apply to a certain group. For example, in pregnancy tables, the trimester estimates are shown as "da" for overall females and nonpregnant females, and in the incidence tables that show numbers in thousands and percentages in the same table, the p values for the numbers in

thousands are replaced with "da" because the detailed tables only show *p* values of tests of differences of percentages.

The "nc = not comparable due to methodological changes" portion of the footnote indicates that estimates for the measure do exist for prior years, but they are no longer comparable with the current year estimate. For example, illicit drug use estimates are available for all years in the detailed tables, but the 2015 estimates are not comparable with the 2002 through 2014 estimates due to questionnaire changes. Thus, the 2014 and prior year estimates are shown with the "nc" notation.

The "nr = not reported due to measurement issues" portion of the footnote indicates that the estimate could be calculated based on available data but is not calculated due to potential measurement issues. For example, lifetime use of pain relievers for 2015 is shown as "nr" because the questionnaire was changed to focus on past year misuse of pain relievers rather than lifetime past year use of pain relievers, and there appears to be an underestimate of lifetime pain reliever use compared with prior years.

For more information on how low precision is defined and further details on the changes noted above, see Section B.2.2 in Section B and Section C of the *2015 National Survey on Drug Use and Health: Methodological Summary and Definitions*.⁸

Additionally, all type A and C detailed tables where significance testing was performed between years contain the following footnotes, regardless of whether any differences were significant:

- ^a The difference between this estimate and the 2015 estimate is statistically significant at the .05 level. Rounding may make the estimates appear identical.
- ^b The difference between this estimate and the 2015 estimate is statistically significant at the .01 level. Rounding may make the estimates appear identical.

Tables where significance testing was not performed between years, such as those with only a single year or single group of combined years or those with no comparable estimates for years prior to 2015, do not contain these footnotes.

Missingness

Some measures are not defined for all respondents and have missing data. In the detailed tables, a footnote or note is included to alert a user to the fact that missing data were excluded from the analysis. For the 2015 NSDUH, an investigation was completed to look at missing data rates in the 2015 detailed tables. The investigation was done for all new 2015 measures and existing measures where there was a break in trend. For other measures, the results from the 2014 investigations were assumed to still hold. That is, missing data were not a concern for most topics. Similar results were found in 2015. However, a few items did have a slightly higher rate of missing data (e.g., items on perceived availability of various illicit drugs and items on source of prescription drugs obtained for most recent use). The exclusion of respondents with missing data induces a negative bias for estimates of population totals and may induce a bias in either

⁸ See the reference in footnote 1.

direction for estimates of population means and proportions. For more information, see Chapter 4 of the 2014 NSDUH statistical inference report.⁹

Rounding and Effect on Significance Testing

Prevalence estimates in the form of percentages are presented rounded to the nearest tenth of a percent, and total estimates are rounded to the nearest thousand. Due to this rounding, prevalence estimates of 0.0 percent and total estimates of 0 are displayed in the tables. These estimates are rounded down from a percentage < 0.05 percent or < 50, respectively, and do not represent an absence of persons displaying a particular characteristic. Nonrounded estimates of zero are suppressed.

Testing between two prevalence estimates can indicate significant differences involving estimates that appear identical when rounded but are actually different. Note that similar results can be seen in the average age-at-first-use estimates, which are also rounded to the nearest tenth, and the total estimates. For example, in [Table 1.2B](#), the estimate for lifetime crack use among youths aged 12 to 17 was 0.1 percent for both 2014 and 2015 and was indicated as significantly different. Although the rounded estimates appear the same, the unrounded estimates were 0.139 percent for 2014 and 0.050 percent for 2015. Another example in trend [Table 7.3B](#) of the 2015 detailed tables shows how seemingly identical estimates from previous years can differ in significance when each is compared against the current year estimate. The estimate for past month cocaine use among people aged 12 or older was 0.6 percent for 2010, 2012, 2013, and 2014, but only the 2014 estimate was significantly different from the 2015 estimate of 0.7 percent. Although the rounded estimates for 2010, 2012, 2013, and 2014 appeared to be the same, the unrounded estimates were 0.580 percent for 2010, 0.634 percent for 2012, 0.590 percent for 2013, and 0.577 percent for 2014 and had varying standard errors that affected the testing. Note that differences in precision can also cause seemingly identical (or identical) previous year estimates to differ in significance when compared with the current year estimate.

Definitions of Totals

Totals are defined in different ways within the detailed tables. Totals can refer to the estimated number of persons with a specific characteristic, as shown in detailed table types A and displayed in number of thousands. For example, in [Table 2.2](#), the total estimated population of persons aged 12 to 17 who used cigarettes in the past year in 2015 was approximately 2,021,000 and shown as 2,021. Totals can also be presented in the table rows or columns, either as a total of a subgroup category or listed as the "Total Population." If the estimate is a total of a subgroup category (e.g., total of gender), the estimate is the total number of both males and females combined. Instances where measures have missing data may cause the subcategories to not add up to total and are noted in the tables. If the estimate is shown as the "Total Population" on the row, then that estimate is usually included as a reference for tables with a nonstandard denominator. This total population estimate is normally the number being used in the nonstandard denominator to allow users to easily see that estimate without having to switch tables. For example, in [Table 8.23](#), the total population row for table type A shows the estimated

⁹ Center for Behavioral Health Statistics and Quality. (2016). *2014 National Survey on Drug Use and Health: Methodological Resource Book (Section 13, Statistical Inference Report)*. Rockville, MD: Substance Abuse and Mental Health Services Administration.

number of persons who fit the criteria in the columns, which are the table denominators (i.e., 9,765,000 adults reported SMI in the past year for 2015), and this number is used as the denominator in all the dependence estimates.

LOCATING A TABLE

The detailed tables consist of prevalence estimates (table types A and B), standard errors and p values (table types C, D, and P), and sample sizes (table type N). The tables (all types) are organized by subject matter sections. A total of 12 subject matter sections are available for 2015, and a pair of methods can be used to locate and access a table of interest within the PDF version of the detailed tables.

Subject Matter Sections

If a user knows which of the 12 subject matter sections is of interest, then he or she can click directly on the bookmark for that subject matter section. This will take the user to the index of tables for that section. This index can be used to identify the group of tables in which the desired table is likely to be located. Clicking on the appropriate link will take the user directly to the first table in the specified group where he or she then can scroll through the tables to locate the table of interest. The group links will provide the user access to the prevalence estimate tables. To access the corresponding standard error and p value tables, a user must click on the "SE" link associated with that group link.

Note that the table numbers and sections differ from previous years. The 2014 mental health detailed tables contained three sections. Section 1 of the 2014 mental health detailed tables is now equivalent to Sections 8 and 10 of the 2015 detailed tables; 2014's Section 2 is equivalent to Sections 9 and 11 of the 2015 detailed tables; and 2014's Section 3 (the sample size and population tables) is now included in Section 12 of the 2015 detailed tables.

The 12 subject matter sections are as follows:

Index of Section 1: Illicit Drug Use Tables (1.1 to 1.158)

Index of Section 2: Tobacco Product and Alcohol Use Tables (2.1 to 2.88)

Index of Section 3: Risk and Protective Factor Tables (3.1 to 3.38)

Index of Section 4: Incidence Tables (4.1 to 4.20)

Index of Section 5: Substance Use Disorder and Treatment Tables (5.1 to 5.62)

Index of Section 6: Miscellaneous Tables (6.1 to 6.107)

Index of Section 7: Trend Tables (7.1 to 7.51)

Index of Section 8: Adult Mental Health Tables (8.1 to 8.87)

Index of Section 9: Youth Mental Health Tables (9.1 to 9.17)

Index of Section 10: Adult Mental Health Trend Tables (10.1 to 10.41)

Index of Section 11: Youth Mental Health Trend Tables (11.1 to 11.6)

Index of Section 12: Sample Size and Population Tables (12.1 to 12.11)

Reference Tools

If a user needs more detailed information on which subject matter section to enter, he or she can click on the "Reference Tools" bookmark to learn about various other tools available for locating a specific table of interest. These tools include a key to selected variables and a list of tables. For information on key definitions (i.e., the glossary) for many of the measures and terms used in the detailed tables, see Section D of the 2015 methodological summary and definitions report.¹⁰

The key to selected variables defines key topics (e.g., demographics) used throughout the 2015 detailed tables. As mentioned earlier, the glossary defines and cross-references many key measures used in the 2015 detailed tables and the 2015 FFRs. Both the key and the glossary may be helpful when used in conjunction with the table index in identifying tables that contain information for selected measures. However, not all measures and terms listed in the key and the glossary are specifically mentioned in the table index. The list of tables can be used to identify a specific table for one of the subject matter sections. Once the desired table has been located using the reference tools, the user then should follow the directions provided earlier in the section on the "Subject Matter Sections" to access the table.

Note that once a group of prevalence estimate tables is accessed, there is no direct link to the corresponding standard error and *p* value tables (and vice versa). If the user wishes to see the corresponding prevalence estimate, standard error and *p* value, or sample size and population tables, it will be necessary first to click on the appropriate subject matter bookmark, then to select the new group that contains the table of interest.

¹⁰ See the reference in footnote 1.

Index of Section 1 Tables: Illicit Drug Use (1.1 to 1.158)

Illicit Drug Use Table	Table Number	Link to Corresponding Standard Error (SE) Table	Corresponding Multiyear Trend Table(s) Available in Section 7¹
Lifetime, past year, and past month illicit drug use, by selected age categories and gender	1.1 to 1.14	SE	Yes
Selected illicit drugs, by detailed age categories	1.15 to 1.26	SE	Yes
Any use/misuse of prescription psychotherapeutics, by selected age categories	1.27	SE	Yes
Selected illicit drugs, by demographic characteristics	1.28 to 1.87		
Illicit drugs	1.28 to 1.32	SE	Yes
Marijuana	1.33 to 1.37	SE	Yes
Cocaine	1.38 to 1.42	SE	Yes
Crack	1.43 to 1.47	SE	Yes
Hallucinogens	1.48 to 1.52	SE	Yes
Inhalants	1.53 to 1.57	SE	Yes
Methamphetamines	1.58 to 1.62	SE	Yes
Any use/misuse of prescription psychotherapeutics	1.63 to 1.67	SE	Yes
Any use/misuse of pain relievers	1.68 to 1.72	SE	Yes
Any use/misuse of tranquilizers	1.73 to 1.77	SE	Yes
Any use/misuse of stimulants	1.78 to 1.82	SE	Yes
Any use/misuse of sedatives	1.83 to 1.87	SE	Yes
Selected illicit drugs, by geographic characteristics	1.88 to 1.137		
Illicit drugs	1.88 to 1.92	SE	No
Marijuana	1.93 to 1.97	SE	No
Cocaine	1.98 to 1.102	SE	No
Crack	1.103	SE	No
Hallucinogens	1.104	SE	No
Inhalants	1.105 to 1.107	SE	No
Methamphetamines	1.108 to 1.112	SE	No
Any use/misuse of prescription psychotherapeutics	1.113 to 1.117	SE	No
Any use/misuse of pain relievers	1.118 to 1.122	SE	No
Any use/misuse of tranquilizers	1.123 to 1.127	SE	No
Any use/misuse of stimulants	1.128 to 1.132	SE	No
Any use/misuse of sedatives	1.133 to 1.137	SE	No
Specific hallucinogen, inhalant, needle, heroin, pain reliever, tranquilizer, stimulant, and sedative use, by selected age categories	1.138	SE	Yes

See note at end of table.

(continued)

Index of Section 1 Tables: Illicit Drug Use (1.1 to 1.158) (continued)

Illicit Drug Use Table	Table Number	Link to Corresponding Standard Error (SE) Table	Corresponding Multiyear Trend Table(s) Available in Section 7 ¹
Prescription psychotherapeutic subtypes, by selected age categories	1.139 to 1.158		
Any use/misuse of pain relievers	1.139 to 1.143	SE	Yes
Any use/misuse of tranquilizers	1.144 to 1.148	SE	Yes
Any use/misuse of stimulants	1.149 to 1.153	SE	Yes
Any use/misuse of sedatives	1.154 to 1.158	SE	Yes

¹ "Yes" indicates that any estimate from the table(s) in Section 1 is also found in Section 7, but the Section 7 table(s) may not include all of the estimates.

Index of Section 2 Tables: Tobacco Product and Alcohol Use (2.1 to 2.88)

Tobacco Product and Alcohol Use Table	Table Number	Link to Corresponding Standard Error (SE) Table	Corresponding Multiyear Trend Table(s) Available in Section 7¹
Lifetime, past year, and past month tobacco product and alcohol use, by selected age categories and gender	2.1 to 2.14	SE	Yes
Selected tobacco product and alcohol use, by detailed age categories	2.15 to 2.20	SE	Yes
Selected tobacco product and alcohol use, by demographic characteristics	2.21 to 2.50		
Tobacco products	2.21 to 2.25	SE	Yes
Cigarettes	2.26 to 2.30	SE	Yes
Smokeless tobacco	2.31 to 2.35	SE	Yes
Cigars	2.36 to 2.40	SE	Yes
Alcohol	2.41 to 2.50	SE	Yes
Selected tobacco product and alcohol use, by geographic characteristics	2.51 to 2.80		
Tobacco products	2.51 to 2.55	SE	No
Cigarettes	2.56 to 2.60	SE	No
Smokeless tobacco	2.61 to 2.65	SE	No
Cigars	2.66 to 2.70	SE	No
Alcohol	2.71 to 2.80	SE	No
Underage and legal drinkers' alcohol use, by demographic characteristics	2.81 to 2.84	SE	Yes
Underage and legal drinkers' alcohol use, by geographic characteristics	2.85 to 2.88	SE	No

¹ "Yes" indicates that any estimate from the table(s) in Section 2 is also found in Section 7, but the Section 7 table(s) may not include all of the estimates.

Index of Section 3 Tables: Risk and Protective Factors (3.1 to 3.38)

Risk and Protective Factor Table	Table Number	Link to Corresponding Standard Error (SE) Table	Corresponding Multiyear Trend Table(s) Available in Section 7¹
Perceived risk and availability of substances	3.1 to 3.8		
Perceived risk and availability, by selected age categories	3.1 and 3.2	SE	No
Perceived risk and availability, by specific substance use initiation	3.3	SE	No
Perceived risk, by demographic and geographic characteristics	3.4 to 3.7	SE	No
Perceived availability, by demographic and geographic characteristics	3.8	SE	No
Risk and protective factors, by demographic and geographic characteristics	3.9 to 3.21		
Disapproval of substance use behavior	3.9 to 3.11	SE	Yes
Prevention programs/messages	3.12 and 3.13	SE	Yes
Delinquent behavior	3.14 and 3.15	SE	No
Youth behaviors	3.16	SE	No
Religious beliefs	3.17	SE	No
Parental involvement in specific behaviors	3.18	SE	No
Student characteristics	3.19	SE	Yes
Adult involvement in specific school-related behaviors	3.20	SE	No
Substance use of students in grade level	3.21	SE	No
Substance use, by risk and protective factors	3.22 to 3.38		
Perceived risk and availability of substances	3.22 to 3.33	SE	No
Disapproval of substance use behavior	3.34 and 3.35	SE	Yes
Prevention programs/messages and delinquent behavior	3.36	SE	Yes
Selected youth behavior, religious beliefs, and parental involvement in specific behaviors	3.37	SE	No
Student characteristics, adult involvement in specific school-related behaviors, and substance use of students in grade level	3.38	SE	No

¹ "Yes" indicates that any estimate from the table(s) in Section 3 is also found in Section 7, but the Section 7 table(s) may not include all of the estimates.

Index of Section 4 Tables: Incidence (4.1 to 4.20)

Incidence Table	Table Number	Link to Corresponding Standard Error (SE) Table	Corresponding Multiyear Trend Table(s) Available in Section 7¹
Past year initiation of substance use	4.1 to 4.20		
Initiation of selected substances among persons aged 12 or older, persons at risk for initiation, ² and past year users, by selected age categories and gender	4.1 to 4.7	SE	Yes
Initiation among selected age categories, persons at risk for initiation, and past year users ²	4.8 to 4.12	SE	Yes
Initiation among persons aged 12 or older, by gender	4.13	SE	No
Initiation among persons aged 12 or older who initiated use prior to a selected age, by gender	4.14 and 4.15	SE	No
Initiation among persons aged 12 to 49, by gender	4.16	SE	No
Mean age at first substance use among past year initiates aged 12 or older, by gender	4.17	SE	No
Mean age at first substance use among past year initiates who initiated use prior to a selected age, by gender	4.18 and 4.19	SE	No
Mean age at first substance use among past year initiates aged 12 to 49, by gender	4.20	SE	Yes

¹ "Yes" indicates that any estimate from the table(s) in Section 4 is also found in Section 7, but the Section 7 table(s) may not include all of the estimates.

² Due to measurement issues, At Risk for Initiation is not estimated for misuse of prescription drugs. See Section B of the following reference: Center for Behavioral Health Statistics and Quality. (2016). *2015 National Survey on Drug Use and Health: Methodological summary and definitions*. Retrieved from <http://www.samhsa.gov/data/>

Index of Section 5 Tables: Substance Use Disorder and Treatment (5.1 to 5.62)

Substance Use Disorder and Treatment Table	Table Number	Link to Corresponding Standard Error (SE) Table	Corresponding Multiyear Trend Table(s) Available in Section 7¹
Substance use disorder	5.1 to 5.13	SE	Yes
Substance dependence	5.14	SE	Yes
Received substance use treatment	5.15 to 5.26		
Treatment, by demographic or geographic characteristics	5.15 to 5.21	SE	No
Specific substance for last or current treatment	5.22	SE	No
Location of treatment	5.23 to 5.25	SE	No
Treatment, by substance use disorder	5.26	SE	No
Received substance use treatment at any location or a specialty facility	5.27 to 5.33		
Type of treatment	5.27 to 5.29	SE	No
Type of treatment at specialty/nonspecialty facility	5.30 to 5.33	SE	No
Received substance use treatment at specialty facility	5.34 to 5.49		
Treatment, by demographic or geographic characteristics	5.34 to 5.40	SE	No
Specific substance for last or current treatment	5.41	SE	No
Source of payment for last or current treatment	5.42 to 5.44	SE	No
Location of treatment	5.45 to 5.47	SE	No
Treatment, by substance use disorder	5.48 and 5.49	SE	No
Needed and received treatment or perceived need for treatment and made effort to get treatment	5.50 to 5.62		
Illicit drug	5.50 to 5.54	SE	No
Alcohol	5.55 to 5.57	SE	No
Illicit drug or alcohol	5.58 to 5.60	SE	No
Reasons for not receiving substance use treatment	5.61 and 5.62	SE	No

¹"Yes" indicates that any estimate from the table(s) in Section 5 is also found in Section 7, but the Section 7 table(s) may not include all of the estimates.

Index of Section 6 Tables: Miscellaneous (6.1 to 6.107)

Miscellaneous Table	Table Number	Link to Corresponding Standard Error (SE) Table	Corresponding Multiyear Trend Table(s) Available in Section 7¹
Frequency of use/misuse	6.1 to 6.8	SE	Yes
Prescription psychotherapeutic any use/misuse, by substance use	6.9 to 6.13	SE	No
Illicit drugs, by cigarette use	6.14 to 6.18	SE	No
Illicit drugs, by alcohol use	6.19 to 6.27	SE	No
Illicit drugs, by cigarette and alcohol use	6.28 to 6.33	SE	No
Tobacco product and alcohol, by cigarette use	6.34 to 6.38	SE	No
Tobacco product, by alcohol use	6.39 to 6.43	SE	No
Prior year and past year marijuana use status, by selected age categories and gender	6.44	SE	No
Nicotine (cigarette) dependence	6.45 to 6.49	SE	Yes
Substance use disorder, by age at first use and demographic characteristics	6.50 to 6.52	SE	Yes
Substance dependence, by age at first use and demographic characteristics	6.53 to 6.55	SE	Yes
Source for most recent prescription psychotherapeutic misuse (pain relievers, tranquilizers, stimulants, and sedatives)	6.56 to 6.63	SE	No
Source of pain reliever misuse, by initiation and disorder Status	6.64	SE	No
Reasons for prescription drug misuse	6.65 and 6.66	SE	No
Social context, location, and source of underage drinking	6.67 to 6.70	SE	Yes
Pregnancy	6.71 to 6.78	SE	No
College enrollment	6.79 to 6.93	SE	No
Driving under the influence	6.94 to 6.97	SE	No
Probation	6.98 to 6.102	SE	Yes
Parole/supervised release	6.103 to 6.107	SE	Yes

¹ "Yes" indicates that any estimate from the table(s) in Section 6 is also found in Section 7, but the Section 7 table(s) may not include all of the estimates.

Index of Section 7 Tables: Trends (7.1 to 7.51)

Trend Table	Table Number	Link to Corresponding Standard Error (SE) Table	Corresponding 2-Year Table(s) Available in Sections 1-6¹
Substance use	7.1 to 7.29		
Lifetime, past year, and past month illicit drug use, by selected age categories and gender	7.1 to 7.21	SE	Yes
Lifetime, past year, and past month special drug use, by selected age categories and gender (2006-2015)	7.22	SE	No
Past month tobacco product and alcohol use, by selected age categories and gender	7.23 to 7.27	SE	Yes
Past month daily cigarette use, by selected age categories	7.28	SE	Yes
Lifetime, past year, and past month alcohol use, by underage drinkers and gender	7.29	SE	Yes
Risk and protective factors	7.30 to 7.33	SE	
Disapproval of substance use behavior among persons aged 12 to 17	7.30 and 7.31	SE	Yes
Prevention programs/messages among persons aged 12 to 17	7.32 and 7.33	SE	Yes
Past year initiation of substance use	7.34 to 7.39		
Initiation among selected age categories	7.34 to 7.38	SE	Yes
Mean age at first substance use among past year initiates aged 12 to 49	7.39	SE	Yes
Substance use disorder	7.40 to 7.49		
Substance use disorder among selected age categories	7.40 to 7.44	SE	Yes
Dependence among selected age categories	7.45 to 7.49	SE	Yes
1971-2015 past month marijuana and past year cocaine use, by selected age categories	7.50 and 7.51	SE	Yes

NOTE: Estimates for 2002-2015 are presented in these tables unless otherwise noted above.

¹ "Yes" indicates that any estimate from the table(s) in Section 7 is also found in Sections 1 through 6, but the Section 1 to 6 table(s) may not include all of the estimates.

Index of Section 8 Tables: Adult Mental Health (8.1 to 8.87)

Adult Mental Health Table	Table Number	Link to Corresponding Standard Error (SE) Table	Corresponding Multiyear Trend Table(s) Available in Section 10 ¹
Mental illness	8.1 to 8.34		
Any mental illness (AMI), by demographic, geographic, and socioeconomic characteristics	8.1 to 8.3	SE	Yes
Serious mental illness (SMI), by demographic, geographic, and socioeconomic characteristics	8.4 to 8.6	SE	Yes
Levels of mental illness, by demographic, geographic, and socioeconomic characteristics	8.7 and 8.8	SE	Yes
Substance use	8.9 and 8.10	SE	No
Prescription psychotherapeutic drug use/misuse	8.11 to 8.19	SE	No
Tobacco and alcohol use	8.20	SE	No
Substance use disorder (SUD)	8.21 to 8.26	SE	No
Co-occurring SUD and AMI, by demographic, geographic, and socioeconomic characteristics	8.27 and 8.28	SE	No
Co-occurring SUD and SMI, by demographic, geographic, and socioeconomic characteristics	8.29 and 8.30	SE	No
Co-occurring SUD and AMI excluding SMI, by demographic, geographic, and socioeconomic characteristics	8.31 and 8.32	SE	No
AMI and SMI, by probation or parole/supervised release and demographic characteristics	8.33 and 8.34	SE	No
Mental health treatment/counseling²	8.35 to 8.57		
Treatment, by mental illness and demographic, geographic, and socioeconomic characteristics	8.35 to 8.39	SE	Yes
Mental health care and/or substance use treatment at a specialty facility, by mental illness and selected age categories	8.40	SE	No
Types of treatment, by mental illness	8.41 and 8.42	SE	Yes
Location of treatment, by mental illness	8.43	SE	Yes
Types and locations of treatment, by mental illness	8.44	SE	Yes
Mental health care and/or substance use treatment at a specialty facility, by SUD and mental illness	8.45	SE	No
Types of treatment, by selected age categories	8.46	SE	No
Location of outpatient treatment, by selected age categories	8.47	SE	Yes
Sources of payment for outpatient treatment, by selected age categories	8.48	SE	No
Perceived unmet need for treatment, by receipt of treatment and demographic, geographic, and socioeconomic characteristics	8.49 to 8.54	SE	Yes

See notes at end of table.

(continued)

Index of Section 8 Tables: Adult Mental Health (8.1 to 8.87) (continued)

Adult Mental Health Table	Table Number	Link to Corresponding Standard Error (SE) Table	Corresponding Multiyear Trend Table(s) Available in Section 10¹
Reasons for not receiving treatment, by receipt of treatment	8.55 to 8.57	SE	No
Major depressive episode (MDE)	8.58 to 8.66		
MDE and receipt of treatment for depression, by demographic, geographic, socioeconomic, and health characteristics	8.58 to 8.61	SE	Yes
Substance use	8.62	SE	No
SUD	8.63	SE	No
Type of professional seen	8.64 and 8.65	SE	No
Type of treatment received for depression, by demographic and socioeconomic characteristics	8.66	SE	No
Mental health care and/or substance use treatment at a specialty facility, by SUD and MDE	8.67	SE	No
Suicide	8.68 to 8.85		
Suicidal behavior and treatment, by demographic, geographic, and socioeconomic characteristics	8.68 to 8.77	SE	Yes
Suicidal behavior, by substance use	8.78	SE	No
Serious thoughts of suicide, by probation or parole/supervised release status	8.79 and 8.80	SE	No
Suicidal behavior and treatment, level of mental illness, major depressive episode (MDE), and mental health service use, by college enrollment	8.81 to 8.83	SE	No
Suicidal behavior, by mental health or substance use measures	8.84 and 8.85	SE	No
Serious psychological distress (SPD)	8.86 and 8.87		
SPD, by demographic and socioeconomic characteristics	8.86 and 8.87	SE	Yes

¹"Yes" indicates that any estimate from the table(s) in Section 8 is also found in Section 10, but the Section 10 table(s) may not include all of the estimates.

²The term "mental health treatment/counseling" is referred to as "mental health care" and "mental health service use" in the 2015 NSDUH's first findings reports (FFRs), which are available at <http://www.samhsa.gov/data/>.

Index of Section 9 Tables: Youth Mental Health (9.1 to 9.17)

Youth Mental Health Table	Table Number	Link to Corresponding Standard Error (SE) Table	Corresponding Multiyear Trend Table(s) Available in Section 11¹
Mental health services	9.1 to 9.5		
Source of services, by demographic, geographic, and socioeconomic characteristics	9.1 to 9.3	SE	Yes
Reasons for receiving most recent services	9.4	SE	No
Number of visits or overnight stays	9.5	SE	No
Major depressive episode (MDE)	9.6 to 9.17		
MDE and receipt of treatment for depression, by demographic, geographic, socioeconomic, and health characteristics	9.6 to 9.8	SE	Yes
Substance use	9.9	SE	No
Prescription psychotherapeutic drug use/misuse	9.10	SE	No
Substance use disorder (SUD)	9.11 to 9.13	SE	No
Co-occurring SUD and MDE, by demographic characteristics	9.14		No
Type of professional seen	9.15	SE	No
Type of treatment received for depression, by demographic and socioeconomic characteristics	9.16	SE	Yes
Mental health care and/or substance use treatment at a specialty facility, by SUD, MDE, and selected age categories	9.17	SE	No

¹ "Yes" indicates that any estimate from the table(s) in Section 9 is also found in Section 11, but the Section 11 table(s) may not include all of the estimates.

Index of Section 10 Tables: Adult Mental Health Trends (10.1 to 10.41)

Adult Mental Health Trend Table	Table Number	Link to Corresponding Standard Error (SE) Table	Corresponding 2-Year Table(s) Available in Section 8 ¹
Multiyear trends	10.1 to 10.41		
2008-2015 mental illness	10.1 to 10.5		
Any mental illness (AMI), by demographic, geographic, and socioeconomic characteristics	10.1 and 10.2	SE	Yes
Serious mental illness (SMI), by demographic, geographic, and socioeconomic characteristics	10.3 and 10.4	SE	Yes
AMI excluding SMI, by demographic characteristics	10.5	SE	No
Mental health treatment/counseling²	10.6 to 10.29		
2002-2015 treatment, by demographic, geographic, and socioeconomic characteristics	10.6 and 10.7	SE	Yes
2008-2015 treatment with levels of mental illness, by demographic, geographic, and socioeconomic characteristics	10.8 to 10.14	SE	Yes
2008-2015 prescription medication as type of treatment, by levels of mental illness and selected age categories	10.15	SE	Yes
2002-2015 treatment with perceived unmet need, by selected age categories	10.16	SE	Yes
2008-2015 treatment with levels of mental illness and perceived unmet need, by selected age categories	10.17 and 10.18	SE	Yes
2002-2015 types of treatment, by selected age categories	10.19	SE	Yes
2008-2015 types of treatment with levels of mental illness, by selected age categories	10.20 and 10.21	SE	Yes
2002-2015 location of outpatient treatment	10.22	SE	Yes

See notes at end of table.

(continued)

Index of Section 10 Tables: Adult Mental Health Trends (10.1 to 10.41) (continued)

Adult Mental Health Table	Table Number	Link to Corresponding Standard Error (SE) Table	Corresponding 2-Year Table(s) Available in Section 8¹
2008-2015 location of outpatient treatment with levels of mental illness	10.23 and 10.24	SE	Yes
2002-2015 perceived unmet need for treatment, by demographic characteristics	10.25	SE	Yes
2008-2015 perceived unmet need for treatment, by levels of mental illness and selected age categories	10.26	SE	Yes
2002-2015 number of treatment services, by selected age categories	10.27	SE	Yes
2008-2015 number of treatment services with levels of mental illness, by selected age categories	10.28 and 10.29	SE	Yes
Major depressive episode (MDE)	10.30 to 10.32		
2005-2015 MDE, by demographic characteristics	10.30	SE	Yes
2009-2015 MDE and receipt of treatment for depression, by demographic characteristics	10.31 and 10.32	SE	Yes
Suicidal behavior	10.33 to 10.39		
2008-2015 suicidal behavior, by demographic, geographic, and socioeconomic characteristics	10.33 to 10.39	SE	Yes
Serious psychological distress (SPD)	10.40 and 10.41		
2008-2015 past month SPD, by demographic characteristics	10.40	SE	Yes
2005-2015 past year SPD, by demographic characteristics	10.41	SE	No

¹ "Yes" indicates that any estimate from the table(s) in Section 10 is also found in Section 8, but the Section 8 table(s) may not include all of the estimates.

² The term "mental health treatment/counseling" is referred to as "mental health care" and "mental health service use" in the 2015 NSDUH's first findings reports (FFRs), which are available at <http://www.samhsa.gov/data/>.

Index of Section 11 Tables: Youth Mental Health Trends (11.1 to 11.6)

Youth Mental Health Trend Table	Table Number	Link to Corresponding Standard Error (SE) Table	Corresponding 2-Year Table(s) Available in Section 9 ¹
Multiyear trends	11.1 to 11.6		
2004-2015 major depressive episode (MDE), by demographic characteristics	11.1	SE	Yes
2006-2015 MDE with severe impairment, by demographic characteristics	11.2	SE	Yes
2004-2015 receipt of treatment for depression with MDE, by demographic characteristics	11.3	SE	Yes
2004-2015 type of treatment received for depression with MDE	11.4	SE	Yes
2006-2015 receipt of treatment for depression with MDE with severe impairment, by demographic characteristics	11.5	SE	Yes
2002-2015 source of mental health services	11.6	SE	Yes

¹ "Yes" indicates that any estimate from the table(s) in Section 11 is also found in Section 9, but the Section 9 table(s) may not include all of the estimates.

Index of Section 12 Tables: Sample Size and Population Estimates (12.1 to 12.11)

Sample Size and Population Table	Table Number	Link to Corresponding Standard Error Table
Demographic characteristics	12.1 to 12.3	SE
Geographic characteristics	12.4 and 12.5	SE
Socioeconomic and health characteristics	12.6	SE
Selected age categories and gender (2002-2015)	12.7	SE
Pregnancy	12.8	SE
College enrollment	12.9	SE
Probation	12.10	SE
Parole/supervised release	12.11	SE

Reference Tools

To assist a user in locating a specific table of interest within the *Results from the 2015 National Survey on Drug Use and Health: Detailed Tables*, reference tools have been developed. Note that the following tools are provided solely for guidance when examining the 2015 detailed tables because there are no hyperlinks within these tools that lead directly to the detailed tables:

- [a key to selected variables](#);
- Key Definitions for the 2015 National Survey on Drug Use and Health (i.e., the glossary);
- [List of Tables: Prevalence Estimates and Sample Sizes - Table Types A, B, and N](#); and
- [List of Tables: Standard Errors and P Values - Table Types C, D, and P](#).

Hyperlinks that lead directly to the tables can be found under the "Tables" bookmark. How to locate a table by selecting the "Tables" bookmark is explained in the "Locating a Table" section of the introduction.

Using the Key to Selected Variables. The key to selected variables defines key topics (e.g., demographics) used throughout the 2015 detailed tables. For example, a user interested in information about the prevalence of illicit drug use by level of education can first review the key to selected variables and see that education is categorized as a demographic characteristic. Next, a user can determine, by looking at the bookmarks for the subject matter sections, that tables pertaining to illicit drug use can be found in Section 1: Illicit Drug Use Tables. By selecting this bookmark, the user will be taken to the table index for the illicit drug use tables. Now the user can scan the links to learn that data on the prevalence of illicit drug use by demographic characteristics are located in the group of tables numbered 1.28 to 1.32. Selecting the link to the left of the table numbers will take the user directly to the first table in the specified group where the user then can scroll through the tables to locate the table(s) pertaining to the prevalence of illicit drug use by level of education (Tables 1.30 to 1.32).

Using the Key Definitions for the 2015 National Survey on Drug Use and Health. The glossary defines and cross-references commonly used measures and terms in the 2015 detailed tables and the 2015 first findings reports.¹ For example, a user interested in information about the prevalence of alcohol use measures by demographic characteristics can first review the alcohol use entry in the glossary to see a cross-reference of additional selected alcohol use measures included in the tables and reports from the 2015 National Survey on Drug Use and Health. After reviewing the definitions for the various measures, the user can select measures of interest (e.g., "binge use of alcohol"). Next, a user can determine, by looking at the bookmarks for the subject matter sections, that tables pertaining to alcohol use can be found in Section 2: Tobacco Product and Alcohol Use Tables. By selecting this bookmark, the user will be taken to

¹ The glossary is available online as Section D of the following report: Center for Behavioral Health Statistics and Quality. (2016). *2015 National Survey on Drug Use and Health: Methodological summary and definitions*. Retrieved from <http://www.samhsa.gov/data/>

the table index for tobacco product and alcohol use tables. Now the user can scan the links to learn that data on the prevalence of alcohol use by demographics are located in the group of tables numbered 2.41 to 2.50. Selecting the link to the left of the table numbers will take the user directly to the first table in the specified group where the user can scroll through the tables to locate the table(s) pertaining to the prevalence of "binge use of alcohol" by demographic characteristics (Tables 2.46 to 2.50).

Using the List of Tables. The list of tables for both prevalence estimates and sample sizes (table types A, B, and N) and standard errors and p values (table types C, D, and P) can be used to identify a specific table for one of the subject matter sections. For example, a user interested in information about the prevalence of past month illicit drug use among youths aged 12 or 13 can review the list of tables in Section 1: Illicit Drug Use Tables and identify Table 1.3B as the table of interest.

Key to Selected Variables

The following key defines selected variables (e.g., demographics) used throughout the *Results from the 2015 National Survey on Drug Use and Health: Detailed Tables*. This may be helpful when used in conjunction with the index of tables in identifying tables that contain information for these selected characteristics. However, not all variables listed below are specifically mentioned in the index of tables.¹

Demographic Characteristics

Standard Age Categories: 12 or Older, 12-17, 18 or Older, 18-25, 26 or Older, 26-49, 50 or Older

Detailed Age Categories: 12 or Older, 12-17, 12-13, 12, 13, 14-15, 14, 15, 16-17, 16, 17, 18 or Older, 18-25, 18-20, 18, 19, 20, 21-25, 21, 22, 23, 24, 25, 26 or Older, 26-34, 26-29, 30-34, 35 or Older, 35-39, 40-44, 45-49, 50-54, 55-59, 60-64, 65 or Older

Underage/Legal Drinking Age Categories: 12-20, 21 or Older

Driving Under the Influence Age Categories: 16 or Older, 16-20, 16-25

Gender: Male, Female

Hispanic Origin and Race: Not Hispanic or Latino White, Not Hispanic or Latino Black or African American, Not Hispanic or Latino American Indian or Alaska Native, Not Hispanic or Latino Native Hawaiian or Other Pacific Islander, Not Hispanic or Latino Asian, Not Hispanic or Latino Two or More Races, Hispanic or Latino, Not Hispanic or Latino

Gender/Race/Hispanic Origin: Male White Not Hispanic, Female White Not Hispanic, Male Black Not Hispanic, Female Black Not Hispanic, Male Hispanic, Female Hispanic

Education: Less Than High School, High School Graduate, Some College/Associate's Degree, College Graduate (Note: This variable is defined for persons aged 18 or older.)

Current Employment: Full-Time, Part-Time, Unemployed, Other
(Note: This variable is defined for persons aged 18 or older.)

Family Income: Less Than \$20,000; \$20,000-\$49,999; \$50,000-\$74,999; \$75,000 or More

¹ Definitions for many of the measures and terms used in the detailed tables and reports from the 2015 National Survey on Drug Use and Health (NSDUH) are available online in Section D of the following report: Center for Behavioral Health Statistics and Quality. (2016). *2015 National Survey on Drug Use and Health: Methodological summary and definitions*. Retrieved from <http://www.samhsa.gov/data/>

Geographic Characteristics

Region: Northeast, Midwest, South, West

Division: New England, Middle Atlantic, East North Central, West North Central, South Atlantic, East South Central, West South Central, Mountain, Pacific

County Type:² Large Metro counties; Small Metro counties, including counties with a population of 250,000 up to 1 million and counties with a population of less than 250,000; Nonmetro, including urbanized counties, less urbanized counties, or completely rural counties

Socioeconomic and Health Characteristics

Poverty Level: Three categories for poverty level are defined relative to the poverty threshold: less than 100 percent, 100 to 199 percent, 200 percent or more

Health Insurance: Private, Medicaid/CHIP (Children's Health Insurance Program), Other, No Coverage

Overall Health: Excellent, Very Good, Good, Fair/Poor

² The county type measures used in the 2015 detailed tables were defined using the 2013 Rural-Urban Continuum Codes, which differ from the Rural-Urban Continuum Codes that were used to define county type in previous NSDUHs due to the use of different census data and changes to the statistical area definition. Therefore, the county type estimates presented in the 2015 detailed table are not comparable with county type estimates presented in prior detailed tables. More details about county type are available online in Section B.4.5 of the following report: Center for Behavioral Health Statistics and Quality. (2016). *2015 National Survey on Drug Use and Health: Methodological summary and definitions*. Retrieved from <http://www.samhsa.gov/data/>

LIST OF TABLES

Table

- 1.1A Types of Illicit Drug Use in Lifetime, Past Year, and Past Month among Persons Aged 12 or Older: Numbers in Thousands, 2014 and 2015
- 1.1B Types of Illicit Drug Use in Lifetime, Past Year, and Past Month among Persons Aged 12 or Older: Percentages, 2014 and 2015
- 1.2A Types of Illicit Drug Use in Lifetime, Past Year, and Past Month among Persons Aged 12 to 17: Numbers in Thousands, 2014 and 2015
- 1.2B Types of Illicit Drug Use in Lifetime, Past Year, and Past Month among Persons Aged 12 to 17: Percentages, 2014 and 2015
- 1.3A Types of Illicit Drug Use in Lifetime, Past Year, and Past Month among Persons Aged 12 or 13: Numbers in Thousands, 2014 and 2015
- 1.3B Types of Illicit Drug Use in Lifetime, Past Year, and Past Month among Persons Aged 12 or 13: Percentages, 2014 and 2015
- 1.4A Types of Illicit Drug Use in Lifetime, Past Year, and Past Month among Persons Aged 14 or 15: Numbers in Thousands, 2014 and 2015
- 1.4B Types of Illicit Drug Use in Lifetime, Past Year, and Past Month among Persons Aged 14 or 15: Percentages, 2014 and 2015
- 1.5A Types of Illicit Drug Use in Lifetime, Past Year, and Past Month among Persons Aged 16 or 17: Numbers in Thousands, 2014 and 2015
- 1.5B Types of Illicit Drug Use in Lifetime, Past Year, and Past Month among Persons Aged 16 or 17: Percentages, 2014 and 2015
- 1.6A Types of Illicit Drug Use in Lifetime, Past Year, and Past Month among Persons Aged 18 or Older: Numbers in Thousands, 2014 and 2015
- 1.6B Types of Illicit Drug Use in Lifetime, Past Year, and Past Month among Persons Aged 18 or Older: Percentages, 2014 and 2015
- 1.7A Types of Illicit Drug Use in Lifetime, Past Year, and Past Month among Persons Aged 18 to 25: Numbers in Thousands, 2014 and 2015
- 1.7B Types of Illicit Drug Use in Lifetime, Past Year, and Past Month among Persons Aged 18 to 25: Percentages, 2014 and 2015
- 1.8A Types of Illicit Drug Use in Lifetime, Past Year, and Past Month among Persons Aged 18 to 20: Numbers in Thousands, 2014 and 2015
- 1.8B Types of Illicit Drug Use in Lifetime, Past Year, and Past Month among Persons Aged 18 to 20: Percentages, 2014 and 2015
- 1.9A Types of Illicit Drug Use in Lifetime, Past Year, and Past Month among Persons Aged 21 to 25: Numbers in Thousands, 2014 and 2015
- 1.9B Types of Illicit Drug Use in Lifetime, Past Year, and Past Month among Persons Aged 21 to 25: Percentages, 2014 and 2015
- 1.10A Types of Illicit Drug Use in Lifetime, Past Year, and Past Month among Persons Aged 26 or Older: Numbers in Thousands, 2014 and 2015
- 1.10B Types of Illicit Drug Use in Lifetime, Past Year, and Past Month among Persons Aged 26 or Older: Percentages, 2014 and 2015
- 1.11A Types of Illicit Drug Use in Lifetime, Past Year, and Past Month among Persons Aged 26 to 34: Numbers in Thousands, 2014 and 2015
- 1.11B Types of Illicit Drug Use in Lifetime, Past Year, and Past Month among Persons Aged 26 to 34: Percentages, 2014 and 2015
- 1.12A Types of Illicit Drug Use in Lifetime, Past Year, and Past Month among Persons Aged 35 or Older: Numbers in Thousands, 2014 and 2015
- 1.12B Types of Illicit Drug Use in Lifetime, Past Year, and Past Month among Persons Aged 35 or Older: Percentages, 2014 and 2015

LIST OF TABLES (Continued)

Table

- 1.13A Types of Illicit Drug Use in Lifetime, Past Year, and Past Month among Males Aged 12 or Older: Numbers in Thousands, 2014 and 2015
- 1.13B Types of Illicit Drug Use in Lifetime, Past Year, and Past Month among Males Aged 12 or Older: Percentages, 2014 and 2015
- 1.14A Types of Illicit Drug Use in Lifetime, Past Year, and Past Month among Females Aged 12 or Older: Numbers in Thousands, 2014 and 2015
- 1.14B Types of Illicit Drug Use in Lifetime, Past Year, and Past Month among Females Aged 12 or Older: Percentages, 2014 and 2015
- 1.15A Illicit Drug Use in Lifetime, Past Year, and Past Month, by Detailed Age Category: Numbers in Thousands, 2014 and 2015
- 1.15B Illicit Drug Use in Lifetime, Past Year, and Past Month, by Detailed Age Category: Percentages, 2014 and 2015
- 1.16A Marijuana Use in Lifetime, Past Year, and Past Month, by Detailed Age Category: Numbers in Thousands, 2014 and 2015
- 1.16B Marijuana Use in Lifetime, Past Year, and Past Month, by Detailed Age Category: Percentages, 2014 and 2015
- 1.17A Cocaine Use in Lifetime, Past Year, and Past Month, by Detailed Age Category: Numbers in Thousands, 2014 and 2015
- 1.17B Cocaine Use in Lifetime, Past Year, and Past Month, by Detailed Age Category: Percentages, 2014 and 2015
- 1.18A Crack Use in Lifetime, Past Year, and Past Month, by Detailed Age Category: Numbers in Thousands, 2014 and 2015
- 1.18B Crack Use in Lifetime, Past Year, and Past Month, by Detailed Age Category: Percentages, 2014 and 2015
- 1.19A Hallucinogen Use in Lifetime, Past Year, and Past Month, by Detailed Age Category: Numbers in Thousands, 2014 and 2015
- 1.19B Hallucinogen Use in Lifetime, Past Year, and Past Month, by Detailed Age Category: Percentages, 2014 and 2015
- 1.20A Inhalant Use in Lifetime, Past Year, and Past Month, by Detailed Age Category: Numbers in Thousands, 2014 and 2015
- 1.20B Inhalant Use in Lifetime, Past Year, and Past Month, by Detailed Age Category: Percentages, 2014 and 2015
- 1.21A Methamphetamine Use in Lifetime, Past Year, and Past Month, by Detailed Age Category: Numbers in Thousands, 2014 and 2015
- 1.21B Methamphetamine Use in Lifetime, Past Year, and Past Month, by Detailed Age Category: Percentages, 2014 and 2015
- 1.22A Any Use of Prescription Psychotherapeutics in Past Year and Misuse of Prescription Psychotherapeutics in Past Year and Past Month, by Detailed Age Category: Numbers in Thousands, 2014 and 2015
- 1.22B Any Use of Prescription Psychotherapeutics in Past Year and Misuse of Prescription Psychotherapeutics in Past Year and Past Month, by Detailed Age Category: Percentages, 2014 and 2015
- 1.23A Any Use of Pain Relievers in Past Year and Misuse of Pain Relievers in Past Year and Past Month, by Detailed Age Category: Numbers in Thousands, 2014 and 2015
- 1.23B Any Use of Pain Relievers in Past Year and Misuse of Pain Relievers in Past Year and Past Month, by Detailed Age Category: Percentages, 2014 and 2015
- 1.24A Any Use of Tranquilizers in Past Year and Misuse of Tranquilizers in Past Year and Past Month, by Detailed Age Category: Numbers in Thousands, 2014 and 2015
- 1.24B Any Use of Tranquilizers in Past Year and Misuse of Tranquilizers in Past Year and Past Month, by Detailed Age Category: Percentages, 2014 and 2015

LIST OF TABLES (Continued)

Table

- 1.25A Any Use of Stimulants in Past Year and Misuse of Stimulants in Past Year and Past Month, by Detailed Age Category: Numbers in Thousands, 2014 and 2015
- 1.25B Any Use of Stimulants in Past Year and Misuse of Stimulants in Past Year and Past Month, by Detailed Age Category: Percentages, 2014 and 2015
- 1.26A Any Use of Sedatives in Past Year and Misuse of Sedatives in Past Year and Past Month, by Detailed Age Category: Numbers in Thousands, 2014 and 2015
- 1.26B Any Use of Sedatives in Past Year and Misuse of Sedatives in Past Year and Past Month, by Detailed Age Category: Percentages, 2014 and 2015
- 1.27A Any Use and Misuse of Prescription Psychotherapeutics in Past Year among Persons Aged 12 or Older and Misuse of Prescription Psychotherapeutics in Past Year among Past Year Any Users Aged 12 or Older, by Age Group: Numbers in Thousands, 2014 and 2015
- 1.27B Any Use and Misuse of Prescription Psychotherapeutics in Past Year among Persons Aged 12 or Older and Misuse of Prescription Psychotherapeutics in Past Year among Past Year Any Users Aged 12 or Older, by Age Group: Percentages, 2014 and 2015
- 1.28A Illicit Drug Use in Lifetime, Past Year, and Past Month among Persons Aged 12 or Older, by Demographic Characteristics: Numbers in Thousands, 2014 and 2015
- 1.28B Illicit Drug Use in Lifetime, Past Year, and Past Month among Persons Aged 12 or Older, by Demographic Characteristics: Percentages, 2014 and 2015
- 1.29A Illicit Drug Use in Lifetime, Past Year, and Past Month among Persons Aged 12 to 17, by Demographic Characteristics: Numbers in Thousands, 2014 and 2015
- 1.29B Illicit Drug Use in Lifetime, Past Year, and Past Month among Persons Aged 12 to 17, by Demographic Characteristics: Percentages, 2014 and 2015
- 1.30A Illicit Drug Use in Lifetime, Past Year, and Past Month among Persons Aged 18 or Older, by Demographic Characteristics: Numbers in Thousands, 2014 and 2015
- 1.30B Illicit Drug Use in Lifetime, Past Year, and Past Month among Persons Aged 18 or Older, by Demographic Characteristics: Percentages, 2014 and 2015
- 1.31A Illicit Drug Use in Lifetime, Past Year, and Past Month among Persons Aged 18 to 25, by Demographic Characteristics: Numbers in Thousands, 2014 and 2015
- 1.31B Illicit Drug Use in Lifetime, Past Year, and Past Month among Persons Aged 18 to 25, by Demographic Characteristics: Percentages, 2014 and 2015
- 1.32A Illicit Drug Use in Lifetime, Past Year, and Past Month among Persons Aged 26 or Older, by Demographic Characteristics: Numbers in Thousands, 2014 and 2015
- 1.32B Illicit Drug Use in Lifetime, Past Year, and Past Month among Persons Aged 26 or Older, by Demographic Characteristics: Percentages, 2014 and 2015
- 1.33A Marijuana Use in Lifetime, Past Year, and Past Month among Persons Aged 12 or Older, by Demographic Characteristics: Numbers in Thousands, 2014 and 2015
- 1.33B Marijuana Use in Lifetime, Past Year, and Past Month among Persons Aged 12 or Older, by Demographic Characteristics: Percentages, 2014 and 2015
- 1.34A Marijuana Use in Lifetime, Past Year, and Past Month among Persons Aged 12 to 17, by Demographic Characteristics: Numbers in Thousands, 2014 and 2015
- 1.34B Marijuana Use in Lifetime, Past Year, and Past Month among Persons Aged 12 to 17, by Demographic Characteristics: Percentages, 2014 and 2015
- 1.35A Marijuana Use in Lifetime, Past Year, and Past Month among Persons Aged 18 or Older, by Demographic Characteristics: Numbers in Thousands, 2014 and 2015
- 1.35B Marijuana Use in Lifetime, Past Year, and Past Month among Persons Aged 18 or Older, by Demographic Characteristics: Percentages, 2014 and 2015
- 1.36A Marijuana Use in Lifetime, Past Year, and Past Month among Persons Aged 18 to 25 Demographic Characteristics: Numbers in Thousands, 2014 and 2015
- 1.36B Marijuana Use in Lifetime, Past Year, and Past Month among Persons Aged 18 to 25, by Demographic Characteristics: Percentages, 2014 and 2015

LIST OF TABLES (Continued)

Table

- 1.37A Marijuana Use in Lifetime, Past Year, and Past Month among Persons Aged 26 or Older, by Demographic Characteristics: Numbers in Thousands, 2014 and 2015
- 1.37B Marijuana Use in Lifetime, Past Year, and Past Month among Persons Aged 26 or Older, by Demographic Characteristics: Percentages, 2014 and 2015
- 1.38A Cocaine Use in Lifetime, Past Year, and Past Month among Persons Aged 12 or Older, by Demographic Characteristics: Numbers in Thousands, 2014 and 2015
- 1.38B Cocaine Use in Lifetime, Past Year, and Past Month among Persons Aged 12 or Older, by Demographic Characteristics: Percentages, 2014 and 2015
- 1.39A Cocaine Use in Lifetime, Past Year, and Past Month among Persons Aged 12 to 17, by Demographic Characteristics: Numbers in Thousands, 2014 and 2015
- 1.39B Cocaine Use in Lifetime, Past Year, and Past Month among Persons Aged 12 to 17, by Demographic Characteristics: Percentages, 2014 and 2015
- 1.40A Cocaine Use in Lifetime, Past Year, and Past Month among Persons Aged 18 or Older, by Demographic Characteristics: Numbers in Thousands, 2014 and 2015
- 1.40B Cocaine Use in Lifetime, Past Year, and Past Month among Persons Aged 18 or Older, by Demographic Characteristics: Percentages, 2014 and 2015
- 1.41A Cocaine Use in Lifetime, Past Year, and Past Month among Persons Aged 18 to 25, by Demographic Characteristics: Numbers in Thousands, 2014 and 2015

2.79B	Alcohol Use, Binge Alcohol Use, and Heavy Alcohol Use in Past Month among Persons Aged 18 to 25, by Geographic Characteristics: Percentages, 2014 and 2015
2.80A	Alcohol Use, Binge Alcohol Use, and Heavy Alcohol Use in Past Month among Persons Aged 26 or Older, by Geographic Characteristics: Numbers in Thousands, 2014 and 2015
2.80B	Alcohol Use, Binge Alcohol Use, and Heavy Alcohol Use in Past Month among Persons Aged 26 or Older, by Geographic Characteristics: Percentages, 2014 and 2015
2.81A	Alcohol Use in Lifetime, Past Year, and Past Month among Persons Aged 12 to 20, by Demographic Characteristics: Numbers in Thousands, 2014 and 2015
2.81B	Alcohol Use in Lifetime, Past Year, and Past Month among Persons Aged 12 to 20, by Demographic Characteristics: Percentages, 2014 and 2015
2.82A	Alcohol Use in Lifetime, Past Year, and Past Month among Persons Aged 21 or Older, by Demographic Characteristics: Numbers in Thousands, 2014 and 2015
2.82B	Alcohol Use in Lifetime, Past Year, and Past Month among Persons Aged 21 or Older, by Demographic Characteristics: Percentages, 2014 and 2015
2.83A	Alcohol Use, Binge Alcohol Use, and Heavy Alcohol Use in Past Month among Persons Aged 12 to 20, by Demographic Characteristics: Numbers in Thousands, 2014 and 2015
2.83B	Alcohol Use, Binge Alcohol Use, and Heavy Alcohol Use in Past Month among Persons Aged 12 to 20, by Demographic Characteristics: Percentages, 2014 and 2015

LIST OF TABLES (Continued)

Table

- 2.84A Alcohol Use, Binge Alcohol Use, and Heavy Alcohol Use in Past Month among Persons Aged 21 or Older, by Demographic Characteristics: Numbers in Thousands, 2014 and 2015
- 2.84B Alcohol Use, Binge Alcohol Use, and Heavy Alcohol Use in Past Month among Persons Aged 21 or Older, by Demographic Characteristics: Percentages, 2014 and 2015
- 2.85A Alcohol Use in Lifetime, Past Year, and Past Month among Persons Aged 12 to 20, by Geographic Characteristics: Numbers in Thousands, 2014 and 2015
- 2.85B Alcohol Use in Lifetime, Past Year, and Past Month among Persons Aged 12 to 20, by Geographic Characteristics: Percentages, 2014 and 2015
- 2.86A Alcohol Use in Lifetime, Past Year, and Past Month among Persons Aged 21 or Older, by Geographic Characteristics: Numbers in Thousands, 2014 and 2015
- 2.86B Alcohol Use in Lifetime, Past Year, and Past Month among Persons Aged 21 or Older, by Geographic Characteristics: Percentages, 2014 and 2015
- 2.87A Alcohol Use, Binge Alcohol Use, and Heavy Alcohol Use in Past Month among Persons Aged 12 to 20, by Geographic Characteristics: Numbers in Thousands, 2014 and 2015
- 2.87B Alcohol Use, Binge Alcohol Use, and Heavy Alcohol Use in Past Month among Persons Aged 12 to 20, by Geographic Characteristics: Percentages, 2014 and 2015
- 2.88A Alcohol Use, Binge Alcohol Use, and Heavy Alcohol Use in Past Month among Persons Aged 21 or Older, by Geographic Characteristics: Numbers in Thousands, 2014 and 2015
- 2.88B Alcohol Use, Binge Alcohol Use, and Heavy Alcohol Use in Past Month among Persons Aged 21 or Older, by Geographic Characteristics: Percentages, 2014 and 2015
- 3.1A Perceived Great Risk of Harm Associated with Substance Use and Perceived Availability of Substances, by Age Group: Numbers in Thousands, 2014 and 2015
- 3.1B Perceived Great Risk of Harm Associated with Substance Use and Perceived Availability of Substances, by Age Group: Percentages, 2014 and 2015
- 3.2A Perceived Great Risk of Harm Associated with Substance Use and Perceived Availability of Substances among Past Year Initiates of Specific Substances, by Age Group: Numbers in Thousands, 2014 and 2015
- 3.2B Perceived Great Risk of Harm Associated with Substance Use and Perceived Availability of Substances among Past Year Initiates of Specific Substances, by Age Group: Percentages, 2014 and 2015
- 3.3A Perceived Great Risk of Harm Associated with Substance Use and Perceived Availability of Substances among Persons Aged 12 or Older, by Specific Substance Use Initiation Status: Numbers in Thousands, 2014 and 2015
- 3.3B Perceived Great Risk of Harm Associated with Substance Use and Perceived Availability of Substances among Persons Aged 12 or Older, by Specific Substance Use Initiation Status: Percentages, 2014 and 2015
- 3.4A Perceived Great Risk of Harm Associated with Cigarette and Alcohol Use among Persons Aged 12 to 17, by Demographic and Geographic Characteristics: Numbers in Thousands, 2014 and 2015
- 3.4B Perceived Great Risk of Harm Associated with Cigarette and Alcohol Use among Persons Aged 12 to 17, by Demographic and Geographic Characteristics: Percentages, 2014 and 2015
- 3.5A Perceived Great Risk of Harm Associated with Cigarette and Alcohol Use among Persons Aged 12 to 20, by Demographic and Geographic Characteristics: Numbers in Thousands, 2014 and 2015
- 3.5B Perceived Great Risk of Harm Associated with Cigarette and Alcohol Use among Persons Aged 12 to 20, by Demographic and Geographic Characteristics: Percentages, 2014 and 2015
- 3.6A Perceived Great Risk of Harm Associated with Marijuana and Cocaine Use among Persons Aged 12 to 17, by Demographic and Geographic Characteristics: Numbers in Thousands, 2014 and 2015
- 3.6B Perceived Great Risk of Harm Associated with Marijuana and Cocaine Use among Persons Aged 12 to 17, by Demographic and Geographic Characteristics: Percentages, 2014 and 2015
- 3.7A Perceived Great Risk of Harm Associated with Heroin and LSD Use among Persons Aged 12 to 17, by Demographic and Geographic Characteristics: Numbers in Thousands, 2014 and 2015
- 3.7B Perceived Great Risk of Harm Associated with Heroin and LSD Use among Persons Aged 12 to 17, by Demographic and Geographic Characteristics: Percentages, 2014 and 2015

LIST OF TABLES (Continued)

Table

- 3.8A Perceived That Obtaining Specific Illicit Drugs Would Be Fairly or Very Easy among Persons Aged 12 to 17, by Demographic and Geographic Characteristics: Numbers in Thousands, 2014 and 2015
- 3.8B Perceived That Obtaining Specific Illicit Drugs Would Be Fairly or Very Easy among Persons Aged 12 to 17, by Demographic and Geographic Characteristics: Percentages, 2014 and 2015
- 3.9A Youths Felt That Parents Would Strongly Disapprove of Youth's Substance Use Behaviors among Persons Aged 12 to 17, by Demographic and Geographic Characteristics: Numbers in Thousands, 2014 and 2015
- 3.9B Youths Felt That Parents Would Strongly Disapprove of Youth's Substance Use Behaviors among Persons Aged 12 to 17, by Demographic and Geographic Characteristics: Percentages, 2014 and 2015
- 3.10A Youths Felt That Close Friends Would Strongly Disapprove or Somewhat Disapprove of Youth's Substance Use Behaviors among Persons Aged 12 to 17, by Demographic and Geographic Characteristics: Numbers in Thousands, 2014 and 2015
- 3.10B Youths Felt That Close Friends Would Strongly Disapprove or Somewhat Disapprove of Youth's Substance Use Behaviors among Persons Aged 12 to 17, by Demographic and Geographic Characteristics: Percentages, 2014 and 2015
- 3.11A Youths Strongly Disapproved or Somewhat Disapproved of Peers' Substance Use Behaviors among Persons Aged 12 to 17, by Demographic and Geographic Characteristics: Numbers in Thousands, 2014 and 2015
- 3.11B Youths Strongly Disapproved or Somewhat Disapproved of Peers' Substance Use Behaviors among Persons Aged 12 to 17, by Demographic and Geographic Characteristics: Percentages, 2014 and 2015
- 3.12A Participated in a Prevention Program or Group in Past Year among Persons Aged 12 to 17, by Demographic and Geographic Characteristics: Numbers in Thousands, 2014 and 2015
- 3.12B Participated in a Prevention Program or Group in Past Year among Persons Aged 12 to 17, by Demographic and Geographic Characteristics: Percentages, 2014 and 2015
- 3.13A Participated in a Substance Use Program or Exposed to Substance Use Prevention Message in Past Year among Persons Aged 12 to 17, by Demographic and Geographic Characteristics: Numbers in Thousands, 2014 and 2015
- 3.13B Participated in a Substance Use Program or Exposed to Substance Use Prevention Message in Past Year among Persons Aged 12 to 17, by Demographic and Geographic Characteristics: Percentages, 2014 and 2015
- 3.14A Participated in a Physical Delinquent Behavior in Past Year among Persons Aged 12 to 17, by Demographic and Geographic Characteristics: Numbers in Thousands, 2014 and 2015
- 3.14B Participated in a Physical Delinquent Behavior in Past Year among Persons Aged 12 to 17, by Demographic and Geographic Characteristics: Percentages, 2014 and 2015
- 3.15A Participated in a Nonphysical Delinquent Behavior in Past Year among Persons Aged 12 to 17, by Demographic and Geographic Characteristics: Numbers in Thousands, 2014 and 2015
- 3.15B Participated in a Nonphysical Delinquent Behavior in Past Year among Persons Aged 12 to 17, by Demographic and Geographic Characteristics: Percentages, 2014 and 2015
- 3.16A Selected Risk and Protective Factors among Persons Aged 12 to 17, by Demographic and Geographic Characteristics: Numbers in Thousands, 2014 and 2015
- 3.16B Selected Risk and Protective Factors among Persons Aged 12 to 17, by Demographic and Geographic Characteristics: Percentages, 2014 and 2015
- 3.17A Youths Agreed or Strongly Agreed with Statements about Religious Beliefs among Persons Aged 12 to 17, by Demographic and Geographic Characteristics: Numbers in Thousands, 2014 and 2015
- 3.17B Youths Agreed or Strongly Agreed with Statements about Religious Beliefs among Persons Aged 12 to 17, by Demographic and Geographic Characteristics: Percentages, 2014 and 2015
- 3.18A Parents Always or Sometimes Took Part in Specific Behaviors in Past Year among Persons Aged 12 to 17, by Demographic and Geographic Characteristics: Numbers in Thousands, 2014 and 2015
- 3.18B Parents Always or Sometimes Took Part in Specific Behaviors in Past Year among Persons Aged 12 to 17, by Demographic and Geographic Characteristics: Percentages, 2014 and 2015

LIST OF TABLES (Continued)

Table

- 3.19A Measures of Student Characteristics in Past Year among Persons Aged 12 to 17 Who Were Enrolled in School in Past Year, by Demographic and Geographic Characteristics: Numbers in Thousands, 2014 and 2015
- 3.19B Measures of Student Characteristics in Past Year among Persons Aged 12 to 17 Who Were Enrolled in School in Past Year, by Demographic and Geographic Characteristics: Percentages, 2014 and 2015
- 3.20A Adults Always or Sometimes Took Part in Specific School-Related Behaviors in Past Year among Persons Aged 12 to 17 Who Were Enrolled in School in Past Year, by Demographic and Geographic Characteristics: Numbers in Thousands, 2014 and 2015
- 3.20B Adults Always or Sometimes Took Part in Specific School-Related Behaviors in Past Year among Persons Aged 12 to 17 Who Were Enrolled in School in Past Year, by Demographic and Geographic Characteristics: Percentages, 2014 and 2015
- 3.21A Youths Perceived That All or Most Students in Grade Level Use Specific Substances among Persons Aged 12 to 17 Who Were Enrolled in School in Past Year, by Demographic and Geographic Characteristics: Numbers in Thousands, 2014 and 2015
- 3.21B Youths Perceived That All or Most Students in Grade Level Use Specific Substances among Persons Aged 12 to 17 Who Were Enrolled in School in Past Year, by Demographic and Geographic Characteristics: Percentages, 2014 and 2015
- 3.22A Past Month Use of Selected Substances among Persons Aged 12 to 17, by Perceived Risk of Harm Associated with Substance Use Behaviors: Numbers in Thousands, 2015
- 3.22B Past Month Use of Selected Substances among Persons Aged 12 to 17, by Perceived Risk of Harm Associated with Substance Use Behaviors: Percentages, 2015
- 3.23A Past Month Use of Selected Substances among Persons Aged 12 to 17, by Perceived Availability of Selected Illicit Drugs: Numbers in Thousands, 2015
- 3.23B Past Month Use of Selected Substances among Persons Aged 12 to 17, by Perceived Availability of Selected Illicit Drugs: Percentages, 2015
- 3.24A Perceived Availability of Selected Illicit Drugs among Persons Aged 12 or Older, by Past Year Substance Use Status: Numbers in Thousands, 2015
- 3.24B Perceived Availability of Selected Illicit Drugs among Persons Aged 12 or Older, by Past Year Substance Use Status: Percentages, 2015
- 3.25A Perceived Availability of Selected Illicit Drugs among Persons Aged 12 to 17, by Past Year Substance Use Status: Numbers in Thousands, 2015
- 3.25B Perceived Availability of Selected Illicit Drugs among Persons Aged 12 to 17, by Past Year Substance Use Status: Percentages, 2015
- 3.26A Perceived Availability of Selected Illicit Drugs among Persons Aged 18 or Older, by Past Year Substance Use Status: Numbers in Thousands, 2015
- 3.26B Perceived Availability of Selected Illicit Drugs among Persons Aged 18 or Older, by Past Year Substance Use Status: Percentages, 2015
- 3.27A Perceived Availability of Selected Illicit Drugs among Persons Aged 18 to 25, by Past Year Substance Use Status: Numbers in Thousands, 2015
- 3.27B Perceived Availability of Selected Illicit Drugs among Persons Aged 18 to 25, by Past Year Substance Use Status: Percentages, 2015
- 3.28A Perceived Availability of Selected Illicit Drugs among Persons Aged 26 or Older, by Past Year Substance Use Status: Numbers in Thousands, 2015
- 3.28B Perceived Availability of Selected Illicit Drugs among Persons Aged 26 or Older, by Past Year Substance Use Status: Percentages, 2015
- 3.29A Perceived Availability of Selected Illicit Drugs among Persons Aged 12 or Older, by Past Month Substance Use Status: Numbers in Thousands, 2015
- 3.29B Perceived Availability of Selected Illicit Drugs among Persons Aged 12 or Older, by Past Month Substance Use Status: Percentages, 2015

LIST OF TABLES (Continued)

Table

- 3.30A Perceived Availability of Selected Illicit Drugs among Persons Aged 12 to 17, by Past Month Substance Use Status: Numbers in Thousands, 2015
- 3.30B Perceived Availability of Selected Illicit Drugs among Persons Aged 12 to 17, by Past Month Substance Use Status: Percentages, 2015
- 3.31A Perceived Availability of Selected Illicit Drugs among Persons Aged 18 or Older, by Past Month Substance Use Status: Numbers in Thousands, 2015
- 3.31B Perceived Availability of Selected Illicit Drugs among Persons Aged 18 or Older, by Past Month Substance Use Status: Percentages, 2015
- 3.32A Perceived Availability of Selected Illicit Drugs among Persons Aged 18 to 25, by Past Month Substance Use Status: Numbers in Thousands, 2015
- 3.32B Perceived Availability of Selected Illicit Drugs among Persons Aged 18 to 25, by Past Month Substance Use Status: Percentages, 2015
- 3.33A Perceived Availability of Selected Illicit Drugs among Persons Aged 26 or Older, by Past Month Substance Use Status: Numbers in Thousands, 2015
- 3.33B Perceived Availability of Selected Illicit Drugs among Persons Aged 26 or Older, by Past Month Substance Use Status: Percentages, 2015
- 3.34A Past Month Use of Selected Substances among Persons Aged 12 to 17, by Youth's Perceptions of Parents' Feelings about Substance Use Behaviors: Numbers in Thousands, 2015
- 3.34B Past Month Use of Selected Substances among Persons Aged 12 to 17, by Youth's Perceptions of Parents' Feelings about Substance Use Behaviors: Percentages, 2015
- 3.35A Past Month Use of Selected Substances among Persons Aged 12 to 17, by Youth's Perceptions of Close Friends' Feelings and Youth's Feelings about Peers' Substance Use Behaviors: Numbers in Thousands, 2015
- 3.35B Past Month Use of Selected Substances among Persons Aged 12 to 17, by Youth's Perceptions of Close Friends' Feelings and Youth's Feelings about Peers' Substance Use Behaviors: Percentages, 2015
- 3.36A Past Month Use of Selected Substances among Persons Aged 12 to 17, by Measures of Youth's Participation in Prevention or Substance Use Programs and Exposure to Substance Use Prevention Messages and Youth's Delinquency in Past Year: Numbers in Thousands, 2015
- 3.36B Past Month Use of Selected Substances among Persons Aged 12 to 17, by Measures of Youth's Participation in Prevention or Substance Use Programs and Exposure to Substance Use Prevention Messages and Youth's Delinquency in Past Year: Percentages, 2015
- 3.37A Past Month Use of Selected Substances among Persons Aged 12 to 17, by Measures of Risk and Protective Factors, Religious Beliefs, and Past Year Parental Involvement: Numbers in Thousands, 2015
- 3.37B Past Month Use of Selected Substances among Persons Aged 12 to 17, by Measures of Risk and Protective Factors, Religious Beliefs, and Past Year Parental Involvement: Percentages, 2015
- 3.38A Past Month Use of Selected Substances among Persons Aged 12 to 17 Who Were Enrolled in School in Past Year, by Measures of Scholastic Environment: Numbers in Thousands, 2015
- 3.38B Past Month Use of Selected Substances among Persons Aged 12 to 17 Who Were Enrolled in School in Past Year, by Measures of Scholastic Environment: Percentages, 2015
- 4.1B Past Year Initiation of Marijuana Use among Persons Aged 12 or Older, Persons Aged 12 or Older At Risk for Initiation of Marijuana Use, and Past Year Marijuana Users Aged 12 or Older, by Demographic Characteristics: Numbers in Thousands and Percentages, 2014 and 2015
- 4.2B Past Year Initiation of Pain Reliever Misuse among Persons Aged 12 or Older and Past Year Pain Reliever Misusers Aged 12 or Older, by Demographic Characteristics: Numbers in Thousands and Percentages, 2014 and 2015
- 4.3B Past Year Initiation of Tranquilizer Misuse among Persons Aged 12 or Older and Past Year Tranquilizer Misusers Aged 12 or Older, by Demographic Characteristics: Numbers in Thousands and Percentages, 2014 and 2015

LIST OF TABLES (Continued)

Table

- 4.4B Past Year Initiation of Stimulant Misuse among Persons Aged 12 or Older and Past Year Stimulant Misusers Aged 12 or Older, by Demographic Characteristics: Numbers in Thousands and Percentages, 2014 and 2015
- 4.5B Past Year Initiation of Sedative Misuse among Persons Aged 12 or Older and Past Year Sedative Misusers Aged 12 or Older, by Demographic Characteristics: Numbers in Thousands and Percentages, 2014 and 2015
- 4.6B Past Year Initiation of Cigarette Use among Persons Aged 12 or Older, Persons Aged 12 or Older At Risk for Initiation of Cigarette Use, and Past Year Cigarette Users Aged 12 or Older, by Demographic Characteristics: Numbers in Thousands and Percentages, 2014 and 2015
- 4.7B Past Year Initiation of Alcohol Use among Persons Aged 12 or Older, Persons Aged 12 or Older At Risk for Initiation of Alcohol Use, and Past Year Alcohol Users Aged 12 or Older, by Demographic Characteristics: Numbers in Thousands and Percentages, 2014 and 2015
- 4.8B Past Year Initiation of Substance Use among Persons Aged 12 or Older, Persons Aged 12 or Older At Risk for Initiation of Substance Use, and Past Year Substance Users Aged 12 or Older: Numbers in Thousands and Percentages, 2014 and 2015
- 4.9B Past Year Initiation of Substance Use among Persons Aged 12 to 17, Persons Aged 12 to 17 At Risk for Initiation of Substance Use, and Past Year Substance Users Aged 12 to 17: Numbers in Thousands and Percentages, 2014 and 2015
- 4.10B Past Year Initiation of Substance Use among Persons Aged 18 or Older, Persons Aged 18 or Older At Risk for Initiation of Substance Use, and Past Year Substance Users Aged 18 or Older: Numbers in Thousands and Percentages, 2014 and 2015
- 4.11B Past Year Initiation of Substance Use among Persons Aged 18 to 25, Persons Aged 18 to 25 At Risk for Initiation of Substance Use, and Past Year Substance Users Aged 18 to 25: Numbers in Thousands and Percentages, 2014 and 2015
- 4.12B Past Year Initiation of Substance Use among Persons Aged 26 or Older, Persons Aged 26 or Older At Risk for Initiation of Substance Use, and Past Year Substance Users Aged 26 or Older: Numbers in Thousands and Percentages, 2014 and 2015
- 4.13A Past Year Initiation of Substance Use among Persons Aged 12 or Older, by Gender: Numbers in Thousands, 2014 and 2015
- 4.14A Past Year Initiation of Substance Use among Persons Aged 12 or Older Who Initiated Use Prior to Age 18, by Gender: Numbers in Thousands, 2014 and 2015
- 4.15A Past Year Initiation of Substance Use among Persons Aged 12 or Older Who Initiated Use Prior to Age 21, by Gender: Numbers in Thousands, 2014 and 2015
- 4.16A Past Year Initiation of Substance Use among Persons Aged 12 to 49, by Gender: Numbers in Thousands, 2014 and 2015
- 4.17B Mean Age at First Substance Use among Past Year Initiates Aged 12 or Older, by Gender: 2014 and 2015
- 4.18B Mean Age at First Substance Use among Past Year Initiates Aged 12 or Older Who Initiated Use Prior to Age 18, by Gender: 2014 and 2015
- 4.19B Mean Age at First Substance Use among Past Year Initiates Aged 12 or Older Who Initiated Use Prior to Age 21, by Gender: 2014 and 2015
- 4.20B Mean Age at First Substance Use among Past Year Initiates Aged 12 to 49, by Gender: 2014 and 2015

LIST OF TABLES (Continued)

Table

5.1A	Substance Use Disorder Status in Past Year among Persons Aged 12 or Older: Numbers in Thousands, 2014 and 2015
5.1B	Substance Use Disorder Status in Past Year among Persons Aged 12 or Older: Percentages, 2014 and 2015
5.2A	Substance Use Disorder for Specific Substances in Past Year, by Age Group: Numbers in Thousands, 2014 and 2015
5.2B	Substance Use Disorder for Specific Substances in Past Year, by Age Group: Percentages, 2014 and 2015
5.3A	Substance Use Disorder in Past Year, by Detailed Age Category: Numbers in Thousands, 2014 and 2015
5.3B	Substance Use Disorder in Past Year, by Detailed Age Category: Percentages, 2014 and 2015
5.4A	Substance Use Disorder in Past Year among Persons Aged 12 or Older, by Demographic Characteristics: Numbers in Thousands, 2014 and 2015
5.4B	Substance Use Disorder in Past Year among Persons Aged 12 or Older, by Demographic Characteristics: Percentages, 2014 and 2015
5.5A	Substance Use Disorder in Past Year among Persons Aged 12 to 17, by Demographic Characteristics: Numbers in Thousands, 2014 and 2015
5.5B	Substance Use Disorder in Past Year among Persons Aged 12 to 17, by Demographic Characteristics: Percentages, 2014 and 2015
5.6A	Substance Use Disorder in Past Year among Persons Aged 18 or Older, by Demographic Characteristics: Numbers in Thousands, 2014 and 2015
5.6B	Substance Use Disorder in Past Year among Persons Aged 18 or Older, by Demographic Characteristics: Percentages, 2014 and 2015
5.7A	Substance Use Disorder in Past Year among Persons Aged 18 to 25, by Demographic Characteristics: Numbers in Thousands, 2014 and 2015
5.7B	Substance Use Disorder in Past Year among Persons Aged 18 to 25, by Demographic Characteristics: Percentages, 2014 and 2015
5.8A	Substance Use Disorder in Past Year among Persons Aged 26 or Older, by Demographic Characteristics: Numbers in Thousands, 2014 and 2015
5.8B	Substance Use Disorder in Past Year among Persons Aged 26 or Older, by Demographic Characteristics: Percentages, 2014 and 2015
5.9A	Substance Use Disorder in Past Year among Persons Aged 12 or Older, by Geographic Characteristics: Numbers in Thousands, 2014 and 2015
5.9B	Substance Use Disorder in Past Year among Persons Aged 12 or Older, by Geographic Characteristics: Percentages, 2014 and 2015
5.10A	Substance Use Disorder in Past Year among Persons Aged 12 to 17, by Geographic Characteristics: Numbers in Thousands, 2014 and 2015
5.10B	Substance Use Disorder in Past Year among Persons Aged 12 to 17, by Geographic Characteristics: Percentages, 2014 and 2015
5.11A	Substance Use Disorder in Past Year among Persons Aged 18 or Older, by Geographic Characteristics: Numbers in Thousands, 2014 and 2015
5.11B	Substance Use Disorder in Past Year among Persons Aged 18 or Older, by Geographic Characteristics: Percentages, 2014 and 2015
5.12A	Substance Use Disorder in Past Year among Persons Aged 18 to 25, by Geographic Characteristics: Numbers in Thousands, 2014 and 2015
5.12B	Substance Use Disorder in Past Year among Persons Aged 18 to 25, by Geographic Characteristics: Percentages, 2014 and 2015
5.13A	Substance Use Disorder in Past Year among Persons Aged 26 or Older, by Geographic Characteristics: Numbers in Thousands, 2014 and 2015
5.13B	Substance Use Disorder in Past Year among Persons Aged 26 or Older, by Geographic Characteristics: Percentages, 2014 and 2015

Table

5.14A	Substance Dependence for Specific Substances in Past Year, by Age Group: Numbers in Thousands, 2014 and 2015
5.14B	Substance Dependence for Specific Substances in Past Year, by Age Group: Percentages, 2014 and 2015
5.15A	Received Substance Use Treatment in Past Year, by Detailed Age Category: Numbers in Thousands, 2014 and 2015
5.15B	Received Substance Use Treatment in Past Year, by Detailed Age Category: Percentages, 2014 and 2015
5.16A	Received Substance Use Treatment in Past Year among Persons Aged 12 or Older, by Demographic Characteristics: Numbers in Thousands, 2014 and 2015
5.16B	Received Substance Use Treatment in Past Year among Persons Aged 12 or Older, by Demographic Characteristics: Percentages, 2014 and 2015
5.17A	Received Substance Use Treatment in Past Year among Persons Aged 12 to 17, by Demographic Characteristics: Numbers in Thousands, 2014 and 2015
5.17B	Received Substance Use Treatment in Past Year among Persons Aged 12 to 17, by Demographic Characteristics: Percentages, 2014 and 2015
5.18A	Received Substance Use Treatment in Past Year among Persons Aged 18 or Older, by Demographic Characteristics: Numbers in Thousands, 2014 and 2015
5.18B	Received Substance Use Treatment in Past Year among Persons Aged 18 or Older, by Demographic Characteristics: Percentages, 2014 and 2015
5.19A	Received Substance Use Treatment in Past Year among Persons Aged 18 to 25, by Demographic Characteristics: Numbers in Thousands, 2014 and 2015
5.19B	Received Substance Use Treatment in Past Year among Persons Aged 18 to 25, by Demographic Characteristics: Percentages, 2014 and 2015
5.20A	Received Substance Use Treatment in Past Year among Persons Aged 26 or Older, by Demographic Characteristics: Numbers in Thousands, 2014 and 2015
5.20B	Received Substance Use Treatment in Past Year among Persons Aged 26 or Older, by Demographic Characteristics: Percentages, 2014 and 2015
5.21A	Received Substance Use Treatment in Past Year among Persons Aged 12 or Older, by Geographic Characteristics: Numbers in Thousands, 2014 and 2015
5.21B	Received Substance Use Treatment in Past Year among Persons Aged 12 or Older, by Geographic Characteristics: Percentages, 2014 and 2015
5.22A	Substances for Which Last or Current Treatment Was Received among Persons Who Received Substance Use Treatment in Past Year, by Age Group: Numbers in Thousands, 2014 and 2015
5.22B	Substances for Which Last or Current Treatment Was Received among Persons Who Received Substance Use Treatment in Past Year, by Age Group: Percentages, 2014 and 2015
5.23A	Locations Received Illicit Drug Treatment in Past Year among Persons Who Received Illicit Drug Treatment in Past Year, by Age Group: Numbers in Thousands, 2014 and 2015
5.23B	Locations Received Illicit Drug Treatment in Past Year among Persons Who Received Illicit Drug Treatment in Past Year, by Age Group: Percentages, 2014 and 2015
5.24A	Locations Received Alcohol Treatment in Past Year among Persons Who Received Alcohol Treatment in Past Year, by Age Group: Numbers in Thousands, 2014 and 2015
5.24B	Locations Received Alcohol Treatment in Past Year among Persons Who Received Alcohol Treatment in Past Year, by Age Group: Percentages, 2014 and 2015
5.25A	Locations Received Illicit Drug or Alcohol Treatment in Past Year among Persons Who Received Illicit Drug or Alcohol Treatment in Past Year, by Age Group: Numbers in Thousands, 2014 and 2015
5.25B	Locations Received Illicit Drug or Alcohol Treatment in Past Year among Persons Who Received Illicit Drug or Alcohol Treatment in Past Year, by Age Group: Percentages, 2014 and 2015
5.26A	Received Substance Use Treatment in Past Year among Persons Aged 12 or Older, by Past Year Substance Use Disorder Status: Numbers in Thousands, 2014 and 2015
5.26B	Received Substance Use Treatment in Past Year among Persons Aged 12 or Older, by Past Year Substance Use Disorder Status: Percentages, 2014 and 2015

LIST OF TABLES (Continued)

Table

- 5.27A Received Substance Use Treatment at Any Treatment Location or at a Specialty Facility and Type of Substance Use Treatment Received in Past Year among Persons Aged 12 or Older, by Age Group: Numbers in Thousands, 2014 and 2015
- 5.27B Received Substance Use Treatment at Any Treatment Location or at a Specialty Facility and Type of Substance Use Treatment Received in Past Year among Persons Aged 12 or Older, by Age Group: Percentages, 2014 and 2015
- 5.28A Type of Substance Use Treatment Received at Any Location in Past Year among Persons Aged 12 or Older Who Received Treatment for Substance Use in Past Year, by Age Group: Numbers in Thousands, 2014 and 2015
- 5.28B Type of Substance Use Treatment Received at Any Location in Past Year among Persons Aged 12 or Older Who Received Treatment for Substance Use in Past Year, by Age Group: Percentages, 2014 and 2015
- 5.29A Type of Substance Use Treatment Received at a Specialty Facility in Past Year among Persons Aged 12 or Older Who Received Treatment for Substance Use at a Specialty Facility in Past Year, by Age Group: Numbers in Thousands, 2014 and 2015
- 5.29B Type of Substance Use Treatment Received at a Specialty Facility in Past Year among Persons Aged 12 or Older Who Received Treatment for Substance Use at a Specialty Facility in Past Year, by Age Group: Percentages, 2014 and 2015
- 5.30A Receipt of Substance Use Treatment at a Specialty Facility and/or a Non-Specialty Facility and Type of Substance Treatment Received in Past Year among Persons Aged 12 or Older, by Age Group: Numbers in Thousands, 2014 and 2015
- 5.30B Receipt of Substance Use Treatment at a Specialty Facility and/or a Non-Specialty Facility and Type of Substance Treatment Received in Past Year among Persons Aged 12 or Older, by Age Group: Percentages, 2014 and 2015
- 5.31A Received Illicit Drug Treatment at a Specialty Facility and/or a Non-Specialty Facility in Past Year among Persons Aged 12 or Older Who Received Illicit Drug Treatment in Past Year, by Age Group: Numbers in Thousands, 2014 and 2015
- 5.31B Received Illicit Drug Treatment at a Specialty Facility and/or a Non-Specialty Facility in Past Year among Persons Aged 12 or Older Who Received Illicit Drug Treatment in Past Year, by Age Group: Percentages, 2014 and 2015
- 5.32A Received Alcohol Treatment at a Specialty Facility and/or a Non-Specialty Facility in Past Year among Persons Aged 12 or Older Who Received Alcohol Treatment in Past Year, by Age Group: Numbers in Thousands, 2014 and 2015
- 5.32B Received Alcohol Treatment at a Specialty Facility and/or a Non-Specialty Facility in Past Year among Persons Aged 12 or Older Who Received Alcohol Treatment in Past Year, by Age Group: Percentages, 2014 and 2015
- 5.33A Received Illicit Drug or Alcohol Treatment at a Specialty Facility and/or a Non-Specialty Facility in Past Year among Persons Aged 12 or Older Who Received Illicit Drug or Alcohol Treatment in Past Year, by Age Group: Numbers in Thousands, 2014 and 2015
- 5.33B Received Illicit Drug or Alcohol Treatment at a Specialty Facility and/or a Non-Specialty Facility in Past Year among Persons Aged 12 or Older Who Received Illicit Drug or Alcohol Treatment in Past Year, by Age Group: Percentages, 2014 and 2015
- 5.34A Received Substance Use Treatment at a Specialty Facility in Past Year, by Detailed Age Category: Numbers in Thousands, 2014 and 2015
- 5.34B Received Substance Use Treatment at a Specialty Facility in Past Year, by Detailed Age Category: Percentages, 2014 and 2015
- 5.35A Received Substance Use Treatment at a Specialty Facility in Past Year among Persons Aged 12 or Older, by Demographic Characteristics: Numbers in Thousands, 2014 and 2015
- 5.35B Received Substance Use Treatment at a Specialty Facility in Past Year among Persons Aged 12 or Older, by Demographic Characteristics: Percentages, 2014 and 2015

Table

5.36A	Received Substance Use Treatment at a Specialty Facility in Past Year among Persons Aged 12 to 17, by Demographic Characteristics: Numbers in Thousands, 2014 and 2015
5.36B	Received Substance Use Treatment at a Specialty Facility in Past Year among Persons Aged 12 to 17, by Demographic Characteristics: Percentages, 2014 and 2015
5.37A	Received Substance Use Treatment at a Specialty Facility in Past Year among Persons Aged 18 or Older, by Demographic Characteristics: Numbers in Thousands, 2014 and 2015
5.37B	Received Substance Use Treatment at a Specialty Facility in Past Year among Persons Aged 18 or Older, by Demographic Characteristics: Percentages, 2014 and 2015
5.38A	Received Substance Use Treatment at a Specialty Facility in Past Year among Persons Aged 18 to 25, by Demographic Characteristics: Numbers in Thousands, 2014 and 2015
5.38B	Received Substance Use Treatment at a Specialty Facility in Past Year among Persons Aged 18 to 25, by Demographic Characteristics: Percentages, 2014 and 2015
5.39A	Received Substance Use Treatment at a Specialty Facility in Past Year among Persons Aged 26 or Older, by Demographic Characteristics: Numbers in Thousands, 2014 and 2015
5.39B	Received Substance Use Treatment at a Specialty Facility in Past Year among Persons Aged 26 or Older, by Demographic Characteristics: Percentages, 2014 and 2015
5.40A	Received Substance Use Treatment at a Specialty Facility in Past Year among Persons Aged 12 or Older, by Geographic Characteristics: Numbers in Thousands, 2014 and 2015
5.40B	Received Substance Use Treatment at a Specialty Facility in Past Year among Persons Aged 12 or Older, by Geographic Characteristics: Percentages, 2014 and 2015
5.41A	Substances for Which Last or Current Treatment Was Received among Persons Who Received Their Last or Current Substance Use Treatment at a Specialty Facility in Past Year, by Age Group: Numbers in Thousands, 2014 and 2015
5.41B	Substances for Which Last or Current Treatment Was Received among Persons Who Received Their Last or Current Substance Use Treatment at a Specialty Facility in Past Year, by Age Group: Percentages, 2014 and 2015
5.42A	Source of Payment for Last or Current Illicit Drug Treatment among Persons Who Received Their Last or Current Illicit Drug Treatment at a Specialty Facility in Past Year, by Age Group: Numbers in Thousands, 2014 and 2015
5.42B	Source of Payment for Last or Current Illicit Drug Treatment among Persons Who Received Their Last or Current Illicit Drug Treatment at a Specialty Facility in Past Year, by Age Group: Percentages, 2014 and 2015
5.43A	Source of Payment for Last or Current Alcohol Treatment among Persons Who Received Their Last or Current Alcohol Treatment at a Specialty Facility in Past Year, by Age Group: Numbers in Thousands, 2014 and 2015
5.43B	Source of Payment for Last or Current Alcohol Treatment among Persons Who Received Their Last or Current Alcohol Treatment at a Specialty Facility in Past Year, by Age Group: Percentages, 2014 and 2015
5.44A	Source of Payment for Last or Current Illicit Drug or Alcohol Treatment among Persons Who Received Their Last or Current Illicit Drug or Alcohol Treatment at a Specialty Facility in Past Year, by Age Group: Numbers in Thousands, 2014 and 2015
5.44B	Source of Payment for Last or Current Illicit Drug or Alcohol Treatment among Persons Who Received Their Last or Current Illicit Drug or Alcohol Treatment at a Specialty Facility in Past Year, by Age Group: Percentages, 2014 and 2015
5.45A	Locations Received Illicit Drug Treatment in Past Year among Persons Who Received Illicit Drug Treatment at a Specialty Facility in Past Year, by Age Group: Numbers in Thousands, 2014 and 2015
5.45B	Locations Received Illicit Drug Treatment in Past Year among Persons Who Received Illicit Drug Treatment at a Specialty Facility in Past Year, by Age Group: Percentages, 2014 and 2015
5.46A	Locations Received Alcohol Treatment in Past Year among Persons Who Received Alcohol Treatment at a Specialty Facility in Past Year, by Age Group: Numbers in Thousands, 2014 and 2015
5.46B	Locations Received Alcohol Treatment in Past Year among Persons Who Received Alcohol Treatment at a Specialty Facility in Past Year, by Age Group: Percentages, 2014 and 2015

Table

- 5.47A Locations Received Illicit Drug or Alcohol Treatment in Past Year among Persons Who Received Illicit Drug or Alcohol Treatment at a Specialty Facility in Past Year, by Age Group: Numbers in Thousands, 2014 and 2015
- 5.47B Locations Received Illicit Drug or Alcohol Treatment in Past Year among Persons Who Received Illicit Drug or Alcohol Treatment at a Specialty Facility in Past Year, by Age Group: Percentages, 2014 and 2015
- 5.48A Received Substance Use Treatment at a Specialty Facility in Past Year among Persons Aged 12 or Older, by Past Year Substance Use Disorder Status: Numbers in Thousands, 2014 and 2015
- 5.48B Received Substance Use Treatment at a Specialty Facility in Past Year among Persons Aged 12 or Older, by Past Year Substance Use Disorder Status: Percentages, 2014 and 2015
- 5.49A Received Substance Use Treatment at a Specialty Facility in Past Year among Persons Aged 12 or Older, by Past Year Substance Use Disorder of Specific Substances: Numbers in Thousands, 2014 and 2015
- 5.49B Received Substance Use Treatment at a Specialty Facility in Past Year among Persons Aged 12 or Older, by Past Year Substance Use Disorder of Specific Substances: Percentages, 2014 and 2015
- 5.50A Need for and Receipt of Treatment at a Specialty Facility for an Illicit Drug Problem in Past Year, by Detailed Age Category: Numbers in Thousands and Percentages, 2014 and 2015
- 5.50B Need for and Receipt of Treatment at a Specialty Facility for an Illicit Drug Problem in Past Year, by Detailed Age Category: Percentages, 2014 and 2015
- 5.51A Need for and Receipt of Treatment at a Specialty Facility for an Illicit Drug Problem in Past Year among Persons Aged 12 or Older, by Demographic Characteristics: Numbers in Thousands and Percentages, 2014 and 2015
- 5.51B Need for and Receipt of Treatment at a Specialty Facility for an Illicit Drug Problem in Past Year among Persons Aged 12 or Older, by Demographic Characteristics: Percentages, 2014 and 2015
- 5.52A Need for and Receipt of Treatment at a Specialty Facility for an Illicit Drug Problem in Past Year among Persons Aged 18 or Older, by Demographic Characteristics: Numbers in Thousands and Percentages, 2014 and 2015
- 5.52B Need for and Receipt of Treatment at a Specialty Facility for an Illicit Drug Problem in Past Year among Persons Aged 18 or Older, by Demographic Characteristics: Percentages, 2014 and 2015
- 5.53A Need for and Receipt of Treatment at a Specialty Facility for an Illicit Drug Problem in Past Year among Persons Aged 12 or Older, by Geographic Characteristics: Numbers in Thousands and Percentages, 2014 and 2015
- 5.53B Need for and Receipt of Treatment at a Specialty Facility for an Illicit Drug Problem in Past Year among Persons Aged 12 or Older, by Geographic Characteristics: Percentages, 2014 and 2015
- 5.54A Perceived Need for Illicit Drug Treatment and Whether Made an Effort to Get Treatment in Past Year among Persons Aged 12 or Older Classified as Needing But Not Receiving Treatment for an Illicit Drug Problem, by Demographic Characteristics: Numbers in Thousands, 2014 and 2015
- 5.54B Perceived Need for Illicit Drug Treatment and Whether Made an Effort to Get Treatment in Past Year among Persons Aged 12 or Older Classified as Needing But Not Receiving Treatment for an Illicit Drug Problem, by Demographic Characteristics: Percentages, 2014 and 2015
- 5.55A Need for and Receipt of Treatment at a Specialty Facility for an Alcohol Problem in Past Year among Persons Aged 12 or Older, by Demographic Characteristics: Numbers in Thousands and Percentages, 2014 and 2015
- 5.55B Need for and Receipt of Treatment at a Specialty Facility for an Alcohol Problem in Past Year among Persons Aged 12 or Older, by Demographic Characteristics: Percentages, 2014 and 2015
- 5.56A Need for and Receipt of Treatment at a Specialty Facility for an Alcohol Problem in Past Year among Persons Aged 18 or Older, by Demographic Characteristics: Numbers in Thousands and Percentages, 2014 and 2015
- 5.56B Need for and Receipt of Treatment at a Specialty Facility for an Alcohol Problem in Past Year among Persons Aged 18 or Older, by Demographic Characteristics: Percentages, 2014 and 2015

LIST OF TABLES (Continued)

Table

- 5.57A Perceived Need for Alcohol Treatment and Whether Made an Effort to Get Treatment in Past Year among Persons Aged 12 or Older Classified as Needing But Not Receiving Treatment for an Alcohol Problem, by Demographic Characteristics: Numbers in Thousands, 2014 and 2015
- 5.57B Perceived Need for Alcohol Treatment and Whether Made an Effort to Get Treatment in Past Year among Persons Aged 12 or Older Classified as Needing But Not Receiving Treatment for an Alcohol Problem, by Demographic Characteristics: Percentages, 2014 and 2015
- 5.58A Need for and Receipt of Treatment at a Specialty Facility for an Illicit Drug or Alcohol Problem in Past Year among Persons Aged 12 or Older, by Demographic Characteristics: Numbers in Thousands and Percentages, 2014 and 2015
- 5.58B Need for and Receipt of Treatment at a Specialty Facility for an Illicit Drug or Alcohol Problem in Past Year among Persons Aged 12 or Older, by Demographic Characteristics: Percentages, 2014 and 2015
- 5.59A Need for and Receipt of Treatment at a Specialty Facility for an Illicit Drug or Alcohol Problem in Past Year among Persons Aged 18 or Older, by Demographic Characteristics: Numbers in Thousands and Percentages, 2014 and 2015
- 5.59B Need for and Receipt of Treatment at a Specialty Facility for an Illicit Drug or Alcohol Problem in Past Year among Persons Aged 18 or Older, by Demographic Characteristics: Percentages, 2014 and 2015
- 5.60A Perceived Need for Illicit Drug or Alcohol Treatment and Whether Made an Effort to Get Treatment in Past Year among Persons Aged 12 or Older Classified as Needing But Not Receiving Treatment for an Illicit Drug or Alcohol Problem, by Demographic Characteristics: Numbers in Thousands, 2014 and 2015
- 5.60B Perceived Need for Illicit Drug or Alcohol Treatment and Whether Made an Effort to Get Treatment in Past Year among Persons Aged 12 or Older Classified as Needing But Not Receiving Treatment for an Illicit Drug or Alcohol Problem, by Demographic Characteristics: Percentages, 2014 and 2015
- 5.61A Detailed Reasons for Not Receiving Illicit Drug or Alcohol Treatment in Past Year among Persons Aged 12 or Older Classified as Needing but Not Receiving Illicit Drug or Alcohol Treatment at a Specialty Facility and Who Felt a Need for Illicit Drug or Alcohol Treatment in Past Year: Numbers in Thousands, 2015
- 5.61B Detailed Reasons for Not Receiving Illicit Drug or Alcohol Treatment in Past Year among Persons Aged 12 or Older Classified as Needing but Not Receiving Illicit Drug or Alcohol Treatment at a Specialty Facility and Who Felt a Need for Illicit Drug or Alcohol Treatment in Past Year: Percentages, 2015
- 5.62A Detailed Reasons for Not Receiving Illicit Drug or Alcohol Treatment in Past Year among Persons Aged 18 or Older Classified as Needing but Not Receiving Illicit Drug or Alcohol Treatment at a Specialty Facility and Who Felt a Need for Illicit Drug or Alcohol Treatment in Past Year: Numbers in Thousands, 2015
- 5.62B Detailed Reasons for Not Receiving Illicit Drug or Alcohol Treatment in Past Year among Persons Aged 18 or Older Classified as Needing but Not Receiving Illicit Drug or Alcohol Treatment at a Specialty Facility and Who Felt a Need for Illicit Drug or Alcohol Treatment in Past Year: Percentages, 2015
- 6.1A Number of Days Used Marijuana in Past Year among Past Year Users and Number of Days Used Marijuana in Past Month among Past Month Users, by Age Group: Numbers in Thousands, 2014 and 2015
- 6.1B Number of Days Used Marijuana in Past Year among Past Year Users and Number of Days Used Marijuana in Past Month among Past Month Users, by Age Group: Percentages, 2014 and 2015
- 6.2A Number of Days Used Cocaine in Past Year among Past Year Users and Number of Days Used Cocaine in Past Month among Past Month Users, by Age Group: Numbers in Thousands, 2014 and 2015
- 6.2B Number of Days Used Cocaine in Past Year among Past Year Users and Number of Days Used Cocaine in Past Month among Past Month Users, by Age Group: Percentages, 2014 and 2015
- 6.3A Number of Days Used Hallucinogens in Past Year among Past Year Users and Number of Days Used Hallucinogens in Past Month among Past Month Users, by Age Group: Numbers in Thousands, 2014 and 2015
- 6.3B Number of Days Used Hallucinogens in Past Year among Past Year Users and Number of Days Used Hallucinogens in Past Month among Past Month Users, by Age Group: Percentages, 2014 and 2015

LIST OF TABLES (Continued)

Table

- 6.4A Number of Days Used Inhalants in Past Year among Past Year Users and Number of Days Used Inhalants in Past Month among Past Month Users, by Age Group: Numbers in Thousands, 2014 and 2015
- 6.4B Number of Days Used Inhalants in Past Year among Past Year Users and Number of Days Used Inhalants in Past Month among Past Month Users, by Age Group: Percentages, 2014 and 2015
- 6.5A Number of Days Used Methamphetamine in Past Year among Past Year Users and Number of Days Used Methamphetamine in Past Month among Past Month Users, by Age Group: Numbers in Thousands, 2014 and 2015
- 6.5B Number of Days Used Methamphetamine in Past Year among Past Year Users and Number of Days Used Methamphetamine in Past Month among Past Month Users, by Age Group: Percentages, 2014 and 2015
- 6.6A Number of Days Misused Prescription Psychotherapeutic Drugs in Past Month among Past Month Misusers, by Age Group: Numbers in Thousands and Averages, 2014 and 2015
- 6.6B Number of Days Misused Prescription Psychotherapeutic Drugs in Past Month among Past Month Misusers, by Age Group: Percentages and Averages, 2014 and 2015
- 6.7A Number of Days Used Cigarettes in Past Month among Past Month Users and Number of Cigarettes Smoked Per Day among Daily Smokers, by Age Group: Numbers in Thousands, 2014 and 2015
- 6.7B Number of Days Used Cigarettes in Past Month among Past Month Users and Number of Cigarettes Smoked Per Day among Daily Smokers, by Age Group: Percentages, 2014 and 2015
- 6.8A Number of Days Used Alcohol in Past Year among Past Year Users and Number of Days Used Alcohol in Past Month among Past Month Users, by Age Group: Numbers in Thousands, 2014 and 2015
- 6.8B Number of Days Used Alcohol in Past Year among Past Year Users and Number of Days Used Alcohol in Past Month among Past Month Users, by Age Group: Percentages, 2014 and 2015
- 6.9A Any Use and Misuse of Prescription Psychotherapeutics in Past Year among Persons Aged 12 or Older, by Substance Use Other Than Prescription Drug Use in Past Year: Numbers in Thousands, 2014 and 2015
- 6.9B Any Use and Misuse of Prescription Psychotherapeutics in Past Year among Persons Aged 12 or Older, by Substance Use Other Than Prescription Drug Use in Past Year: Percentages, 2014 and 2015
- 6.10A Any Use and Misuse of Pain Relievers in Past Year among Persons Aged 12 or Older, by Substance Use Other Than Prescription Drug Use in Past Year: Numbers in Thousands, 2014 and 2015
- 6.10B Any Use and Misuse of Pain Relievers in Past Year among Persons Aged 12 or Older, by Substance Use Other Than Prescription Drug Use in Past Year: Percentages, 2014 and 2015
- 6.11A Any Use and Misuse of Tranquilizers in Past Year among Persons Aged 12 or Older, by Substance Use Other Than Prescription Drug Use in Past Year: Numbers in Thousands, 2014 and 2015
- 6.11B Any Use and Misuse of Tranquilizers in Past Year among Persons Aged 12 or Older, by Substance Use Other Than Prescription Drug Use in Past Year: Percentages, 2014 and 2015
- 6.12A Any Use and Misuse of Stimulants in Past Year among Persons Aged 12 or Older, by Substance Use Other Than Prescription Drug Use in Past Year: Numbers in Thousands, 2014 and 2015
- 6.12B Any Use and Misuse of Stimulants in Past Year among Persons Aged 12 or Older, by Substance Use Other Than Prescription Drug Use in Past Year: Percentages, 2014 and 2015
- 6.13A Any Use and Misuse of Sedatives in Past Year among Persons Aged 12 or Older, by Substance Use Other Than Prescription Drug Use in Past Year: Numbers in Thousands, 2014 and 2015
- 6.13B Any Use and Misuse of Sedatives in Past Year among Persons Aged 12 or Older, by Substance Use Other Than Prescription Drug Use in Past Year: Percentages, 2014 and 2015
- 6.14A Types of Illicit Drug Use in Past Month among Persons Aged 12 or Older, by Past Month Cigarette Use: Numbers in Thousands, 2014 and 2015
- 6.14B Types of Illicit Drug Use in Past Month among Persons Aged 12 or Older, by Past Month Cigarette Use: Percentages, 2014 and 2015

LIST OF TABLES (Continued)

Table

- 3.30D Perceived Availability of Selected Illicit Drugs among Persons Aged 12 to 17, by Past Month Substance Use Status: Standard Errors of Percentages, 2015
- 3.31C Perceived Availability of Selected Illicit Drugs among Persons Aged 18 or Older, by Past Month Substance Use Status: Standard Errors of Numbers in Thousands, 2015
- 3.31D Perceived Availability of Selected Illicit Drugs among Persons Aged 18 or Older, by Past Month Substance Use Status: Standard Errors of Percentages, 2015
- 3.32C Perceived Availability of Selected Illicit Drugs among Persons Aged 18 to 25, by Past Month Substance Use Status: Standard Errors of Numbers in Thousands, 2015
- 3.32D Perceived Availability of Selected Illicit Drugs among Persons Aged 18 to 25, by Past Month Substance Use Status: Standard Errors of Percentages, 2015
- 3.33C Perceived Availability of Selected Illicit Drugs among Persons Aged 26 or Older, by Past Month Substance Use Status: Standard Errors of Numbers in Thousands, 2015
- 3.33D Perceived Availability of Selected Illicit Drugs among Persons Aged 26 or Older, by Past Month Substance Use Status: Standard Errors of Percentages, 2015
- 3.34C Past Month Use of Selected Substances among Persons Aged 12 to 17, by Youth's Perceptions of Parents' Feelings about Substance Use Behaviors: Standard Errors of Numbers in Thousands, 2015
- 3.34D Past Month Use of Selected Substances among Persons Aged 12 to 17, by Youth's Perceptions of Parents' Feelings about Substance Use Behaviors: Standard Errors of Percentages, 2015
- 3.35C Past Month Use of Selected Substances among Persons Aged 12 to 17, by Youth's Perceptions of Close Friends' Feelings and Youth's Feelings about Peers' Substance Use Behaviors: Standard Errors of Numbers in Thousands, 2015
- 3.35D Past Month Use of Selected Substances among Persons Aged 12 to 17, by Youth's Perceptions of Close Friends' Feelings and Youth's Feelings about Peers' Substance Use Behaviors: Standard Errors of Percentages, 2015
- 3.36C Past Month Use of Selected Substances among Persons Aged 12 to 17, by Measures of Youth's Participation in Prevention or Substance Use Programs and Exposure to Substance Use Prevention Messages and Youth's Delinquency in Past Year: Standard Errors of Numbers in Thousands, 2015
- 3.36D Past Month Use of Selected Substances among Persons Aged 12 to 17, by Measures of Youth's Participation in Prevention or Substance Use Programs and Exposure to Substance Use Prevention Messages and Youth's Delinquency in Past Year: Standard Errors of Percentages, 2015
- 3.37C Past Month Use of Selected Substances among Persons Aged 12 to 17, by Measures of Risk and Protective Factors, Religious Beliefs, and Past Year Parental Involvement: Standard Errors of Numbers in Thousands, 2015
- 3.37D Past Month Use of Selected Substances among Persons Aged 12 to 17, by Measures of Risk and Protective Factors, Religious Beliefs, and Past Year Parental Involvement: Standard Errors of Percentages, 2015
- 3.38C Past Month Use of Selected Substances among Persons Aged 12 to 17 Who Were Enrolled in School in Past Year, by Measures of Scholastic Environment: Standard Errors of Numbers in Thousands, 2015
- 3.38D Past Month Use of Selected Substances among Persons Aged 12 to 17 Who Were Enrolled in School in Past Year, by Measures of Scholastic Environment: Standard Errors of Percentages, 2015
- 4.1D Past Year Initiation of Marijuana Use among Persons Aged 12 or Older, Persons Aged 12 or Older At Risk for Initiation of Marijuana Use, and Past Year Marijuana Users Aged 12 or Older, by Demographic Characteristics: Standard Errors of Numbers in Thousands and Standard Errors of Percentages, 2014 and 2015
- 4.1P Past Year Initiation of Marijuana Use among Persons Aged 12 or Older, Persons Aged 12 or Older At Risk for Initiation of Marijuana Use, and Past Year Marijuana Users Aged 12 or Older, by Demographic Characteristics: *P* Values from Tests of Differences of Percentages, 2015 Versus 2014
- 4.2D Past Year Initiation of Pain Reliever Misuse among Persons Aged 12 or Older and Past Year Pain Reliever Misusers Aged 12 or Older, by Demographic Characteristics: Standard Errors of Numbers in Thousands and Percentages, 2014 and 2015

LIST OF TABLES (Continued)

Table

- 4.3D Past Year Initiation of Tranquilizer Misuse among Persons Aged 12 or Older and Past Year Tranquilizer Misusers Aged 12 or Older, by Demographic Characteristics: Standard Errors of Numbers in Thousands and Percentages, 2014 and 2015
- 4.4D Past Year Initiation of Stimulant Misuse among Persons Aged 12 or Older and Past Year Stimulant Misusers Aged 12 or Older, by Demographic Characteristics: Standard Errors of Numbers in Thousands and Percentages, 2014 and 2015
- 4.5D Past Year Initiation of Sedative Misuse among Persons Aged 12 or Older and Past Year Sedative Misusers Aged 12 or Older, by Demographic Characteristics: Standard Errors of Numbers in Thousands and Percentages, 2014 and 2015
- 4.6D Past Year Initiation of Cigarette Use among Persons Aged 12 or Older, Persons Aged 12 or Older At Risk for Initiation of Cigarette Use, and Past Year Cigarette Users Aged 12 or Older, by Demographic Characteristics: Standard Errors of Numbers in Thousands and Standard Errors of Percentages, 2014 and 2015
- 4.6P Past Year Initiation of Cigarette Use among Persons Aged 12 or Older, Persons Aged 12 or Older At Risk for Initiation of Cigarette Use, and Past Year Cigarette Users Aged 12 or Older, by Demographic Characteristics: *P* Values from Tests of Differences of Percentages, 2015 Versus 2014
- 4.7D Past Year Initiation of Alcohol Use among Persons Aged 12 or Older, Persons Aged 12 or Older At Risk for Initiation of Alcohol Use, and Past Year Alcohol Users Aged 12 or Older, by Demographic Characteristics: Standard Errors of Numbers in Thousands and Standard Errors of Percentages, 2014 and 2015
- 4.7P Past Year Initiation of Alcohol Use among Persons Aged 12 or Older, Persons Aged 12 or Older At Risk for Initiation of Alcohol Use, and Past Year Alcohol Users Aged 12 or Older, by Demographic Characteristics: *P* Values from Tests of Differences of Percentages, 2015 Versus 2014
- 4.8D Past Year Initiation of Substance Use among Persons Aged 12 or Older, Persons Aged 12 or Older At Risk for Initiation of Substance Use, and Past Year Substance Users Aged 12 or Older: Standard Errors of Numbers in Thousands and Standard Errors of Percentages, 2014 and 2015
- 4.8P Past Year Initiation of Substance Use among Persons Aged 12 or Older, Persons Aged 12 or Older At Risk for Initiation of Substance Use, and Past Year Substance Users Aged 12 or Older: *P* Values from Tests of Differences of Percentages, 2015 Versus 2014
- 4.9D Past Year Initiation of Substance Use among Persons Aged 12 to 17, Persons Aged 12 to 17 At Risk for Initiation of Substance Use, and Past Year Substance Users Aged 12 to 17: Standard Errors of Numbers in Thousands and Standard Errors of Percentages, 2014 and 2015
- 4.9P Past Year Initiation of Substance Use among Persons Aged 12 to 17, Persons Aged 12 to 17 At Risk for Initiation of Substance Use, and Past Year Substance Users Aged 12 to 17: *P* Values from Tests of Differences of Percentages, 2015 Versus 2014
- 4.10D Past Year Initiation of Substance Use among Persons Aged 18 or Older, Persons Aged 18 or Older At Risk for Initiation of Substance Use, and Past Year Substance Users Aged 18 or Older: Standard Errors of Numbers in Thousands and Standard Errors of Percentages, 2014 and 2015
- 4.10P Past Year Initiation of Substance Use among Persons Aged 18 or Older, Persons Aged 18 or Older At Risk for Initiation of Substance Use, and Past Year Substance Users Aged 18 or Older: *P* Values from Tests of Differences of Percentages, 2015 Versus 2014
- 4.11D Past Year Initiation of Substance Use among Persons Aged 18 to 25, Persons Aged 18 to 25 At Risk for Initiation of Substance Use, and Past Year Substance Users Aged 18 to 25: Standard Errors of Numbers in Thousands and Standard Errors of Percentages, 2014 and 2015
- 4.11P Past Year Initiation of Substance Use among Persons Aged 18 to 25, Persons Aged 18 to 25 At Risk for Initiation of Substance Use, and Past Year Substance Users Aged 18 to 25: *P* Values from Tests of Differences of Percentages, 2015 Versus 2014
- 4.12D Past Year Initiation of Substance Use among Persons Aged 26 or Older, Persons Aged 26 or Older At Risk for Initiation of Substance Use, and Past Year Substance Users Aged 26 or Older: Standard Errors of Numbers in Thousands and Standard Errors of Percentages, 2014 and 2015
- 4.12P Past Year Initiation of Substance Use among Persons Aged 26 or Older, Persons Aged 26 or Older At Risk for Initiation of Substance Use, and Past Year Substance Users Aged 26 or Older: *P* Values from Tests of Differences of Percentages, 2015 Versus 2014

5.18D	Received Substance Use Treatment in Past Year among Persons Aged 18 or Older, by Demographic Characteristics: Standard Errors of Percentages, 2014 and 2015
5.19C	Received Substance Use Treatment in Past Year among Persons Aged 18 to 25, by Demographic Characteristics: Standard Errors of Numbers in Thousands, 2014 and 2015
5.19D	Received Substance Use Treatment in Past Year among Persons Aged 18 to 25, by Demographic Characteristics: Standard Errors of Percentages, 2014 and 2015
5.20C	Received Substance Use Treatment in Past Year among Persons Aged 26 or Older, by Demographic Characteristics: Standard Errors of Numbers in Thousands, 2014 and 2015
5.20D	Received Substance Use Treatment in Past Year among Persons Aged 26 or Older, by Demographic Characteristics: Standard Errors of Percentages, 2014 and 2015
5.21C	Received Substance Use Treatment in Past Year among Persons Aged 12 or Older, by Geographic Characteristics: Standard Errors of Numbers in Thousands, 2014 and 2015
5.21D	Received Substance Use Treatment in Past Year among Persons Aged 12 or Older, by Geographic Characteristics: Standard Errors of Percentages, 2014 and 2015
5.22C	Substances for Which Last or Current Treatment Was Received among Persons Who Received Substance Use Treatment in Past Year, by Age Group: Standard Errors of Numbers in Thousands, 2014 and 2015
5.22D	Substances for Which Last or Current Treatment Was Received among Persons Who Received Substance Use Treatment in Past Year, by Age Group: Standard Errors of Percentages, 2014 and 2015
5.23C	Locations Received Illicit Drug Treatment in Past Year among Persons Who Received Illicit Drug Treatment in Past Year, by Age Group: Standard Errors of Numbers in Thousands, 2014 and 2015
5.23D	Locations Received Illicit Drug Treatment in Past Year among Persons Who Received Illicit Drug Treatment in Past Year, by Age Group: Standard Errors of Percentages, 2014 and 2015
5.24C	Locations Received Alcohol Treatment in Past Year among Persons Who Received Alcohol Treatment in Past Year, by Age Group: Standard Errors of Numbers in Thousands, 2014 and 2015
5.24D	Locations Received Alcohol Treatment in Past Year among Persons Who Received Alcohol Treatment in Past Year, by Age Group: Standard Errors of Percentages, 2014 and 2015
5.25C	Locations Received Illicit Drug or Alcohol Treatment in Past Year among Persons Who Received Illicit Drug or Alcohol Treatment in Past Year, by Age Group: Standard Errors of Numbers in Thousands, 2014 and 2015
5.25D	Locations Received Illicit Drug or Alcohol Treatment in Past Year among Persons Who Received Illicit Drug or Alcohol Treatment in Past Year, by Age Group: Standard Errors of Percentages, 2014 and 2015

LIST OF TABLES (Continued)

Table

5.26C	Received Substance Use Treatment in Past Year among Persons Aged 12 or Older, by Past Year Substance Use Disorder Status: Standard Errors of Numbers in Thousands, 2014 and 2015
5.26D	Received Substance Use Treatment in Past Year among Persons Aged 12 or Older, by Past Year Substance Use Disorder Status: Standard Errors of Percentages, 2014 and 2015
5.27C	Received Substance Use Treatment at Any Treatment Location or at a Specialty Facility and Type of Substance Use Treatment Received in Past Year among Persons Aged 12 or Older, by Age Group: Standard Errors of Numbers in Thousands, 2014 and 2015
5.27D	Received Substance Use Treatment at Any Treatment Location or at a Specialty Facility and Type of Substance Use Treatment Received in Past Year among Persons Aged 12 or Older, by Age Group: Standard Errors of Percentages, 2014 and 2015
5.28C	Type of Substance Use Treatment Received at Any Location in Past Year among Persons Aged 12 or Older Who Received Treatment for Substance Use in Past Year, by Age Group: Standard Errors of Numbers in Thousands, 2014 and 2015
5.28D	Type of Substance Use Treatment Received at Any Location in Past Year among Persons Aged 12 or Older Who Received Treatment for Substance Use in Past Year, by Age Group: Standard Errors of Percentages, 2014 and 2015
5.29C	Type of Substance Use Treatment Received at a Specialty Facility in Past Year among Persons Aged 12 or Older Who Received Treatment for Substance Use at a Specialty Facility in Past Year, by Age Group: Standard Errors of Numbers in Thousands, 2014 and 2015
5.29D	Type of Substance Use Treatment Received at a Specialty Facility in Past Year among Persons Aged 12 or Older Who Received Treatment for Substance Use at a Specialty Facility in Past Year, by Age Group: Standard Errors of Percentages, 2014 and 2015
5.30C	Receipt of Substance Use Treatment at a Specialty Facility and/or a Non-Specialty Facility and Type of Substance Treatment Received in Past Year among Persons Aged 12 or Older, by Age Group: Standard Errors of Numbers in Thousands, 2014 and 2015
5.30D	Receipt of Substance Use Treatment at a Specialty Facility and/or a Non-Specialty Facility and Type of Substance Treatment Received in Past Year among Persons Aged 12 or Older, by Age Group: Standard Errors of Percentages, 2014 and 2015
5.31C	Received Illicit Drug Treatment at a Specialty Facility and/or a Non-Specialty Facility in Past Year among Persons Aged 12 or Older Who Received Illicit Drug Treatment in Past Year, by Age Group: Standard Errors of Numbers in Thousands, 2014 and 2015
5.31D	Received Illicit Drug Treatment at a Specialty Facility and/or a Non-Specialty Facility in Past Year among Persons Aged 12 or Older Who Received Illicit Drug Treatment in Past Year, by Age Group: Standard Errors of Percentages, 2014 and 2015
5.32C	Received Alcohol Treatment at a Specialty Facility and/or a Non-Specialty Facility in Past Year among Persons Aged 12 or Older Who Received Alcohol Treatment in Past Year, by Age Group: Standard Errors of Numbers in Thousands, 2014 and 2015
5.32D	Received Alcohol Treatment at a Specialty Facility and/or a Non-Specialty Facility in Past Year among Persons Aged 12 or Older Who Received Alcohol Treatment in Past Year, by Age Group: Standard Errors of Percentages, 2014 and 2015
5.33C	Received Illicit Drug or Alcohol Treatment at a Specialty Facility and/or a Non-Specialty Facility in Past Year among Persons Aged 12 or Older Who Received Illicit Drug or Alcohol Treatment in Past Year, by Age Group: Standard Errors of Numbers in Thousands, 2014 and 2015
5.33D	Received Illicit Drug or Alcohol Treatment at a Specialty Facility and/or a Non-Specialty Facility in Past Year among Persons Aged 12 or Older Who Received Illicit Drug or Alcohol Treatment in Past Year, by Age Group: Standard Errors of Percentages, 2014 and 2015
5.34C	Received Substance Use Treatment at a Specialty Facility in Past Year, by Detailed Age Category: Standard Errors of Numbers in Thousands, 2014 and 2015
5.34D	Received Substance Use Treatment at a Specialty Facility in Past Year, by Detailed Age Category: Standard Errors of Percentages, 2014 and 2015

LIST OF TABLES (Continued)

Table

5.35C	Received Substance Use Treatment at a Specialty Facility in Past Year among Persons Aged 12 or Older, by Demographic Characteristics: Standard Errors of Numbers in Thousands, 2014 and 2015
5.35D	Received Substance Use Treatment at a Specialty Facility in Past Year among Persons Aged 12 or Older, by Demographic Characteristics: Standard Errors of Percentages, 2014 and 2015
5.36C	Received Substance Use Treatment at a Specialty Facility in Past Year among Persons Aged 12 to 17, by Demographic Characteristics: Standard Errors of Numbers in Thousands, 2014 and 2015
5.36D	Received Substance Use Treatment at a Specialty Facility in Past Year among Persons Aged 12 to 17, by Demographic Characteristics: Standard Errors of Percentages, 2014 and 2015
5.37C	Received Substance Use Treatment at a Specialty Facility in Past Year among Persons Aged 18 or Older, by Demographic Characteristics: Standard Errors of Numbers in Thousands, 2014 and 2015
5.37D	Received Substance Use Treatment at a Specialty Facility in Past Year among Persons Aged 18 or Older, by Demographic Characteristics: Standard Errors of Percentages, 2014 and 2015
5.38C	Received Substance Use Treatment at a Specialty Facility in Past Year among Persons Aged 18 to 25, by Demographic Characteristics: Standard Errors of Numbers in Thousands, 2014 and 2015
5.38D	Received Substance Use Treatment at a Specialty Facility in Past Year among Persons Aged 18 to 25, by Demographic Characteristics: Standard Errors of Percentages, 2014 and 2015
5.39C	Received Substance Use Treatment at a Specialty Facility in Past Year among Persons Aged 26 or Older, by Demographic Characteristics: Standard Errors of Numbers in Thousands, 2014 and 2015
5.39D	Received Substance Use Treatment at a Specialty Facility in Past Year among Persons Aged 26 or Older, by Demographic Characteristics: Standard Errors of Percentages, 2014 and 2015
5.40C	Received Substance Use Treatment at a Specialty Facility in Past Year among Persons Aged 12 or Older, by Geographic Characteristics: Standard Errors of Numbers in Thousands, 2014 and 2015
5.40D	Received Substance Use Treatment at a Specialty Facility in Past Year among Persons Aged 12 or Older, by Geographic Characteristics: Standard Errors of Percentages, 2014 and 2015
5.41C	Substances for Which Last or Current Treatment Was Received among Persons Who Received Their Last or Current Substance Use Treatment at a Specialty Facility in Past Year, by Age Group: Standard Errors of Numbers in Thousands, 2014 and 2015
5.41D	Substances for Which Last or Current Treatment Was Received among Persons Who Received Their Last or Current Substance Use Treatment at a Specialty Facility in Past Year, by Age Group: Standard Errors of Percentages, 2014 and 2015
5.42C	Source of Payment for Last or Current Illicit Drug Treatment among Persons Who Received Their Last or Current Illicit Drug Treatment at a Specialty Facility in Past Year, by Age Group: Standard Errors of Numbers in Thousands, 2014 and 2015
5.42D	Source of Payment for Last or Current Illicit Drug Treatment among Persons Who Received Their Last or Current Illicit Drug Treatment at a Specialty Facility in Past Year, by Age Group: Standard Errors of Percentages, 2014 and 2015
5.43C	Source of Payment for Last or Current Alcohol Treatment among Persons Who Received Their Last or Current Alcohol Treatment at a Specialty Facility in Past Year, by Age Group: Standard Errors of Numbers in Thousands, 2014 and 2015
5.43D	Source of Payment for Last or Current Alcohol Treatment among Persons Who Received Their Last or Current Alcohol Treatment at a Specialty Facility in Past Year, by Age Group: Standard Errors of Percentages, 2014 and 2015
5.44C	Source of Payment for Last or Current Illicit Drug or Alcohol Treatment among Persons Who Received Their Last or Current Illicit Drug or Alcohol Treatment at a Specialty Facility in Past Year, by Age Group: Standard Errors of Numbers in Thousands, 2014 and 2015
5.44D	Source of Payment for Last or Current Illicit Drug or Alcohol Treatment among Persons Who Received Their Last or Current Illicit Drug or Alcohol Treatment at a Specialty Facility in Past Year, by Age Group: Standard Errors of Percentages, 2014 and 2015

Table

- 5.45C Locations Received Illicit Drug Treatment in Past Year among Persons Who Received Illicit Drug Treatment at a Specialty Facility in Past Year, by Age Group: Standard Errors of Numbers in Thousands, 2014 and 2015
- 5.45D Locations Received Illicit Drug Treatment in Past Year among Persons Who Received Illicit Drug Treatment at a Specialty Facility in Past Year, by Age Group: Standard Errors of Percentages, 2014 and 2015
- 5.46C Locations Received Alcohol Treatment in Past Year among Persons Who Received Alcohol Treatment at a Specialty Facility in Past Year, by Age Group: Standard Errors of Numbers in Thousands, 2014 and 2015
- 5.46D Locations Received Alcohol Treatment in Past Year among Persons Who Received Alcohol Treatment at a Specialty Facility in Past Year, by Age Group: Standard Errors of Percentages, 2014 and 2015
- 5.47C Locations Received Illicit Drug or Alcohol Treatment in Past Year among Persons Who Received Illicit Drug or Alcohol Treatment at a Specialty Facility in Past Year, by Age Group: Standard Errors of Numbers in Thousands, 2014 and 2015
- 5.47D Locations Received Illicit Drug or Alcohol Treatment in Past Year among Persons Who Received Illicit Drug or Alcohol Treatment at a Specialty Facility in Past Year, by Age Group: Standard Errors of Percentages, 2014 and 2015
- 5.48C Received Substance Use Treatment at a Specialty Facility in Past Year among Persons Aged 12 or Older, by Past Year Substance Use Disorder Status: Standard Errors of Numbers in Thousands, 2014 and 2015
- 5.48D Received Substance Use Treatment at a Specialty Facility in Past Year among Persons Aged 12 or Older, by Past Year Substance Use Disorder Status: Standard Errors of Percentages, 2014 and 2015
- 5.49C Received Substance Use Treatment at a Specialty Facility in Past Year among Persons Aged 12 or Older, by Past Year Substance Use Disorder of Specific Substances: Standard Errors of Numbers in Thousands, 2014 and 2015
- 5.49D Received Substance Use Treatment at a Specialty Facility in Past Year among Persons Aged 12 or Older, by Past Year Substance Use Disorder of Specific Substances: Standard Errors of Percentages, 2014 and 2015
- 5.50C Need for and Receipt of Treatment at a Specialty Facility for an Illicit Drug Problem in Past Year, by Detailed Age Category: Standard Errors of Numbers in Thousands and Standard Errors of Percentages, 2014 and 2015
- 5.50D Need for and Receipt of Treatment at a Specialty Facility for an Illicit Drug Problem in Past Year, by Detailed Age Category: Standard Errors of Percentages, 2014 and 2015
- 5.51C Need for and Receipt of Treatment at a Specialty Facility for an Illicit Drug Problem in Past Year among Persons Aged 12 or Older, by Demographic Characteristics: Standard Errors of Numbers in Thousands and Standard Errors of Percentages, 2014 and 2015
- 5.51D Need for and Receipt of Treatment at a Specialty Facility for an Illicit Drug Problem in Past Year among Persons Aged 12 or Older, by Demographic Characteristics: Standard Errors of Percentages, 2014 and 2015
- 5.52C Need for and Receipt of Treatment at a Specialty Facility for an Illicit Drug Problem in Past Year among Persons Aged 18 or Older, by Demographic Characteristics: Standard Errors of Numbers in Thousands and Standard Errors of Percentages, 2014 and 2015
- 5.52D Need for and Receipt of Treatment at a Specialty Facility for an Illicit Drug Problem in Past Year among Persons Aged 18 or Older, by Demographic Characteristics: Standard Errors of Percentages, 2014 and 2015
- 5.53C Need for and Receipt of Treatment at a Specialty Facility for an Illicit Drug Problem in Past Year among Persons Aged 12 or Older, by Geographic Characteristics: Standard Errors of Numbers in Thousands and Standard Errors of Percentages, 2014 and 2015
- 5.53D Need for and Receipt of Treatment at a Specialty Facility for an Illicit Drug Problem in Past Year among Persons Aged 12 or Older, by Geographic Characteristics: Standard Errors of Percentages, 2014 and 2015

LIST OF TABLES (Continued)

Table

- 5.54C Perceived Need for Illicit Drug Treatment and Whether Made an Effort to Get Treatment in Past Year among Persons Aged 12 or Older Classified as Needing But Not Receiving Treatment for an Illicit Drug Problem, by Demographic Characteristics: Standard Errors of Numbers in Thousands, 2014 and 2015
- 5.54D Perceived Need for Illicit Drug Treatment and Whether Made an Effort to Get Treatment in Past Year among Persons Aged 12 or Older Classified as Needing But Not Receiving Treatment for an Illicit Drug Problem, by Demographic Characteristics: Standard Errors of Percentages, 2014 and 2015
- 5.55C Need for and Receipt of Treatment at a Specialty Facility for an Alcohol Problem in Past Year among Persons Aged 12 or Older, by Demographic Characteristics: Standard Errors of Numbers in Thousands and Standard Errors of Percentages, 2014 and 2015
- 5.55D Need for and Receipt of Treatment at a Specialty Facility for an Alcohol Problem in Past Year among Persons Aged 12 or Older, by Demographic Characteristics: Standard Errors of Percentages, 2014 and 2015
- 5.56C Need for and Receipt of Treatment at a Specialty Facility for an Alcohol Problem in Past Year among Persons Aged 18 or Older, by Demographic Characteristics: Standard Errors of Numbers in Thousands and Standard Errors of Percentages, 2014 and 2015
- 5.56D Need for and Receipt of Treatment at a Specialty Facility for an Alcohol Problem in Past Year among Persons Aged 18 or Older, by Demographic Characteristics: Standard Errors of Percentages, 2014 and 2015
- 5.57C Perceived Need for Alcohol Treatment and Whether Made an Effort to Get Treatment in Past Year among Persons Aged 12 or Older Classified as Needing But Not Receiving Treatment for an Alcohol Problem, by Demographic Characteristics: Standard Errors of Numbers in Thousands, 2014 and 2015
- 5.57D Perceived Need for Alcohol Treatment and Whether Made an Effort to Get Treatment in Past Year among Persons Aged 12 or Older Classified as Needing But Not Receiving Treatment for an Alcohol Problem, by Demographic Characteristics: Standard Errors of Percentages, 2014 and 2015
- 5.58C Need for and Receipt of Treatment at a Specialty Facility for an Illicit Drug or Alcohol Problem in Past Year among Persons Aged 12 or Older, by Demographic Characteristics: Standard Errors of Numbers in Thousands and Standard Errors of Percentages, 2014 and 2015
- 5.58D Need for and Receipt of Treatment at a Specialty Facility for an Illicit Drug or Alcohol Problem in Past Year among Persons Aged 12 or Older, by Demographic Characteristics: Standard Errors of Percentages, 2014 and 2015
- 5.59C Need for and Receipt of Treatment at a Specialty Facility for an Illicit Drug or Alcohol Problem in Past Year among Persons Aged 18 or Older, by Demographic Characteristics: Standard Errors of Numbers in Thousands and Standard Errors of Percentages, 2014 and 2015
- 5.59D Need for and Receipt of Treatment at a Specialty Facility for an Illicit Drug or Alcohol Problem in Past Year among Persons Aged 18 or Older, by Demographic Characteristics: Standard Errors of Percentages, 2014 and 2015
- 5.60C Perceived Need for Illicit Drug or Alcohol Treatment and Whether Made an Effort to Get Treatment in Past Year among Persons Aged 12 or Older Classified as Needing But Not Receiving Treatment for an Illicit Drug or Alcohol Problem, by Demographic Characteristics: Standard Errors of Numbers in Thousands, 2014 and 2015
- 5.60D Perceived Need for Illicit Drug or Alcohol Treatment and Whether Made an Effort to Get Treatment in Past Year among Persons Aged 12 or Older Classified as Needing But Not Receiving Treatment for an Illicit Drug or Alcohol Problem, by Demographic Characteristics: Standard Errors of Percentages, 2014 and 2015
- 5.61C Detailed Reasons for Not Receiving Illicit Drug or Alcohol Treatment in Past Year among Persons Aged 12 or Older Classified as Needing but Not Receiving Illicit Drug or Alcohol Treatment at a Specialty Facility and Who Felt a Need for Illicit Drug or Alcohol Treatment in Past Year: Standard Errors of Numbers in Thousands, 2015
- 5.61D Detailed Reasons for Not Receiving Illicit Drug or Alcohol Treatment in Past Year among Persons Aged 12 or Older Classified as Needing but Not Receiving Illicit Drug or Alcohol Treatment at a Specialty Facility and Who Felt a Need for Illicit Drug or Alcohol Treatment in Past Year: Standard Errors of Percentages, 2015

LIST OF TABLES (Continued)

Table

- 5.62C Detailed Reasons for Not Receiving Illicit Drug or Alcohol Treatment in Past Year among Persons Aged 18 or Older Classified as Needing but Not Receiving Illicit Drug or Alcohol Treatment at a Specialty Facility and Who Felt a Need for Illicit Drug or Alcohol Treatment in Past Year: Standard Errors of Numbers in Thousands, 2015
- 5.62D Detailed Reasons for Not Receiving Illicit Drug or Alcohol Treatment in Past Year among Persons Aged 18 or Older Classified as Needing but Not Receiving Illicit Drug or Alcohol Treatment at a Specialty Facility and Who Felt a Need for Illicit Drug or Alcohol Treatment in Past Year: Standard Errors of Percentages, 2015
- 6.1C Number of Days Used Marijuana in Past Year among Past Year Users and Number of Days Used Marijuana in Past Month among Past Month Users, by Age Group: Standard Errors of Numbers in Thousands, 2014 and 2015
- 6.1D Number of Days Used Marijuana in Past Year among Past Year Users and Number of Days Used Marijuana in Past Month among Past Month Users, by Age Group: Standard Errors of Percentages, 2014 and 2015
- 6.1P Number of Days Used Marijuana in Past Year among Past Year Users and Number of Days Used Marijuana in Past Month among Past Month Users, by Age Group: *P* Values from Tests of Differences of Percentages, 2015 Versus 2014
- 6.2C Number of Days Used Cocaine in Past Year among Past Year Users and Number of Days Used Cocaine in Past Month among Past Month Users, by Age Group: Standard Errors of Numbers in Thousands, 2014 and 2015
- 6.2D Number of Days Used Cocaine in Past Year among Past Year Users and Number of Days Used Cocaine in Past Month among Past Month Users, by Age Group: Standard Errors of Percentages, 2014 and 2015
- 6.2P Number of Days Used Cocaine in Past Year among Past Year Users and Number of Days Used Cocaine in Past Month among Past Month Users, by Age Group: *P* Values from Tests of Differences of Percentages, 2015 Versus 2014
- 6.3C Number of Days Used Hallucinogens in Past Year among Past Year Users and Number of Days Used Hallucinogens in Past Month among Past Month Users, by Age Group: Standard Errors of Numbers in Thousands, 2014 and 2015
- 6.3D Number of Days Used Hallucinogens in Past Year among Past Year Users and Number of Days Used Hallucinogens in Past Month among Past Month Users, by Age Group: Standard Errors of Percentages, 2014 and 2015
- 6.4C Number of Days Used Inhalants in Past Year among Past Year Users and Number of Days Used Inhalants in Past Month among Past Month Users, by Age Group: Standard Errors of Numbers in Thousands, 2014 and 2015
- 6.4D Number of Days Used Inhalants in Past Year among Past Year Users and Number of Days Used Inhalants in Past Month among Past Month Users, by Age Group: Standard Errors of Percentages, 2014 and 2015
- 6.5C Number of Days Used Methamphetamine in Past Year among Past Year Users and Number of Days Used Methamphetamine in Past Month among Past Month Users, by Age Group: Standard Errors of Numbers in Thousands, 2014 and 2015
- 6.5D Number of Days Used Methamphetamine in Past Year among Past Year Users and Number of Days Used Methamphetamine in Past Month among Past Month Users, by Age Group: Standard Errors of Percentages, 2014 and 2015
- 6.6C Number of Days Misused Prescription Psychotherapeutic Drugs in Past Month among Past Month Misusers, by Age Group: Standard Errors of Numbers in Thousands and Averages, 2014 and 2015
- 6.6D Number of Days Misused Prescription Psychotherapeutic Drugs in Past Month among Past Month Misusers, by Age Group: Standard Errors of Percentages and Averages, 2014 and 2015
- 6.7C Number of Days Used Cigarettes in Past Month among Past Month Users and Number of Cigarettes Smoked Per Day among Daily Smokers, by Age Group: Standard Errors of Numbers in Thousands, 2014 and 2015
- 6.7D Number of Days Used Cigarettes in Past Month among Past Month Users and Number of Cigarettes Smoked Per Day among Daily Smokers, by Age Group: Standard Errors of Percentages, 2014 and 2015
- 6.7P Number of Days Used Cigarettes in Past Month among Past Month Users and Number of Cigarettes Smoked Per Day among Daily Smokers, by Age Group: *P* Values from Tests of Differences of Percentages, 2015 Versus 2014

LIST OF TABLES (Continued)

Table

- 6.8C Number of Days Used Alcohol in Past Year among Past Year Users and Number of Days Used Alcohol in Past Month among Past Month Users, by Age Group: Standard Errors of Numbers in Thousands, 2014 and 2015

LIST OF TABLES (Continued)

Table

6.43C	Tobacco Product Use in Past Month among Persons Aged 26 or Older, by Levels of Past Month Alcohol Use: Standard Errors of Numbers in Thousands, 2014 and 2015
6.43D	Tobacco Product Use in Past Month among Persons Aged 26 or Older, by Levels of Past Month Alcohol Use: Standard Errors of Percentages, 2014 and 2015
6.43P	Tobacco Product Use in Past Month among Persons Aged 26 or Older, by Levels of Past Month Alcohol Use: <i>P</i> Values from Tests of Differences of Percentages, 2015 Versus 2014
6.44C	Marijuana Use in Prior Year and Past Year Marijuana Use Status among Persons Aged 12 or Older, by Demographic Characteristics: Standard Errors of Numbers in Thousands, 2014 and 2015
6.44D	Marijuana Use in Prior Year and Past Year Marijuana Use Status among Persons Aged 12 or Older, by Demographic Characteristics: Standard Errors of Percentages, 2014 and 2015
6.44P	Marijuana Use in Prior Year and Past Year Marijuana Use Status among Persons Aged 12 or Older, by Demographic Characteristics: <i>P</i> Values from Tests of Differences of Percentages, 2015 Versus 2014
6.45C	Cigarette Use and Nicotine (Cigarette) Dependence in Past Month among Persons Aged 12 or Older, by Detailed Age Category: Standard Errors of Numbers in Thousands and Standard Errors of Percentages, 2014 and 2015
6.45D	Cigarette Use and Nicotine (Cigarette) Dependence in Past Month among Persons Aged 12 or Older, by Detailed Age Category: Standard Errors of Percentages, 2014 and 2015
6.45P	Cigarette Use and Nicotine (Cigarette) Dependence in Past Month among Persons Aged 12 or Older, by Detailed Age Category: <i>P</i> Values from Tests of Differences of Percentages, 2015 Versus 2014
6.46C	Nicotine (Cigarette) Dependence in Past Month among Persons Aged 12 or Older, by Age Group and Demographic Characteristics: Standard Errors of Numbers in Thousands, 2014 and 2015
6.46D	Nicotine (Cigarette) Dependence in Past Month among Persons Aged 12 or Older, by Age Group and Demographic Characteristics: Standard Errors of Percentages, 2014 and 2015
6.46P	Nicotine (Cigarette) Dependence in Past Month among Persons Aged 12 or Older, by Age Group and Demographic Characteristics: <i>P</i> Values from Tests of Differences of Percentages, 2015 Versus 2014
6.47C	Nicotine (Cigarette) Dependence in Past Month among Persons Aged 12 or Older, by Age Group and Geographic Characteristics: Standard Errors of Numbers in Thousands, 2014 and 2015
6.47D	Nicotine (Cigarette) Dependence in Past Month among Persons Aged 12 or Older, by Age Group and Geographic Characteristics: Standard Errors of Percentages, 2014 and 2015
6.47P	Nicotine (Cigarette) Dependence in Past Month among Persons Aged 12 or Older, by Age Group and Geographic Characteristics: <i>P</i> Values from Tests of Differences of Percentages, 2015 Versus 2014
6.48C	Nicotine (Cigarette) Dependence in Past Month among Past Month Cigarette Smokers Aged 18 or Older, by Age First Used Cigarettes and Demographic Characteristics: Standard Errors of Numbers in Thousands, 2014 and 2015
6.48D	Nicotine (Cigarette) Dependence in Past Month among Past Month Cigarette Smokers Aged 18 or Older, by Age First Used Cigarettes and Demographic Characteristics: Standard Errors of Percentages, 2014 and 2015
6.48P	Nicotine (Cigarette) Dependence in Past Month among Past Month Cigarette Smokers Aged 18 or Older, by Age First Used Cigarettes and Demographic Characteristics: <i>P</i> Values from Tests of Differences of Percentages, 2015 Versus 2014
6.49C	Nicotine (Cigarette) Dependence in Past Month among Past Month Cigarette Smokers Aged 18 or Older, by Age First Used Cigarettes Daily and Demographic Characteristics: Standard Errors of Numbers in Thousands, 2014 and 2015
6.49D	Nicotine (Cigarette) Dependence in Past Month among Past Month Cigarette Smokers Aged 18 or Older, by Age First Used Cigarettes Daily and Demographic Characteristics: Standard Errors of Percentages, 2014 and 2015
6.49P	Nicotine (Cigarette) Dependence in Past Month among Past Month Cigarette Smokers Aged 18 or Older, by Age First Used Cigarettes Daily and Demographic Characteristics: <i>P</i> Values from Tests of Differences of Percentages, 2015 Versus 2014
6.50C	Illicit Drug Use Disorder in Past Year among Persons Aged 18 or Older, by Age First Used Marijuana and Demographic Characteristics: Standard Errors of Numbers in Thousands, 2014 and 2015
6.50D	Illicit Drug Use Disorder in Past Year among Persons Aged 18 or Older, by Age First Used Marijuana and Demographic Characteristics: Standard Errors of Percentages, 2014 and 2015

- 8.28C Co-Occurring Substance Use Disorder and Any Mental Illness in Past Year among Persons Aged 18 or Older, by Age Group, Geographic Characteristics, and Socioeconomic Characteristics: Standard Errors of Numbers in Thousands, 2014 and 2015
- 8.28D Co-Occurring Substance Use Disorder and Any Mental Illness in Past Year among Persons Aged 18 or Older, by Age Group, Geographic Characteristics, and Socioeconomic Characteristics: Standard Errors of Percentages, 2014 and 2015
- 8.29C Co-Occurring Substance Use Disorder and Serious Mental Illness in Past Year among Persons Aged 18 or Older, by Age Group and Demographic Characteristics: Standard Errors of Numbers in Thousands, 2014 and 2015
- 8.29D Co-Occurring Substance Use Disorder and Serious Mental Illness in Past Year among Persons Aged 18 or Older, by Age Group and Demographic Characteristics: Standard Errors of Percentages, 2014 and 2015
- 8.30C Co-Occurring Substance Use Disorder and Serious Mental Illness in Past Year among Persons Aged 18 or Older, by Age Group, Geographic Characteristics, and Socioeconomic Characteristics: Standard Errors of Numbers in Thousands, 2014 and 2015
- 8.30D Co-Occurring Substance Use Disorder and Serious Mental Illness in Past Year among Persons Aged 18 or Older, by Age Group, Geographic Characteristics, and Socioeconomic Characteristics: Standard Errors of Percentages, 2014 and 2015
- 8.31C Co-Occurring Substance Use Disorder and Any Mental Illness Excluding Serious Mental Illness in Past Year among Persons Aged 18 or Older, by Age Group and Demographic Characteristics: Standard Errors of Numbers in Thousands, 2014 and 2015
- 8.31D Co-Occurring Substance Use Disorder and Any Mental Illness Excluding Serious Mental Illness in Past Year among Persons Aged 18 or Older, by Age Group and Demographic Characteristics: Standard Errors of Percentages, 2014 and 2015
- 8.32C Co-Occurring Substance Use Disorder and Any Mental Illness Excluding Serious Mental Illness in Past Year among Persons Aged 18 or Older, by Age Group, Geographic Characteristics, and Socioeconomic Characteristics: Standard Errors of Numbers in Thousands, 2014 and 2015
- 8.32D Co-Occurring Substance Use Disorder and Any Mental Illness Excluding Serious Mental Illness in Past Year among Persons Aged 18 or Older, by Age Group, Geographic Characteristics, and Socioeconomic Characteristics: Standard Errors of Percentages, 2014 and 2015
- 8.33C Any Mental Illness and Serious Mental Illness in Past Year among Persons Aged 18 or Older, by Past Year Probation Status and Demographic Characteristics: Standard Errors of Numbers in Thousands, 2014 and 2015
- 8.33D Any Mental Illness and Serious Mental Illness in Past Year among Persons Aged 18 or Older, by Past Year Probation Status and Demographic Characteristics: Standard Errors of Percentages, 2014 and 2015
- 8.33P Any Mental Illness and Serious Mental Illness in Past Year among Persons Aged 18 or Older, by Past Year Probation Status and Demographic Characteristics: *P* Values from Tests of Differences of Percentages, 2015 Versus 2014
- 8.34C Any Mental Illness and Serious Mental Illness in Past Year among Persons Aged 18 or Older, by Past Year Parole/Supervised Release Status and Demographic Characteristics: Standard Errors of Numbers in Thousands, 2014 and 2015
- 8.34D Any Mental Illness and Serious Mental Illness in Past Year among Persons Aged 18 or Older, by Past Year Parole/Supervised Release Status and Demographic Characteristics: Standard Errors of Percentages, 2014 and 2015
- 8.34P Any Mental Illness and Serious Mental Illness in Past Year among Persons Aged 18 or Older, by Past Year Parole/Supervised Release Status and Demographic Characteristics: *P* Values from Tests of Differences of Percentages, 2015 Versus 2014

LIST OF TABLES (Continued)

Table

- 8.35C Received Mental Health Treatment/Counseling in Past Year among Persons Aged 18 or Older, by Past Year Level of Mental Illness and Demographic Characteristics: Standard Errors of Numbers in Thousands, 2014 and 2015
- 8.35D Received Mental Health Treatment/Counseling in Past Year among Persons Aged 18 or Older, by Past Year Level of Mental Illness and Demographic Characteristics: Standard Errors of Percentages, 2014 and 2015
- 8.35P Received Mental Health Treatment/Counseling in Past Year among Persons Aged 18 or Older, by Past Year Level of Mental Illness and Demographic Characteristics: *P* Values from Tests of Differences of Percentages, 2015 Versus 2014
- 8.36C Received Mental Health Treatment/Counseling in Past Year among Persons Aged 18 or Older, by Past Year Level of Mental Illness, Geographic Characteristics, and Socioeconomic Characteristics: Standard Errors of Numbers in Thousands, 2014 and 2015
- 8.36D Received Mental Health Treatment/Counseling in Past Year among Persons Aged 18 or Older, by Past Year Level of Mental Illness, Geographic Characteristics, and Socioeconomic Characteristics: Standard Errors of Percentages, 2014 and 2015
- 8.36P Received Mental Health Treatment/Counseling in Past Year among Persons Aged 18 or Older, by Past Year Level of Mental Illness, Geographic Characteristics, and Socioeconomic Characteristics: *P* Values from Tests of Differences of Percentages, 2015 Versus 2014
- 8.37C Received Inpatient Mental Health Treatment/Counseling in Past Year among Persons Aged 18 or Older, by Past Year Level of Mental Illness, Demographic Characteristics, and Socioeconomic Characteristics: Standard Errors of Numbers in Thousands, 2014 and 2015
- 8.37D Received Inpatient Mental Health Treatment/Counseling in Past Year among Persons Aged 18 or Older, by Past Year Level of Mental Illness, Demographic Characteristics, and Socioeconomic Characteristics: Standard Errors of Percentages, 2014 and 2015
- 8.37P Received Inpatient Mental Health Treatment/Counseling in Past Year among Persons Aged 18 or Older, by Past Year Level of Mental Illness, Demographic Characteristics, and Socioeconomic Characteristics: *P* Values from Tests of Differences of Percentages, 2015 Versus 2014
- 8.38C Received Outpatient Mental Health Treatment/Counseling in Past Year among Persons Aged 18 or Older, by Past Year Level of Mental Illness, Demographic Characteristics, and Socioeconomic Characteristics: Standard Errors of Numbers in Thousands, 2014 and 2015
- 8.38D Received Outpatient Mental Health Treatment/Counseling in Past Year among Persons Aged 18 or Older, by Past Year Level of Mental Illness, Demographic Characteristics, and Socioeconomic Characteristics: Standard Errors of Percentages, 2014 and 2015
- 8.38P Received Outpatient Mental Health Treatment/Counseling in Past Year among Persons Aged 18 or Older, by Past Year Level of Mental Illness, Demographic Characteristics, and Socioeconomic Characteristics: *P* Values from Tests of Differences of Percentages, 2015 Versus 2014
- 8.39C Received Prescription Medication as a Type of Mental Health Treatment/Counseling in Past Year among Persons Aged 18 or Older, by Past Year Level of Mental Illness, Demographic Characteristics, and Socioeconomic Characteristics: Standard Errors of Numbers in Thousands, 2014 and 2015
- 8.39D Received Prescription Medication as a Type of Mental Health Treatment/Counseling in Past Year among Persons Aged 18 or Older, by Past Year Level of Mental Illness, Demographic Characteristics, and Socioeconomic Characteristics: Standard Errors of Percentages, 2014 and 2015
- 8.39P Received Prescription Medication as a Type of Mental Health Treatment/Counseling in Past Year among Persons Aged 18 or Older, by Past Year Level of Mental Illness, Demographic Characteristics, and Socioeconomic Characteristics: *P* Values from Tests of Differences of Percentages, 2015 Versus 2014
- 8.40C Received Mental Health Treatment/Counseling and/or Illicit Drug or Alcohol Treatment at a Specialty Facility in Past Year among Persons Aged 18 or Older with Past Year Substance Use Disorder, by Past Year Level of Mental Illness and Age Group: Standard Errors of Numbers in Thousands, 2014 and 2015
- 8.40D Received Mental Health Treatment/Counseling and/or Illicit Drug or Alcohol Treatment at a Specialty Facility in Past Year among Persons Aged 18 or Older with Past Year Substance Use Disorder, by Past Year Level of Mental Illness and Age Group: Standard Errors of Percentages, 2014 and 2015
- 8.41C Types of Mental Health Treatment/Counseling Received in Past Year among Persons Aged 18 or Older, by Past Year Level of Mental Illness: Standard Errors of Numbers in Thousands, 2014 and 2015
- 8.41D Types of Mental Health Treatment/Counseling Received in Past Year among Persons Aged 18 or Older, by Past Year Level of Mental Illness: Standard Errors of Percentages, 2014 and 2015

LIST OF TABLES (Continued)

Table

- 8.42C Types of Mental Health Treatment/Counseling Received in Past Year among Persons Aged 18 or Older Who Received Mental Health Treatment/Counseling in Past Year, by Past Year Level of Mental Illness: Standard Errors of Numbers in Thousands, 2014 and 2015
- 8.42D Types of Mental Health Treatment/Counseling Received in Past Year among Persons Aged 18 or Older Who Received Mental Health Treatment/Counseling in Past Year, by Past Year Level of Mental Illness: Standard Errors of Percentages, 2014 and 2015
- 8.43C Locations of Outpatient Mental Health Treatment/Counseling among Persons Aged 18 or Older Who Received Outpatient Mental Health Treatment/Counseling in Past Year, by Past Year Level of Mental Illness: Standard Errors of Numbers in Thousands, 2014 and 2015
- 8.43D Locations of Outpatient Mental Health Treatment/Counseling among Persons Aged 18 or Older Who Received Outpatient Mental Health Treatment/Counseling in Past Year, by Past Year Level of Mental Illness: Standard Errors of Percentages, 2014 and 2015
- 8.44C Types and Locations of Mental Health Treatment/Counseling Received in Past Year among Persons Aged 18 or Older, by Past Year Level of Mental Illness: Standard Errors of Numbers in Thousands, 2014 and 2015
- 8.44D Types and Locations of Mental Health Treatment/Counseling Received in Past Year among Persons Aged 18 or Older, by Past Year Level of Mental Illness: Standard Errors of Percentages, 2014 and 2015
- 8.45C Received Mental Health Treatment/Counseling and/or Illicit Drug or Alcohol Treatment at a Specialty Facility in Past Year among Persons Aged 18 or Older, by Past Year Substance Use Disorder Status and Past Year Level of Mental Illness: Standard Errors of Numbers in Thousands, 2014 and 2015
- 8.45D Received Mental Health Treatment/Counseling and/or Illicit Drug or Alcohol Treatment at a Specialty Facility in Past Year among Persons Aged 18 or Older, by Past Year Substance Use Disorder Status and Past Year Level of Mental Illness: Standard Errors of Percentages, 2014 and 2015
- 8.46C Types of Mental Health Treatment/Counseling Received in Past Year among Persons Aged 18 or Older Who Received Mental Health Treatment/Counseling in Past Year, by Age Group: Standard Errors of Numbers in Thousands, 2014 and 2015
- 8.46D Types of Mental Health Treatment/Counseling Received in Past Year among Persons Aged 18 or Older Who Received Mental Health Treatment/Counseling in Past Year, by Age Group: Standard Errors of Percentages, 2014 and 2015
- 8.46P Types of Mental Health Treatment/Counseling Received in Past Year among Persons Aged 18 or Older Who Received Mental Health Treatment/Counseling in Past Year, by Age Group: *P* Values from Tests of Differences of Percentages, 2015 Versus 2014
- 8.47C Locations of Outpatient Mental Health Treatment/Counseling among Persons Aged 18 or Older Who Received Outpatient Mental Health Treatment/Counseling in Past Year, by Age Group: Standard Errors of Numbers in Thousands, 2014 and 2015
- 8.47D Locations of Outpatient Mental Health Treatment/Counseling among Persons Aged 18 or Older Who Received Outpatient Mental Health Treatment/Counseling in Past Year, by Age Group: Standard Errors of Percentages, 2014 and 2015
- 8.47P Locations of Outpatient Mental Health Treatment/Counseling among Persons Aged 18 or Older Who Received Outpatient Mental Health Treatment/Counseling in Past Year, by Age Group: *P* Values from Tests of Differences of Percentages, 2015 Versus 2014
- 8.48C Sources of Payment for Outpatient Mental Health Treatment/Counseling among Persons Aged 18 or Older Who Received Outpatient Mental Health Treatment/Counseling in Past Year, by Age Group: Standard Errors of Numbers in Thousands, 2014 and 2015
- 8.48D Sources of Payment for Outpatient Mental Health Treatment/Counseling among Persons Aged 18 or Older Who Received Outpatient Mental Health Treatment/Counseling in Past Year, by Age Group: Standard Errors of Percentages, 2014 and 2015
- 8.48P Sources of Payment for Outpatient Mental Health Treatment/Counseling among Persons Aged 18 or Older Who Received Outpatient Mental Health Treatment/Counseling in Past Year, by Age Group: *P* Values from Tests of Differences of Percentages, 2015 Versus 2014

LIST OF TABLES (Continued)

Table

- 8.49C Perceived Unmet Need for Mental Health Treatment/Counseling in Past Year among Persons Aged 18 or Older, by Receipt of Past Year Mental Health Treatment/Counseling and Demographic Characteristics: Standard Errors of Numbers in Thousands, 2014 and 2015
- 8.49D Perceived Unmet Need for Mental Health Treatment/Counseling in Past Year among Persons Aged 18 or Older, by Receipt of Past Year Mental Health Treatment/Counseling and Demographic Characteristics: Standard Errors of Percentages, 2014 and 2015
- 8.49P Perceived Unmet Need for Mental Health Treatment/Counseling in Past Year among Persons Aged 18 or Older, by Receipt of Past Year Mental Health Treatment/Counseling and Demographic Characteristics: *P* Values from Tests of Differences of Percentages, 2015 Versus 2014
- 8.50C Perceived Unmet Need for Mental Health Treatment/Counseling in Past Year among Persons Aged 18 or Older, by Receipt of Past Year Mental Health Treatment/Counseling, Geographic Characteristics, and Socioeconomic Characteristics: Standard Errors of Numbers in Thousands, 2014 and 2015
- 8.50D Perceived Unmet Need for Mental Health Treatment/Counseling in Past Year among Persons Aged 18 or Older, by Receipt of Past Year Mental Health Treatment/Counseling, Geographic Characteristics, and Socioeconomic Characteristics: Standard Errors of Percentages, 2014 and 2015
- 8.50P Perceived Unmet Need for Mental Health Treatment/Counseling in Past Year among Persons Aged 18 or Older, by Receipt of Past Year Mental Health Treatment/Counseling, Geographic Characteristics, and Socioeconomic Characteristics: *P* Values from Tests of Differences of Percentages, 2015 Versus 2014
- 8.51C Perceived Unmet Need for Mental Health Treatment/Counseling in Past Year among Persons Aged 18 or Older with Past Year Any Mental Illness, by Receipt of Past Year Mental Health Treatment/Counseling and Demographic Characteristics: Standard Errors of Numbers in Thousands, 2014 and 2015
- 8.51D Perceived Unmet Need for Mental Health Treatment/Counseling in Past Year among Persons Aged 18 or Older with Past Year Any Mental Illness, by Receipt of Past Year Mental Health Treatment/Counseling and Demographic Characteristics: Standard Errors of Percentages, 2014 and 2015
- 8.51P Perceived Unmet Need for Mental Health Treatment/Counseling in Past Year among Persons Aged 18 or Older with Past Year Any Mental Illness, by Receipt of Past Year Mental Health Treatment/Counseling and Demographic Characteristics: *P* Values from Tests of Differences of Percentages, 2015 Versus 2014
- 8.52C Perceived Unmet Need for Mental Health Treatment/Counseling in Past Year among Persons Aged 18 or Older with Past Year Any Mental Illness, by Receipt of Past Year Mental Health Treatment/Counseling, Geographic Characteristics, and Socioeconomic Characteristics: Standard Errors of Numbers in Thousands, 2014 and 2015
- 8.52D Perceived Unmet Need for Mental Health Treatment/Counseling in Past Year among Persons Aged 18 or Older with Past Year Any Mental Illness, by Receipt of Past Year Mental Health Treatment/Counseling, Geographic Characteristics, and Socioeconomic Characteristics: Standard Errors of Percentages, 2014 and 2015
- 8.52P Perceived Unmet Need for Mental Health Treatment/Counseling in Past Year among Persons Aged 18 or Older with Past Year Any Mental Illness, by Receipt of Past Year Mental Health Treatment/Counseling, Geographic Characteristics, and Socioeconomic Characteristics: *P* Values from Tests of Differences of Percentages, 2015 Versus 2014
- 8.53C Perceived Unmet Need for Mental Health Treatment/Counseling in Past Year among Persons Aged 18 or Older with Past Year Serious Mental Illness, by Receipt of Past Year Mental Health Treatment/Counseling and Demographic Characteristics: Standard Errors of Numbers in Thousands, 2014 and 2015
- 8.53D Perceived Unmet Need for Mental Health Treatment/Counseling in Past Year among Persons Aged 18 or Older with Past Year Serious Mental Illness, by Receipt of Past Year Mental Health Treatment/Counseling and Demographic Characteristics: Standard Errors of Percentages, 2014 and 2015
- 8.53P Perceived Unmet Need for Mental Health Treatment/Counseling in Past Year among Persons Aged 18 or Older with Past Year Serious Mental Illness, by Receipt of Past Year Mental Health Treatment/Counseling and Demographic Characteristics: *P* Values from Tests of Differences of Percentages, 2015 Versus 2014

Table

- 8.54C Perceived Unmet Need for Mental Health Treatment/Counseling in Past Year among Persons Aged 18 or Older with Past Year Serious Mental Illness, by Receipt of Past Year Mental Health Treatment/Counseling, Geographic Characteristics, and Socioeconomic Characteristics: Standard Errors of Numbers in Thousands, 2014 and 2015
- 8.54D Perceived Unmet Need for Mental Health Treatment/Counseling in Past Year among Persons Aged 18 or Older with Past Year Serious Mental Illness, by Receipt of Past Year Mental Health Treatment/Counseling, Geographic Characteristics, and Socioeconomic Characteristics: Standard Errors of Percentages, 2014 and 2015
- 8.54P Perceived Unmet Need for Mental Health Treatment/Counseling in Past Year among Persons Aged 18 or Older with Past Year Serious Mental Illness, by Receipt of Past Year Mental Health Treatment/Counseling, Geographic Characteristics, and Socioeconomic Characteristics: *P* Values from Tests of Differences of Percentages, 2015 Versus 2014
- 8.55C Detailed Reasons for Not Receiving Mental Health Treatment/Counseling in Past Year among Persons Aged 18 or Older with a Perceived Unmet Need for Mental Health Treatment/Counseling in Past Year, by Receipt of Past Year Mental Health Treatment/Counseling: Standard Errors of Numbers in Thousands, 2014 and 2015
- 8.55D Detailed Reasons for Not Receiving Mental Health Treatment/Counseling in Past Year among Persons Aged 18 or Older with a Perceived Unmet Need for Mental Health Treatment/Counseling in Past Year, by Receipt of Past Year Mental Health Treatment/Counseling: Standard Errors of Percentages, 2014 and 2015
- 8.55P Detailed Reasons for Not Receiving Mental Health Treatment/Counseling in Past Year among Persons Aged 18 or Older with a Perceived Unmet Need for Mental Health Treatment/Counseling in Past Year, by Receipt of Past Year Mental Health Treatment/Counseling: *P* Values from Tests of Differences of Percentages, 2015 Versus 2014
- 8.56C Detailed Reasons for Not Receiving Mental Health Treatment/Counseling in Past Year among Persons Aged 18 or Older with Past Year Any Mental Illness and a Perceived Unmet Need for Mental Health Treatment/Counseling in Past Year, by Receipt of Past Year Mental Health Treatment/Counseling: Standard Errors of Numbers in Thousands, 2014 and 2015
- 8.56D Detailed Reasons for Not Receiving Mental Health Treatment/Counseling in Past Year among Persons Aged 18 or Older with Past Year Any Mental Illness and a Perceived Unmet Need for Mental Health Treatment/Counseling in Past Year, by Receipt of Past Year Mental Health Treatment/Counseling: Standard Errors of Percentages, 2014 and 2015
- 8.56P Detailed Reasons for Not Receiving Mental Health Treatment/Counseling in Past Year among Persons Aged 18 or Older with Past Year Any Mental Illness and a Perceived Unmet Need for Mental Health Treatment/Counseling in Past Year, by Receipt of Past Year Mental Health Treatment/Counseling: *P* Values from Tests of Differences of Percentages, 2015 Versus 2014
- 8.57C Detailed Reasons for Not Receiving Mental Health Treatment/Counseling in Past Year among Persons Aged 18 or Older with Past Year Serious Mental Illness and a Perceived Unmet Need for Mental Health Treatment/Counseling in Past Year, by Receipt of Past Year Mental Health Treatment/Counseling: Standard Errors of Numbers in Thousands, 2014 and 2015
- 8.57D Detailed Reasons for Not Receiving Mental Health Treatment/Counseling in Past Year among Persons Aged 18 or Older with Past Year Serious Mental Illness and a Perceived Unmet Need for Mental Health Treatment/Counseling in Past Year, by Receipt of Past Year Mental Health Treatment/Counseling: Standard Errors of Percentages, 2014 and 2015
- 8.57P Detailed Reasons for Not Receiving Mental Health Treatment/Counseling in Past Year among Persons Aged 18 or Older with Past Year Serious Mental Illness and a Perceived Unmet Need for Mental Health Treatment/Counseling in Past Year, by Receipt of Past Year Mental Health Treatment/Counseling: *P* Values from Tests of Differences of Percentages, 2015 Versus 2014
- 8.58C Major Depressive Episode (MDE) in Past Year among Persons Aged 18 or Older, by Gender and Detailed Age Category: Standard Errors of Numbers in Thousands, 2014 and 2015
- 8.58D Major Depressive Episode (MDE) in Past Year among Persons Aged 18 or Older, by Gender and Detailed Age Category: Standard Errors of Percentages, 2014 and 2015
- 8.58P Major Depressive Episode (MDE) in Past Year among Persons Aged 18 or Older, by Gender and Detailed Age Category: *P* Values from Tests of Differences of Percentages, 2015 Versus 2014

LIST OF TABLES (Continued)

Table

- 8.59C Had at Least One Major Depressive Episode (MDE) or MDE with Severe Impairment in Past Year among Persons Aged 18 or Older, and Receipt of Treatment for Depression in Past Year among Persons Aged 18 or Older with MDE or MDE with Severe Impairment in Past Year, by Gender and Age Group: Standard Errors of Numbers in Thousands, 2014 and 2015
- 8.59D Had at Least One Major Depressive Episode (MDE) or MDE with Severe Impairment in Past Year among Persons Aged 18 or Older, and Receipt of Treatment for Depression in Past Year among Persons Aged 18 or Older with MDE or MDE with Severe Impairment in Past Year, by Gender and Age Group: Standard Errors of Percentages, 2014 and 2015
- 8.59P Had at Least One Major Depressive Episode (MDE) or MDE with Severe Impairment in Past Year among Persons Aged 18 or Older, and Receipt of Treatment for Depression in Past Year among Persons Aged 18 or Older with MDE or MDE with Severe Impairment in Past Year, by Gender and Age Group: *P* Values from Tests of Differences of Percentages, 2015 Versus 2014
- 8.60C Had at Least One Major Depressive Episode (MDE) or MDE with Severe Impairment in Past Year among Persons Aged 18 or Older, and Receipt of Treatment for Depression in Past Year among Persons Aged 18 or Older with MDE or MDE with Severe Impairment in Past Year, by Demographic Characteristics: Standard Errors of Numbers in Thousands, 2014 and 2015
- 8.60D Had at Least One Major Depressive Episode (MDE) or MDE with Severe Impairment in Past Year among Persons Aged 18 or Older, and Receipt of Treatment for Depression in Past Year among Persons Aged 18 or Older with MDE or MDE with Severe Impairment in Past Year, by Demographic Characteristics: Standard Errors of Percentages, 2014 and 2015
- 8.60P Had at Least One Major Depressive Episode (MDE) or MDE with Severe Impairment in Past Year among Persons Aged 18 or Older, and Receipt of Treatment for Depression in Past Year among Persons Aged 18 or Older with MDE or MDE with Severe Impairment in Past Year, by Demographic Characteristics: *P* Values from Tests of Differences of Percentages, 2015 Versus 2014
- 8.61C Had at Least One Major Depressive Episode (MDE) or MDE with Severe Impairment in Past Year among Persons Aged 18 or Older, and Receipt of Treatment for Depression in Past Year among Persons Aged 18 or Older with MDE or MDE with Severe Impairment in Past Year, by Geographic, Socioeconomic, and Health Characteristics: Standard Errors of Numbers in Thousands, 2014 and 2015
- 8.61D Had at Least One Major Depressive Episode (MDE) or MDE with Severe Impairment in Past Year among Persons Aged 18 or Older, and Receipt of Treatment for Depression in Past Year among Persons Aged 18 or Older with MDE or MDE with Severe Impairment in Past Year, by Geographic, Socioeconomic, and Health Characteristics: Standard Errors of Percentages, 2014 and 2015
- 8.61P Had at Least One Major Depressive Episode (MDE) or MDE with Severe Impairment in Past Year among Persons Aged 18 or Older, and Receipt of Treatment for Depression in Past Year among Persons Aged 18 or Older with MDE or MDE with Severe Impairment in Past Year, by Geographic, Socioeconomic, and Health Characteristics: *P* Values from Tests of Differences of Percentages, 2015 Versus 2014
- 8.62C Substance Use in Past Year and Past Month among Persons Aged 18 or Older, by Past Year Major Depressive Episode (MDE) Status: Standard Errors of Numbers in Thousands, 2014 and 2015
- 8.62D Substance Use in Past Year and Past Month among Persons Aged 18 or Older, by Past Year Major Depressive Episode (MDE) Status: Standard Errors of Percentages, 2014 and 2015
- 8.62P Substance Use in Past Year and Past Month among Persons Aged 18 or Older, by Past Year Major Depressive Episode (MDE) Status: *P* Values from Tests of Differences of Percentages, 2015 Versus 2014
- 8.63C Substance Use Disorder Status in Past Year among Persons Aged 18 or Older, by Past Year Major Depressive Episode (MDE) Status: Standard Errors of Numbers in Thousands, 2014 and 2015
- 8.63D Substance Use Disorder Status in Past Year among Persons Aged 18 or Older, by Past Year Major Depressive Episode (MDE) Status: Standard Errors of Percentages, 2014 and 2015
- 8.63P Substance Use Disorder Status in Past Year among Persons Aged 18 or Older, by Past Year Major Depressive Episode (MDE) Status: *P* Values from Tests of Differences of Percentages, 2015 Versus 2014

LIST OF TABLES (Continued)

Table

- 8.64C Types of Professional Seen among Persons Aged 18 or Older with Major Depressive Episode (MDE) or MDE with Severe Impairment in Past Year Who Saw or Talked to a Professional about Depression in Past Year: Standard Errors of Numbers in Thousands, 2014 and 2015
- 8.64D Types of Professional Seen among Persons Aged 18 or Older with Major Depressive Episode (MDE) or MDE with Severe Impairment in Past Year Who Saw or Talked to a Professional about Depression in Past Year: Standard Errors of Percentages, 2014 and 2015
- 8.64P Types of Professional Seen among Persons Aged 18 or Older with Major Depressive Episode (MDE) or MDE with Severe Impairment in Past Year Who Saw or Talked to a Professional about Depression in Past Year: *P* Values from Tests of Differences of Percentages, 2015 Versus 2014
- 8.65C Types of Professional Seen among Persons Aged 18 or Older with a Past Year Major Depressive Episode (MDE) Who Saw or Talked to a Professional about Depression in Past Year, by Age Group: Standard Errors of Numbers in Thousands, 2014 and 2015
- 8.65D Types of Professional Seen among Persons Aged 18 or Older with a Past Year Major Depressive Episode (MDE) Who Saw or Talked to a Professional about Depression in Past Year, by Age Group: Standard Errors of Percentages, 2014 and 2015
- 8.65P Types of Professional Seen among Persons Aged 18 or Older with a Past Year Major Depressive Episode (MDE) Who Saw or Talked to a Professional about Depression in Past Year, by Age Group: *P* Values from Tests of Differences of Percentages, 2015 Versus 2014
- 8.66C Type of Treatment Received in Past Year for Depression among Persons Aged 18 or Older with a Past Year Major Depressive Episode (MDE), by Demographic and Socioeconomic Characteristics: Standard Errors of Numbers in Thousands, 2014 and 2015
- 8.66D Type of Treatment Received in Past Year for Depression among Persons Aged 18 or Older with a Past Year Major Depressive Episode (MDE), by Demographic and Socioeconomic Characteristics: Standard Errors of Percentages, 2014 and 2015
- 8.66P Type of Treatment Received in Past Year for Depression among Persons Aged 18 or Older with a Past Year Major Depressive Episode (MDE), by Demographic and Socioeconomic Characteristics: *P* Values from Tests of Differences of Percentages, 2015 Versus 2014
- 8.67C Received Mental Health Treatment/Counseling and/or Illicit Drug or Alcohol Treatment at a Specialty Facility in Past Year among Persons 18 or Older, by Past Year Substance Use Disorder and Major Depressive Episode (MDE) Status and Age Group: Standard Errors of Numbers in Thousands, 2014 and 2015
- 8.67D Received Mental Health Treatment/Counseling and/or Illicit Drug or Alcohol Treatment at a Specialty Facility in Past Year among Persons 18 or Older, by Past Year Substance Use Disorder and Major Depressive Episode (MDE) Status and Age Group: Standard Errors of Percentages, 2014 and 2015
- 8.68C Had Serious Thoughts of Suicide in Past Year among Persons Aged 18 or Older, by Gender and Detailed Age Category: Standard Errors of Numbers in Thousands, 2014 and 2015
- 8.68D Had Serious Thoughts of Suicide in Past Year among Persons Aged 18 or Older, by Gender and Detailed Age Category: Standard Errors of Percentages, 2014 and 2015
- 8.68P Had Serious Thoughts of Suicide in Past Year among Persons Aged 18 or Older, by Gender and Detailed Age Category: *P* Values from Tests of Differences of Percentages, 2015 Versus 2014
- 8.69C Made Any Suicide Plans in Past Year among Persons Aged 18 or Older, by Gender and Detailed Age Category: Standard Errors of Numbers in Thousands, 2014 and 2015
- 8.69D Made Any Suicide Plans in Past Year among Persons Aged 18 or Older, by Gender and Detailed Age Category: Standard Errors of Percentages, 2014 and 2015
- 8.69P Made Any Suicide Plans in Past Year among Persons Aged 18 or Older, by Gender and Detailed Age Category: *P* Values from Tests of Differences of Percentages, 2015 Versus 2014
- 8.70C Attempted Suicide in Past Year among Persons Aged 18 or Older, by Gender and Detailed Age Category: Standard Errors of Numbers in Thousands, 2014 and 2015
- 8.70D Attempted Suicide in Past Year among Persons Aged 18 or Older, by Gender and Detailed Age Category: Standard Errors of Percentages, 2014 and 2015
- 8.70P Attempted Suicide in Past Year among Persons Aged 18 or Older, by Gender and Detailed Age Category: *P* Values from Tests of Differences of Percentages, 2015 Versus 2014

8.71C	Had Serious Thoughts of Suicide in Past Year among Persons Aged 18 or Older, by Age Group and Demographic Characteristics: Standard Errors of Numbers in Thousands, 2014 and 2015
8.71D	Had Serious Thoughts of Suicide in Past Year among Persons Aged 18 or Older, by Age Group and Demographic Characteristics: Standard Errors of Percentages, 2014 and 2015
8.71P	Had Serious Thoughts of Suicide in Past Year among Persons Aged 18 or Older, by Age Group and Demographic Characteristics: <i>P</i> Values from Tests of Differences of Percentages, 2015 Versus 2014
8.72C	Made Any Suicide Plans in Past Year among Persons Aged 18 or Older, by Age Group and Demographic Characteristics: Standard Errors of Numbers in Thousands, 2014 and 2015
8.72D	Made Any Suicide Plans in Past Year among Persons Aged 18 or Older, by Age Group and Demographic Characteristics: Standard Errors of Percentages, 2014 and 2015
8.72P	Made Any Suicide Plans in Past Year among Persons Aged 18 or Older, by Age Group and Demographic Characteristics: <i>P</i> Values from Tests of Differences of Percentages, 2015 Versus 2014
8.73C	Attempted Suicide in Past Year among Persons Aged 18 or Older, by Age Group and Demographic Characteristics: Standard Errors of Numbers in Thousands, 2014 and 2015
8.73D	Attempted Suicide in Past Year among Persons Aged 18 or Older, by Age Group and Demographic Characteristics: Standard Errors of Percentages, 2014 and 2015
8.73P	Attempted Suicide in Past Year among Persons Aged 18 or Older, by Age Group and Demographic Characteristics: <i>P</i> Values from Tests of Differences of Percentages, 2015 Versus 2014
8.74C	Made Any Suicide Plans or Attempted Suicide in Past Year among Persons Aged 18 or Older Who Had Serious Thoughts of Suicide in Past Year, by Age Group and Gender: Standard Errors of Numbers in Thousands, 2014 and 2015
8.74D	Made Any Suicide Plans or Attempted Suicide in Past Year among Persons Aged 18 or Older Who Had Serious Thoughts of Suicide in Past Year, by Age Group and Gender: Standard Errors of Percentages, 2014 and 2015
8.74P	Made Any Suicide Plans or Attempted Suicide in Past Year among Persons Aged 18 or Older Who Had Serious Thoughts of Suicide in Past Year, by Age Group and Gender: <i>P</i> Values from Tests of Differences of Percentages, 2015 Versus 2014
8.75C	Had Serious Thoughts of Suicide in Past Year among Persons Aged 18 or Older, by Age Group, Geographic Characteristics, and Socioeconomic Characteristics: Standard Errors of Numbers in Thousands, 2014 and 2015
8.75D	Had Serious Thoughts of Suicide in Past Year among Persons Aged 18 or Older, by Age Group, Geographic Characteristics, and Socioeconomic Characteristics: Standard Errors of Percentages, 2014 and 2015
8.75P	Had Serious Thoughts of Suicide in Past Year among Persons Aged 18 or Older, by Age Group, Geographic Characteristics, and Socioeconomic Characteristics: <i>P</i> Values from Tests of Differences of Percentages, 2015 Versus 2014
8.76C	Had Serious Thoughts of Suicide, Made Any Suicide Plans, or Attempted Suicide in Past Year among Persons Aged 18 or Older, by Demographic and Socioeconomic Characteristics: Standard Errors of Numbers in Thousands, 2014 and 2015
8.76D	Had Serious Thoughts of Suicide, Made Any Suicide Plans, or Attempted Suicide in Past Year among Persons Aged 18 or Older, by Demographic and Socioeconomic Characteristics: Standard Errors of Percentages, 2014 and 2015
8.76P	Had Serious Thoughts of Suicide, Made Any Suicide Plans, or Attempted Suicide in Past Year among Persons Aged 18 or Older, by Demographic and Socioeconomic Characteristics: <i>P</i> Values from Tests of Differences of Percentages, 2015 Versus 2014

LIST OF TABLES (Continued)

Table

- 8.77C Attempted Suicide in Past Year among Persons Aged 18 or Older, Received Medical Attention for Suicide Attempt, or Stayed Overnight or Longer in a Hospital for Suicide Attempt in Past Year among Persons Aged 18 or Older Who Attempted Suicide in Past Year, by Demographic and Socioeconomic Characteristics: Standard Errors of Numbers in Thousands, 2014 and 2015
- 8.77D Attempted Suicide in Past Year among Persons Aged 18 or Older, Received Medical Attention for Suicide Attempt, or Stayed Overnight or Longer in a Hospital for Suicide Attempt in Past Year among Persons Aged 18 or Older Who Attempted Suicide in Past Year, by Demographic and Socioeconomic Characteristics: Standard Errors of Percentages, 2014 and 2015
- 8.77P Attempted Suicide in Past Year among Persons Aged 18 or Older, Received Medical Attention for Suicide Attempt, or Stayed Overnight or Longer in a Hospital for Suicide Attempt in Past Year among Persons Aged 18 or Older Who Attempted Suicide in Past Year, by Demographic and Socioeconomic Characteristics: *P* Values from Tests of Differences of Percentages, 2015 Versus 2014
- 8.78C Had Serious Thoughts of Suicide, Made Any Suicide Plans, or Attempted Suicide in Past Year among Persons Aged 18 or Older, by Type of Illicit Drug Use in Past Year and Alcohol Use in Past Year and Past Month: Standard Errors of Numbers in Thousands, 2014 and 2015
- 8.78D Had Serious Thoughts of Suicide, Made Any Suicide Plans, or Attempted Suicide in Past Year among Persons Aged 18 or Older, by Type of Illicit Drug Use in Past Year and Alcohol Use in Past Year and Past Month: Standard Errors of Percentages, 2014 and 2015
- 8.78P Had Serious Thoughts of Suicide, Made Any Suicide Plans, or Attempted Suicide in Past Year among Persons Aged 18 or Older, by Type of Illicit Drug Use in Past Year and Alcohol Use in Past Year and Past Month: *P* Values from Tests of Differences of Percentages, 2015 Versus 2014
- 8.79C Had Serious Thoughts of Suicide in Past Year among Persons Aged 18 or Older, by Past Year Probation Status and Demographic Characteristics: Standard Errors of Numbers in Thousands, 2014 and 2015
- 8.79D Had Serious Thoughts of Suicide in Past Year among Persons Aged 18 or Older, by Past Year Probation Status and Demographic Characteristics: Standard Errors of Percentages, 2014 and 2015
- 8.79P Had Serious Thoughts of Suicide in Past Year among Persons Aged 18 or Older, by Past Year Probation Status and Demographic Characteristics: *P* Values from Tests of Differences of Percentages, 2015 Versus 2014
- 8.80C Had Serious Thoughts of Suicide in Past Year among Persons Aged 18 or Older, by Past Year Parole/Supervised Release Status and Demographic Characteristics: Standard Errors of Numbers in Thousands, 2014 and 2015
- 8.80D Had Serious Thoughts of Suicide in Past Year among Persons Aged 18 or Older, by Past Year Parole/Supervised Release Status and Demographic Characteristics: Standard Errors of Percentages, 2014 and 2015
- 8.80P Had Serious Thoughts of Suicide in Past Year among Persons Aged 18 or Older, by Past Year Parole/Supervised Release Status and Demographic Characteristics: *P* Values from Tests of Differences of Percentages, 2015 Versus 2014
- 8.81C Suicide Behavior and Treatment, Level of Mental Illness, Major Depressive Episode, and Mental Health Treatment/Counseling among Persons Aged 18 to 22, by College Enrollment Status: Standard Errors of Numbers in Thousands, 2014 and 2015
- 8.81D Suicide Behavior and Treatment, Level of Mental Illness, Major Depressive Episode, and Mental Health Treatment/Counseling among Persons Aged 18 to 22, by College Enrollment Status: Standard Errors of Percentages, 2014 and 2015
- 8.81P Suicide Behavior and Treatment, Level of Mental Illness, Major Depressive Episode, and Mental Health Treatment/Counseling among Persons Aged 18 to 22, by College Enrollment Status: *P* Values from Tests of Differences of Percentages, 2015 Versus 2014
- 8.82C Suicide Behavior and Treatment, Level of Mental Illness, Major Depressive Episode, and Mental Health Treatment/Counseling among Males Aged 18 to 22, by College Enrollment Status: Standard Errors of Numbers in Thousands, 2014 and 2015
- 8.82D Suicide Behavior and Treatment, Level of Mental Illness, Major Depressive Episode, and Mental Health Treatment/Counseling among Males Aged 18 to 22, by College Enrollment Status: Standard Errors of Percentages, 2014 and 2015
- 8.82P Suicide Behavior and Treatment, Level of Mental Illness, Major Depressive Episode, and Mental Health Treatment/Counseling among Males Aged 18 to 22, by College Enrollment Status: *P* Values from Tests of Differences of Percentages, 2015 Versus 2014

10.10C	Received Mental Health Treatment/Counseling in Past Year among Persons Aged 18 or Older with Past Year Serious Mental Illness, by Demographic Characteristics: Standard Errors of Numbers in Thousands, 2008-2015
10.10D	Received Mental Health Treatment/Counseling in Past Year among Persons Aged 18 or Older with Past Year Serious Mental Illness, by Demographic Characteristics: Standard Errors of Percentages, 2008-2015
10.10P	Received Mental Health Treatment/Counseling in Past Year among Persons Aged 18 or Older with Past Year Serious Mental Illness, by Demographic Characteristics: <i>P</i> Values from Tests of Differences of Percentages, 2015 Versus 2008-2014
10.11C	Received Mental Health Treatment/Counseling in Past Year among Persons Aged 18 or Older with Past Year Serious Mental Illness, by Geographic and Socioeconomic Characteristics: Standard Errors of Numbers in Thousands, 2008-2015
10.11D	Received Mental Health Treatment/Counseling in Past Year among Persons Aged 18 or Older with Past Year Serious Mental Illness, by Geographic and Socioeconomic Characteristics: Standard Errors of Percentages, 2008-2015
10.11P	Received Mental Health Treatment/Counseling in Past Year among Persons Aged 18 or Older with Past Year Serious Mental Illness, by Geographic and Socioeconomic Characteristics: <i>P</i> Values from Tests of Differences of Percentages, 2015 Versus 2008-2014
10.12C	Received Mental Health Treatment/Counseling in Past Year among Persons Aged 18 or Older with No Past Year Mental Illness, by Demographic Characteristics: Standard Errors of Numbers in Thousands, 2008-2015
10.12D	Received Mental Health Treatment/Counseling in Past Year among Persons Aged 18 or Older with No Past Year Mental Illness, by Demographic Characteristics: Standard Errors of Percentages, 2008-2015
10.12P	Received Mental Health Treatment/Counseling in Past Year among Persons Aged 18 or Older with No Past Year Mental Illness, by Demographic Characteristics: <i>P</i> Values from Tests of Differences of Percentages, 2015 Versus 2008-2014

LIST OF TABLES (Continued)

Table

- 10.13C Received Mental Health Treatment/Counseling in Past Year among Persons Aged 18 or Older with No Past Year Mental Illness, by Geographic and Socioeconomic Characteristics: Standard Errors of Numbers in Thousands, 2008-2015
- 10.13D Received Mental Health Treatment/Counseling in Past Year among Persons Aged 18 or Older with No Past Year Mental Illness, by Geographic and Socioeconomic Characteristics: Standard Errors of Percentages, 2008-2015
- 10.13P Received Mental Health Treatment/Counseling in Past Year among Persons Aged 18 or Older with No Past Year Mental Illness, by Geographic and Socioeconomic Characteristics: *P* Values from Tests of Differences of Percentages, 2015 Versus 2008-2014
- 10.14C Received Mental Health Treatment/Counseling in Past Year among Persons Aged 18 or Older with Past Year Any Mental Illness Excluding Serious Mental Illness, by Demographic Characteristics: Standard Errors of Numbers in Thousands, 2008-2015
- 10.14D Received Mental Health Treatment/Counseling in Past Year among Persons Aged 18 or Older with Past Year Any Mental Illness Excluding Serious Mental Illness, by Demographic Characteristics: Standard Errors of Percentages, 2008-2015
- 10.14P Received Mental Health Treatment/Counseling in Past Year among Persons Aged 18 or Older with Past Year Any Mental Illness Excluding Serious Mental Illness, by Demographic Characteristics: *P* Values from Tests of Differences of Percentages, 2015 Versus 2008-2014
- 10.15C Received Only Prescription Medication as a Type of Mental Health Treatment/Counseling in Past Year among Persons Aged 18 or Older Who Received Mental Health Treatment/Counseling in Past Year, by Past Year Level of Mental Illness and Age Group: Standard Errors of Numbers in Thousands, 2008-2015
- 10.15D Received Only Prescription Medication as a Type of Mental Health Treatment/Counseling in Past Year among Persons Aged 18 or Older Who Received Mental Health Treatment/Counseling in Past Year, by Past Year Level of Mental Illness and Age Group: Standard Errors of Percentages, 2008-2015
- 10.15P Received Only Prescription Medication as a Type of Mental Health Treatment/Counseling in Past Year among Persons Aged 18 or Older Who Received Mental Health Treatment/Counseling in Past Year, by Past Year Level of Mental Illness and Age Group: *P* Values from Tests of Differences of Percentages, 2015 Versus 2008-2014
- 10.16C Receipt of Mental Health Treatment/Counseling in Past Year among Persons Aged 18 or Older with a Perceived Unmet Need for Mental Health Treatment/Counseling in Past Year, by Age Group: Standard Errors of Numbers in Thousands, 2002-2015
- 10.16D Receipt of Mental Health Treatment/Counseling in Past Year among Persons Aged 18 or Older with a Perceived Unmet Need for Mental Health Treatment/Counseling in Past Year, by Age Group: Standard Errors of Percentages, 2002-2015
- 10.16P Receipt of Mental Health Treatment/Counseling in Past Year among Persons Aged 18 or Older with a Perceived Unmet Need for Mental Health Treatment/Counseling in Past Year, by Age Group: *P* Values from Tests of Differences of Percentages, 2015 Versus 2002-2014
- 10.17C Receipt of Mental Health Treatment/Counseling in Past Year among Persons Aged 18 or Older with a Past Year Any Mental Illness and a Perceived Unmet Need for Mental Health Treatment/Counseling in Past Year, by Age Group: Standard Errors of Numbers in Thousands, 2008-2015
- 10.17D Receipt of Mental Health Treatment/Counseling in Past Year among Persons Aged 18 or Older with a Past Year Any Mental Illness and a Perceived Unmet Need for Mental Health Treatment/Counseling in Past Year, by Age Group: Standard Errors of Percentages, 2008-2015
- 10.17P Receipt of Mental Health Treatment/Counseling in Past Year among Persons Aged 18 or Older with a Past Year Any Mental Illness and a Perceived Unmet Need for Mental Health Treatment/Counseling in Past Year, by Age Group: *P* Values from Tests of Differences of Percentages, 2015 Versus 2008-2014

* = low precision; -- = not available; da = does not apply; nc = not comparable due to methodological changes; nr = not reported due to measurement issues.

NOTE: Misuse of prescription drugs is defined as use in any way not directed by a doctor, including use without a prescription of one's own medication; use in greater amounts, more often, or longer than told to take a drug; or use in any other way not directed by a doctor. Prescription drugs do not include over-the-counter drugs.

^a The difference between this estimate and the 2015 estimate is statistically significant at the .05 level. Rounding may make the estimates appear identical.

^b The difference between this estimate and the 2015 estimate is statistically significant at the .01 level. Rounding may make the estimates appear identical.

¹ Illicit Drug Use includes the misuse of prescription psychotherapeutics or the use of marijuana, cocaine (including crack), heroin, hallucinogens, inhalants, or methamphetamine. Illicit Drug Use Other Than Marijuana Use includes the misuse of prescription psychotherapeutics or the use of cocaine (including crack), heroin, hallucinogens, inhalants, or methamphetamine.

² Illicit Drug Use in the Lifetime includes the misuse of prescription psychotherapeutics even though those estimates are not reported due to potential underreporting.

³ Prescription Psychotherapeutics include pain relievers, tranquilizers, stimulants, or sedatives and do not include over-the-counter drugs.

* = low precision; -- = not available; da = does not apply; nc = not comparable due to methodological changes; nr = not reported due to measurement issues.

NOTE: Misuse of prescription drugs is defined as use in any way not directed by a doctor, including use without a prescription of one's own medication; use in greater amounts, more often, or longer than told to take a drug; or use in any other way not directed by a doctor. Prescription drugs do not include over-the-counter drugs.

^a The difference between this estimate and the 2015 estimate is statistically significant at the .05 level. Rounding may make the estimates appear identical.

^b The difference between this estimate and the 2015 estimate is statistically significant at the .01 level. Rounding may make the estimates appear identical.

¹ Illicit Drug Use includes the misuse of prescription psychotherapeutics or the use of marijuana, cocaine (including crack), heroin, hallucinogens, inhalants, or methamphetamine. Illicit Drug Use Other Than Marijuana Use includes the misuse of prescription psychotherapeutics or the use of cocaine (including crack), heroin, hallucinogens, inhalants, or methamphetamine.

² Illicit Drug Use in the Lifetime includes the misuse of prescription psychotherapeutics even though those estimates are not reported due to potential underreporting.

³ Prescription Psychotherapeutics include pain relievers, tranquilizers, stimulants, or sedatives and do not include over-the-counter drugs.

* = low precision; -- = not available; da = does not apply; nc = not comparable due to methodological changes; nr = not reported due to measurement issues.

NOTE: Misuse of prescription drugs is defined as use in any way not directed by a doctor, including use without a prescription of one's own medication; use in greater amounts, more often, or longer than told to take a drug; or use in any other way not directed by a doctor. Prescription drugs do not include over-the-counter drugs.

^a The difference between this estimate and the 2015 estimate is statistically significant at the .05 level. Rounding may make the estimates appear identical.

^b The difference between this estimate and the 2015 estimate is statistically significant at the .01 level. Rounding may make the estimates appear identical.

¹ Illicit Drug Use includes the misuse of prescription psychotherapeutics or the use of marijuana, cocaine (including crack), heroin, hallucinogens, inhalants, or methamphetamine. Illicit Drug Use Other Than Marijuana Use includes the misuse of prescription psychotherapeutics or the use of cocaine (including crack), heroin, hallucinogens, inhalants, or methamphetamine.

² Illicit Drug Use in the Lifetime includes the misuse of prescription psychotherapeutics even though those estimates are not reported due to potential underreporting.

³ Prescription Psychotherapeutics include pain relievers, tranquilizers, stimulants, or sedatives and do not include over-the-counter drugs.

NOTE: Prescription psychotherapeutics include pain relievers, tranquilizers, stimulants, or sedatives and do not include over-the-counter drugs.

NOTE: Any Use of prescription drugs is defined as (a) the use of one's own prescription medication as directed by a doctor or (b) misuse of prescription drugs. Misuse of prescription drugs is defined as use in any way not directed by a doctor, including use without a prescription of one's own medication; use in greater amounts, more often, or longer than told to take a drug; or use in any other way not directed by a doctor. Prescription drugs do not include over-the-counter drugs.

NOTE: Prescription psychotherapeutics include pain relievers, tranquilizers, stimulants, or sedatives and do not include over-the-counter drugs.

NOTE: Any Use of prescription drugs is defined as (a) the use of one's own prescription medication as directed by a doctor or (b) misuse of prescription drugs. Misuse of prescription drugs is defined as use in any way not directed by a doctor, including use without a prescription of one's own medication; use in greater amounts, more often, or longer than told to take a drug; or use in any other way not directed by a doctor. Prescription drugs do not include over-the-counter drugs.

NOTE: Illicit Drug Use includes the misuse of prescription psychotherapeutics or the use of marijuana, cocaine (including crack), heroin, hallucinogens, inhalants, or methamphetamine.

NOTE: Misuse of prescription drugs is defined as use in any way not directed by a doctor, including use without a prescription of one's own medication; use in greater amounts, more often, or longer than told to take a drug; or use in any other way not directed by a doctor. Prescription drugs do not include over-the-counter drugs.

¹ The Other Employment category includes students, persons keeping house or caring for children full time, retired or disabled persons, or other persons not in the labor force.

NOTE: Any Use of prescription drugs is defined as (a) the use of one's own prescription medication as directed by a doctor or (b) misuse of prescription drugs. Misuse of prescription drugs is defined as use in any way not directed by a doctor, including use without a prescription of one's own medication; use in greater amounts, more often, or longer than told to take a drug; or use in any other way not directed by a doctor. Prescription drugs do not include over-the-counter drugs.

NOTE: Any Use of prescription drugs is defined as (a) the use of one's own prescription medication as directed by a doctor or (b) misuse of prescription drugs. Misuse of prescription drugs is defined as use in any way not directed by a doctor, including use without a prescription of one's own medication; use in greater amounts, more often, or longer than told to take a drug; or use in any other way not directed by a doctor. Prescription drugs do not include over-the-counter drugs.

NOTE: Illicit Drug Use includes the misuse of prescription psychotherapeutics or the use of marijuana, cocaine (including crack), heroin, hallucinogens, inhalants, or methamphetamine.

NOTE: Misuse of prescription drugs is defined as use in any way not directed by a doctor, including use without a prescription of one's own medication; use in greater amounts, more often, or longer than told to take a drug; or use in any other way not directed by a doctor. Prescription drugs do not include over-the-counter drugs.

¹ Due to the use of the 2013 Rural-Urban Continuum Codes in the creation of the county type variables, the 2014 estimates may differ from previously published estimates.

NOTE: Any Use of prescription drugs is defined as (a) the use of one's own prescription medication as directed by a doctor or (b) misuse of prescription drugs. Misuse of prescription drugs is defined as use in any way not directed by a doctor, including use without a prescription of one's own medication; use in greater amounts, more often, or longer than told to take a drug; or use in any other way not directed by a doctor. Prescription drugs do not include over-the-counter drugs.

NOTE: Prescription psychotherapeutics include pain relievers, tranquilizers, stimulants, or sedatives and do not include over-the-counter drugs.

¹ Due to the use of the 2013 Rural-Urban Continuum Codes in the creation of the county type variables, the 2014 estimates may differ from previously published estimates.

NOTE: Any Use of prescription drugs is defined as (a) the use of one's own prescription medication as directed by a doctor or (b) misuse of prescription drugs. Misuse of prescription drugs is defined as use in any way not directed by a doctor, including use without a prescription of one's own medication; use in greater amounts, more often, or longer than told to take a drug; or use in any other way not directed by a doctor. Prescription drugs do not include over-the-counter drugs.

¹ Due to the use of the 2013 Rural-Urban Continuum Codes in the creation of the county type variables, the 2014 estimates may differ from previously published estimates.

Misuse of prescription drugs is defined as use in any way not directed by a doctor, including use without a prescription of one's own medication; use in greater amounts, more often, or longer than told to take a drug; or use in any other way not directed by a doctor. Prescription drugs do not include over-the-counter drugs.

¹ Due to the use of the 2013 Rural-Urban Continuum Codes in the creation of the county type variables, the 2014 estimates may differ from previously published estimates.

NOTE: Any Use of prescription drugs is defined as (a) the use of one's own prescription medication as directed by a doctor or (b) misuse of prescription drugs. Misuse of prescription drugs is defined as use in any way not directed by a doctor, including use without a prescription of one's own medication; use in greater amounts, more often, or longer than told to take a drug; or use in any other way not directed by a doctor. Prescription drugs do not include over-the-counter drugs.

¹ Due to the use of the 2013 Rural-Urban Continuum Codes in the creation of the county type variables, the 2014 estimates may differ from previously published estimates.

^a The difference between this estimate and the 2015 estimate is statistically significant at the .05 level. Rounding may make the estimates appear identical.

^b The difference between this estimate and the 2015 estimate is statistically significant at the .01 level. Rounding may make the estimates appear identical.

¹ Refers to lifetime use of a needle to inject a drug that was not prescribed, or that was taken only for the experience or feeling it caused.

² These estimates may be inconsistent with estimates presented in other detailed tables because NSDUH data are not edited for consistency across discrete sections of the interview, except with regard to skip logic.

NOTE: Any Use of prescription drugs is defined as (a) the use of one's own prescription medication as directed by a doctor or (b) misuse of prescription drugs. Misuse of prescription drugs is defined as use in any way not directed by a doctor, including use without a prescription of one's own medication; use in greater amounts, more often, or longer than told to take a drug; or use in any other way not directed by a doctor. Prescription drugs do not include over-the-counter drugs.

¹ Includes *hydrocodone products* (Vicodin[®], Lortab[®], Norco[®], Zohydro[®] ER, generic hydrocodone, or other similar products); *oxycodone products* (OxyContin[®], Percocet[®], Percodan[®], Roxicet[®], Roxicodone[®], generic oxycodone, or other similar products); *tramadol products* (Ultram[®], Ultram[®] ER, Ultracet[®], generic tramadol, generic extended-release tramadol, or other similar products); *codeine products* (Tylenol[®] with codeine 3 or 4, generic codeine pills, or other similar products); *morphine products* (Avinza[®], Kadian[®], MS Contin[®], generic morphine, generic extended-release morphine, or other similar products); *fentanyl products* (Actiq[®], Duragesic[®], Fentora[®], generic fentanyl, or other similar products); *buprenorphine products* (Suboxone[®], generic buprenorphine, or other similar products); *oxymorphone products* (Opana[®], Opana[®] ER, generic oxymorphone, generic extended-release oxymorphone, or other similar products); *meperidine products* (Demerol[®] or other similar products); *hydromorphone products* (Dilaudid[®] or generic hydromorphone, Exalgo[®] or generic extended-release hydromorphone, or other similar products); *methadone products* (methadone or other similar products); or any other prescription pain reliever. Over-the-counter drugs are not included.

² Includes use or misuse of pain relievers containing other active ingredients. Reports of misuse of "any other prescription pain reliever" that correspond only to the specific pain reliever categories shown in the table are excluded from estimates for Any Other Prescription Pain Reliever and are included instead in the relevant pain reliever category.

NOTE: Any Use of prescription drugs is defined as (a) the use of one's own prescription medication as directed by a doctor or (b) misuse of prescription drugs. Misuse of prescription drugs is defined as use in any way not directed by a doctor, including use without a prescription of one's own medication; use in greater amounts, more often, or longer than told to take a drug; or use in any other way not directed by a doctor. Prescription drugs do not include over-the-counter drugs.

¹ Includes *hydrocodone products* (Vicodin[®], Lortab[®], Norco[®], Zohydro[®] ER, generic hydrocodone, or other similar products); *oxycodone products* (OxyContin[®], Percocet[®], Percodan[®], Roxicet[®], Roxicodone[®], generic oxycodone, or other similar products); *tramadol products* (Ultram[®], Ultram[®] ER, Ultracet[®], generic tramadol, generic extended-release tramadol, or other similar products); *codeine products* (Tylenol[®] with codeine 3 or 4, generic codeine pills, or other similar products); *morphine products* (Avinza[®], Kadian[®], MS Contin[®], generic morphine, generic extended-release morphine, or other similar products); *fentanyl products* (Actiq[®], Duragesic[®], Fentora[®], generic fentanyl, or other similar products); *buprenorphine products* (Suboxone[®], generic buprenorphine, or other similar products); *oxymorphone products* (Opana[®], Opana[®] ER, generic oxymorphone, generic extended-release oxymorphone, or other similar products); *meperidine products* (Demerol[®] or other similar products); *hydromorphone products* (Dilaudid[®] or generic hydromorphone, Exalgo[®] or generic extended-release hydromorphone, or other similar products); *methadone products* (methadone or other similar products); or any other prescription pain reliever. Over-the-counter drugs are not included.

² Includes use or misuse of pain relievers containing other active ingredients. Reports of misuse of "any other prescription pain reliever" that correspond only to the specific pain reliever categories shown in the table are excluded from estimates for Any Other Prescription Pain Reliever and are included instead in the relevant pain reliever category.

NOTE: Any Use of prescription drugs is defined as (a) the use of one's own prescription medication as directed by a doctor or (b) misuse of prescription drugs. Misuse of prescription drugs is defined as use in any way not directed by a doctor, including use without a prescription of one's own medication; use in greater amounts, more often, or longer than told to take a drug; or use in any other way not directed by a doctor. Prescription drugs do not include over-the-counter drugs.

¹ Includes *benzodiazepine tranquilizers* (see footnote 2); *muscle relaxants* (see footnote 3); *buspirone products* (also known as BuSpar[®] or other similar products), *hydroxyzine products* (also known as Atarax[®] or Vistaril[®] or similar products), *meprobamate products* (also known as Equanil[®] or Miltown[®] or similar products), or any other prescription tranquilizer.

² Includes *alprazolam products* (Xanax[®], Xanax[®] XR, generic alprazolam, generic extended-release alprazolam, or other similar products); *lorazepam products* (Ativan[®], generic lorazepam, or other similar products); *clonazepam products* (Klonopin[®], generic clonazepam, or other similar products), *diazepam products* (Valium[®], generic diazepam, or other similar products); or other benzodiazepine tranquilizers that were specified for misuse of "any other prescription tranquilizer."

³ Includes *cyclobenzaprine products* (Flexeril[®], generic cyclobenzaprine, or other similar products); *carisoprodol products* (Soma[®] or other similar products); or other muscle relaxants that were specified for misuse of "any other prescription tranquilizer."

⁴ Includes use or misuse of tranquilizers containing other active ingredients. Reports of misuse of "any other prescription tranquilizer" that correspond only to the specific tranquilizer categories shown in the table are excluded from estimates for Any Other Prescription Tranquilizer and are included instead in the relevant tranquilizer category.

Prescription drugs do not include over-the-counter drugs.

¹ Includes *benzodiazepine tranquilizers* (see footnote 2); *muscle relaxants* (see footnote 3); *buspirone products* (also known as BuSpar[®] or other similar products); *hydroxyzine products* (also known as Atarax[®] or Vistaril[®] or similar products); *meprobamate products* (also known as Equanil[®] or Miltown[®] or similar products); or any other prescription tranquilizer.

² Includes *alprazolam products* (Xanax[®], Xanax[®] XR, generic alprazolam, generic extended-release alprazolam, or other similar products); *lorazepam products* (Ativan[®], generic lorazepam, or other similar products); *clonazepam products* (Klonopin[®], generic clonazepam, or other similar products); *diazepam products* (Valium[®], generic diazepam, or other similar products); or other benzodiazepine tranquilizers that were specified for misuse of "any other prescription tranquilizer."

³ Includes *cyclobenzaprine products* (Flexeril[®], generic cyclobenzaprine, or other similar products); *carisoprodol products* (Soma[®] or other similar products); or other muscle relaxants that were specified for misuse of "any other prescription tranquilizer."

⁴ Includes use or misuse of tranquilizers containing other active ingredients. Reports of misuse of "any other prescription tranquilizer" that correspond only to the specific tranquilizer categories shown in the table are excluded from estimates for Any Other Prescription Tranquilizer and are included instead in the relevant tranquilizer category.

Any Other Prescription Stimulant ³	--	2,701	--	96	--	96

* = low precision; -- = not available; da = does not apply; nc = not comparable due to methodological changes; nr = not reported due to measurement issues.

NOTE: Any Use of prescription drugs is defined as (a) the use of one's own prescription medication as directed by a doctor or (b) misuse of prescription drugs. Misuse of prescription drugs is defined as use in any way not directed by a doctor, including use without a prescription of one's own medication; use in greater amounts, more often, or longer than told to take a drug; or use in any other way not directed by a doctor. Prescription drugs do not include over-the-counter drugs.

¹ Includes *amphetamine products* (Adderall[®], Adderall[®] XR, Dexedrine[®], Vyvanse[®], generic dextroamphetamine, generic amphetamine-dextroamphetamine combinations, generic extended-release amphetamine-dextroamphetamine combinations, or similar products); *methylphenidate products* (Ritalin[®], Ritalin[®] SR, Ritalin[®] LA, Concerta[®], Daytrana[®], Metadate CD, Metadate ER, Focalin, Focalin XR, generic methylphenidate, generic extended-release methylphenidate, generic dexmethylphenidate, generic extended-release dexmethylphenidate, or similar products); *anorectic (weight-loss) stimulants* (Didrex[®], benzphetamine, Tenuate[®], diethylpropion, phendimetrazine, phentermine or similar products); *modafinil products* (Provigil[®] or other similar products); or any other prescription stimulant.

² Includes amphetamine and methylphenidate products that are primarily prescribed for the treatment of attention-deficit/hyperactivity disorder (ADHD). Vyvanse[®] is included with amphetamine products because its active ingredient (lisdexamfetamine) is metabolized to dextroamphetamine.

³ Includes use or misuse of stimulants containing other active ingredients. Reports of misuse of "any other prescription stimulant" that correspond only to the specific stimulant categories shown in the table are excluded from estimates for Any Other Prescription Stimulant and are included instead in the relevant stimulant category.

Misuse of prescription drugs is defined as use in any way not directed by a doctor, including use without a prescription of one's own medication; use in greater amounts, more often, or longer than told to take a drug; or use in any other way not directed by a doctor. Prescription drugs do not include over-the-counter drugs.

¹ Includes *amphetamine products* (Adderall[®], Adderall[®] XR, Dexedrine[®], Vyvanse[®], generic dextroamphetamine, generic amphetamine-dextroamphetamine combinations, generic extended-release amphetamine-dextroamphetamine combinations, or similar products); *methylphenidate products* (Ritalin[®], Ritalin[®] SR, Ritalin[®] LA, Concerta[®], Daytrana[®], Metadate CD, Metadate ER, Focalin, Focalin XR, generic methylphenidate, generic extended-release methylphenidate, generic dexmethylphenidate, generic extended-release dexmethylphenidate, or similar products); *anorectic (weight-loss) stimulants* (Didrex[®], benzphetamine, Tenuate[®], diethylpropion, phendimetrazine, phentermine or similar products); *modafinil products* (Provigil[®] or other similar products); or any other prescription stimulant.

² Includes amphetamine and methylphenidate products that are primarily prescribed for the treatment of attention-deficit/hyperactivity disorder (ADHD). Vyvanse[®] is included with amphetamine products because its active ingredient (lisdexamfetamine) is metabolized to dextroamphetamine.

³ Includes use or misuse of stimulants containing other active ingredients. Reports of misuse of "any other prescription stimulant" that correspond only to the specific stimulant categories shown in the table are excluded from estimates for Any Other Prescription Stimulant and are included instead in the relevant stimulant category.

Prescription drugs do not include over-the-counter drugs.

¹ Includes *zolpidem products* (Ambien[®], Ambien[®] CR, generic zolpidem, extended-release generic zolpidem, or similar products); *eszopiclone products* (Lunesta[®], generic eszopiclone, or similar products); *zaleplon products* (Sonata[®], generic zaleplon, or similar products); *benzodiazepine sedatives* (see footnote 2); *barbiturates* (Butisol[®], Seconal[®], phenobarbital, or similar products); or any other prescription sedative.

² Includes *flurazepam products* (flurazepam [also known as Dalmane[®]] or other similar products), *temazepam products* (Restoril[®], generic temazepam, or other similar products); *triazolam products* (Halcion[®], generic triazolam, or other similar products); or other benzodiazepine sedatives that were specified for misuse of "any other prescription sedative."

³ Includes use or misuse of sedatives containing other active ingredients. Reports of misuse of "any other prescription sedative" that correspond only to the specific sedative categories shown in the table are excluded from estimates for Any Other Prescription Sedative and are included instead in the relevant sedative category.

* = low precision; -- = not available; da = does not apply; nc = not comparable due to methodological changes; nr = not reported due to measurement issues.

NOTE: Misuse of prescription drugs is defined as use in any way not directed by a doctor, including use without a prescription of one's own medication; use in greater amounts, more often, or longer than told to take a drug; or use in any other way not directed by a doctor. Prescription drugs do not include over-the-counter drugs.

¹ Illicit Drug Use includes the misuse of prescription psychotherapeutics or the use of marijuana, cocaine (including crack), heroin, hallucinogens, inhalants, or methamphetamine.

Illicit Drug Use Other Than Marijuana Use includes the misuse of prescription psychotherapeutics or the use of cocaine (including crack), heroin, hallucinogens, inhalants, or methamphetamine.

² Illicit Drug Use in the Lifetime includes the misuse of prescription psychotherapeutics even though those estimates are not reported due to potential underreporting.

³ Prescription Psychotherapeutics include pain relievers, tranquilizers, stimulants, or sedatives and do not include over-the-counter drugs.

* = low precision; -- = not available; da = does not apply; nc = not comparable due to methodological changes; nr = not reported due to measurement issues.

NOTE: Misuse of prescription drugs is defined as use in any way not directed by a doctor, including use without a prescription of one's own medication; use in greater amounts, more often, or longer than told to take a drug; or use in any other way not directed by a doctor. Prescription drugs do not include over-the-counter drugs.

¹ Illicit Drug Use includes the misuse of prescription psychotherapeutics or the use of marijuana, cocaine (including crack), heroin, hallucinogens, inhalants, or methamphetamine. Illicit Drug Use Other Than Marijuana Use includes the misuse of prescription psychotherapeutics or the use of cocaine (including crack), heroin, hallucinogens, inhalants, or methamphetamine.

² Illicit Drug Use in the Lifetime includes the misuse of prescription psychotherapeutics even though those estimates are not reported due to potential underreporting.

³ Prescription Psychotherapeutics include pain relievers, tranquilizers, stimulants, or sedatives and do not include over-the-counter drugs.

* = low precision; -- = not available; da = does not apply; nc = not comparable due to methodological changes; nr = not reported due to measurement issues.

NOTE: Misuse of prescription drugs is defined as use in any way not directed by a doctor, including use without a prescription of one's own medication; use in greater amounts, more often, or longer than told to take a drug; or use in any other way not directed by a doctor. Prescription drugs do not include over-the-counter drugs.

¹ Illicit Drug Use includes the misuse of prescription psychotherapeutics or the use of marijuana, cocaine (including crack), heroin, hallucinogens, inhalants, or methamphetamine. Illicit Drug Use Other Than Marijuana Use includes the misuse of prescription psychotherapeutics or the use of cocaine (including crack), heroin, hallucinogens, inhalants, or methamphetamine.

² Illicit Drug Use in the Lifetime includes the misuse of prescription psychotherapeutics even though those estimates are not reported due to potential underreporting.

³ Prescription Psychotherapeutics include pain relievers, tranquilizers, stimulants, or sedatives and do not include over-the-counter drugs.

ILLCIT DRUGS OTHER THAN MARIJUANA^{1,2}	nc		nc		nc	

* = low precision; -- = not available; da = does not apply; nc = not comparable due to methodological changes; nr = not reported due to measurement issues.

NOTE: Misuse of prescription drugs is defined as use in any way not directed by a doctor, including use without a prescription of one's own medication; use in greater amounts, more often, or longer than told to take a drug; or use in any other way not directed by a doctor. Prescription drugs do not include over-the-counter drugs.

¹ Illicit Drug Use includes the misuse of prescription psychotherapeutics or the use of marijuana, cocaine (including crack), heroin, hallucinogens, inhalants, or methamphetamine. Illicit Drug Use Other Than Marijuana Use includes the misuse of prescription psychotherapeutics or the use of cocaine (including crack), heroin, hallucinogens, inhalants, or methamphetamine.

² Illicit Drug Use in the Lifetime includes the misuse of prescription psychotherapeutics even though those estimates are not reported due to potential underreporting.

³ Prescription Psychotherapeutics include pain relievers, tranquilizers, stimulants, or sedatives and do not include over-the-counter drugs.

NOTE: Prescription psychotherapeutics include pain relievers, tranquilizers, stimulants, or sedatives and do not include over-the-counter drugs.

NOTE: Any Use of prescription drugs is defined as (a) the use of one's own prescription medication as directed by a doctor or (b) misuse of prescription drugs. Misuse of prescription drugs is defined as use in any way not directed by a doctor, including use without a prescription of one's own medication; use in greater amounts, more often, or longer than told to take a drug; or use in any other way not directed by a doctor. Prescription drugs do not include over-the-counter drugs.

NOTE: Prescription psychotherapeutics include pain relievers, tranquilizers, stimulants, or sedatives and do not include over-the-counter drugs.

NOTE: Any Use of prescription drugs is defined as (a) the use of one's own prescription medication as directed by a doctor or (b) misuse of prescription drugs. Misuse of prescription drugs is defined as use in any way not directed by a doctor, including use without a prescription of one's own medication; use in greater amounts, more often, or longer than told to take a drug; or use in any other way not directed by a doctor. Prescription drugs do not include over-the-counter drugs.

NOTE: Prescription psychotherapeutics include pain relievers, tranquilizers, stimulants, or sedatives and do not include over-the-counter drugs.

NOTE: Any Use of prescription drugs is defined as (a) the use of one's own prescription medication as directed by a doctor or (b) misuse of prescription drugs. Misuse of prescription drugs is defined as use in any way not directed by a doctor, including use without a prescription of one's own medication; use in greater amounts, more often, or longer than told to take a drug; or use in any other way not directed by a doctor. Prescription drugs do not include over-the-counter drugs.

* = low precision; -- = not available; da = does not apply; nc = not comparable due to methodological changes; nr = not reported due to measurement issues.

NOTE: Illicit Drug Use includes the misuse of prescription psychotherapeutics or the use of marijuana, cocaine (including crack), heroin, hallucinogens, inhalants, or methamphetamine.

NOTE: Misuse of prescription drugs is defined as use in any way not directed by a doctor, including use without a prescription of one's own medication; use in greater amounts, more often, or longer than told to take a drug; or use in any other way not directed by a doctor. Prescription drugs do not include over-the-counter drugs.

¹ Due to the use of the 2013 Rural-Urban Continuum Codes in the creation of the county type variables, the 2014 estimates may differ from previously published estimates.

NOTE: Any Use of prescription drugs is defined as (a) the use of one's own prescription medication as directed by a doctor or (b) misuse of prescription drugs. Misuse of prescription drugs is defined as use in any way not directed by a doctor, including use without a prescription of one's own medication; use in greater amounts, more often, or longer than told to take a drug; or use in any other way not directed by a doctor. Prescription drugs do not include over-the-counter drugs.

¹ Due to the use of the 2013 Rural-Urban Continuum Codes in the creation of the county type variables, the 2014 estimates may differ from previously published estimates.

NOTE: Any Use of prescription drugs is defined as (a) the use of one's own prescription medication as directed by a doctor or (b) misuse of prescription drugs. Misuse of prescription drugs is defined as use in any way not directed by a doctor, including use without a prescription of one's own medication; use in greater amounts, more often, or longer than told to take a drug; or use in any other way not directed by a doctor. Prescription drugs do not include over-the-counter drugs.

¹ Due to the use of the 2013 Rural-Urban Continuum Codes in the creation of the county type variables, the 2014 estimates may differ from previously published estimates.

NOTE: Any Use of prescription drugs is defined as (a) the use of one's own prescription medication as directed by a doctor or (b) misuse of prescription drugs. Misuse of prescription drugs is defined as use in any way not directed by a doctor, including use without a prescription of one's own medication; use in greater amounts, more often, or longer than told to take a drug; or use in any other way not directed by a doctor. Prescription drugs do not include over-the-counter drugs.

¹ Due to the use of the 2013 Rural-Urban Continuum Codes in the creation of the county type variables, the 2014 estimates may differ from previously published estimates.

NOTE: Any Use of prescription drugs is defined as (a) the use of one's own prescription medication as directed by a doctor or (b) misuse of prescription drugs. Misuse of prescription drugs is defined as use in any way not directed by a doctor, including use without a prescription of one's own medication; use in greater amounts, more often, or longer than told to take a drug; or use in any other way not directed by a doctor. Prescription drugs do not include over-the-counter drugs.

¹ Due to the use of the 2013 Rural-Urban Continuum Codes in the creation of the county type variables, the 2014 estimates may differ from previously published estimates.

¹ Refers to lifetime use of a needle to inject a drug that was not prescribed, or that was taken only for the experience or feeling it caused.

² These estimates may be inconsistent with estimates presented in other detailed tables because NSDUH data are not edited for consistency across discrete sections of the interview, except with regard to skip logic.

NOTE: Any Use of prescription drugs is defined as (a) the use of one's own prescription medication as directed by a doctor or (b) misuse of prescription drugs. Misuse of prescription drugs is defined as use in any way not directed by a doctor, including use without a prescription of one's own medication; use in greater amounts, more often, or longer than told to take a drug; or use in any other way not directed by a doctor. Prescription drugs do not include over-the-counter drugs.

¹ Includes *hydrocodone products* (Vicodin[®], Lortab[®], Norco[®], Zohydro[®] ER, generic hydrocodone, or other similar products); *oxycodone products* (OxyContin[®], Percocet[®], Percodan[®], Roxicet[®], Roxicodone[®], generic oxycodone, or other similar products); *tramadol products* (Ultram[®], Ultram[®] ER, Ultracet[®], generic tramadol, generic extended-release tramadol, or other similar products); *codeine products* (Tylenol[®] with codeine 3 or 4, generic codeine pills, or other similar products); *morphine products* (Avinza[®], Kadian[®], MS Contin[®], generic morphine, generic extended-release morphine, or other similar products); *fentanyl products* (Actiq[®], Duragesic[®], Fentora[®], generic fentanyl, or other similar products); *buprenorphine products* (Suboxone[®], generic buprenorphine, or other similar products); *oxymorphone products* (Opana[®], Opana[®] ER, generic oxymorphone, generic extended-release oxymorphone, or other similar products); *meperidine products* (Demerol[®] or other similar products); *hydromorphone products* (Dilaudid[®] or generic hydromorphone, Exalgo[®] or generic extended-release hydromorphone, or other similar products); *methadone products* (methadone or other similar products); or any other prescription pain reliever. Over-the-counter drugs are not included.

² Includes use or misuse of pain relievers containing other active ingredients. Reports of misuse of "any other prescription pain reliever" that correspond only to the specific pain reliever categories shown in the table are excluded from estimates for Any Other Prescription Pain Reliever and are included instead in the relevant pain reliever category.

NOTE: Any Use of prescription drugs is defined as (a) the use of one's own prescription medication as directed by a doctor or (b) misuse of prescription drugs. Misuse of prescription drugs is defined as use in any way not directed by a doctor, including use without a prescription of one's own medication; use in greater amounts, more often, or longer than told to take a drug; or use in any other way not directed by a doctor. Prescription drugs do not include over-the-counter drugs.

¹ Includes *benzodiazepine tranquilizers* (see footnote 2); *muscle relaxants* (see footnote 3); *buspirone products* (also known as BuSpar[®] or other similar products); *hydroxyzine products* (also known as Atarax[®] or Vistaril[®] or similar products); *meprobamate products* (also known as Equanil[®] or Miltown[®] or similar products); or any other prescription tranquilizer.

² Includes *alprazolam products* (Xanax[®], Xanax[®] XR, generic alprazolam, generic extended-release alprazolam, or other similar products); *lorazepam products* (Ativan[®], generic lorazepam, or other similar products); *clonazepam products* (Klonopin[®], generic clonazepam, or other similar products); *diazepam products* (Valium[®], generic diazepam, or other similar products); or other benzodiazepine tranquilizers that were specified for misuse of "any other prescription tranquilizer."

³ Includes *cyclobenzaprine products* (Flexeril[®], generic cyclobenzaprine, or other similar products); *carisoprodol products* (Soma[®] or other similar products); or other muscle relaxants that were specified for misuse of "any other prescription tranquilizer."

⁴ Includes use or misuse of tranquilizers containing other active ingredients. Reports of misuse of "any other prescription tranquilizer" that correspond only to the specific tranquilizer categories shown in the table are excluded from estimates for Any Other Prescription Tranquilizer and are included instead in the relevant tranquilizer category.

Any Other Prescription Stimulant ³	--	147	--	28	--	28

* = low precision; -- = not available; da = does not apply; nc = not comparable due to methodological changes; nr = not reported due to measurement issues.

NOTE: Any Use of prescription drugs is defined as (a) the use of one's own prescription medication as directed by a doctor or (b) misuse of prescription drugs. Misuse of prescription drugs is defined as use in any way not directed by a doctor, including use without a prescription of one's own medication; use in greater amounts, more often, or longer than told to take a drug; or use in any other way not directed by a doctor. Prescription drugs do not include over-the-counter drugs.

¹ Includes *amphetamine products* (Adderall[®], Adderall[®] XR, Dexedrine[®], Vyvanse[®], generic dextroamphetamine, generic amphetamine-dextroamphetamine combinations, generic extended-release amphetamine-dextroamphetamine combinations, or similar products); *methylphenidate products* (Ritalin[®], Ritalin[®] SR, Ritalin[®] LA, Concerta[®], Daytrana[®], Metadata CD, Metadate ER, Focalin, Focalin XR, generic methylphenidate, generic extended-release methylphenidate, generic dexmethylphenidate, generic extended-release dexmethylphenidate, or similar products); *anorectic (weight-loss) stimulants* (Didrex[®], benzphetamine, Tenuate[®], diethylpropion, phendimetrazine, phentermine or similar products); *modafinil products* (Provigil[®] or other similar products); or any other prescription stimulant.

² Includes amphetamine and methylphenidate products that are primarily prescribed for the treatment of attention-deficit/hyperactivity disorder (ADHD). Vyvanse[®] is included with amphetamine products because its active ingredient (lisdexamfetamine) is metabolized to dextroamphetamine.

³ Includes use or misuse of stimulants containing other active ingredients. Reports of misuse of "any other prescription stimulant" that correspond only to the specific stimulant categories shown in the table are excluded from estimates for Any Other Prescription Stimulant and are included instead in the relevant stimulant category.
